Project Description

This Conversion Exemption proposes to convert timberland into (1) an agricultural grow site and (2) homesite. Per the Humboldt County General Plan, the conversion exemption area is presently zoned Timber Production (TPZ). Humboldt County's Grading and Open Space Ordinance does not apply to this project because the conversion exemption area is zoned TPZ, and the property is greater than 3 acres in size. Consequently, Item 6 is not signed by the County's designee. The RPF has attached an e-mail from Humboldt County Planning, which states that no County review is required for Less Than 3-Acre Conversion Exemptions on TPZ lands.

Addendum 14CCR 1104.1(a)(1)(E)(1-4)

The timberland owner has certified via his signature, under penalty of perjury, that this is a one-time conversion to Agriculture and a homesite. The timberland owner understands that a "Bona Fide Intention or bona fide intent" is a present, sincere intention of the applicant to conform with and successfully execute the conversion plan, as determined by the Director in accordance with provisions of Sec. 1105.2 (Ref.: Sec. 4623, PRC). The timberland owner, acting as an individual, acting as a member of a partnership, or acting as an officer or employee of a corporation or other legal entity, has not obtained an exemption pursuant to this section in the last five years.

Addendum 14CCR 1104.1(a)(2)(F)

The conversion area is not located within a WLPZ or Class III ELZ. A Class III watercourse has been identified adjacent to the northern-most conversion site and it's ELZ flagged by the RPF to ensure equipment does not enter this zone.

Addendum 14CCR 1104.1(a)(6)

The extent of the vegetation removal and site preparation required for the conversion;

Both conversion areas are located within the footprint of THP 1-05-188 HUM, which consists of +/- 6-year old ponderosa pine, Douglas-fir and tanoak regeneration. The majority of the site preparation will consist of removing stumps and old logging slash, which shall be treated per 14CCR 1104.1(a)(2)(D) as described on the following page. Some isolated standing trees may be harvested and sold for commercial purposes.

The suitability of soils, slope, aspect, and microclimate for the stated non-timber use;

The conversion exemption area's slopes are nearly flat for the agricultural grow site, with all aspects represented and thus are favorable for agriculture. The soils are inadequate for agriculture but grow medium is imported and therefore not a limiting factor. The homesite's slopes range from gentle to moderate and also favorable for the intended use.

Addendum 14CCR 1104.1(I)

The majority of the conversion exemption area was intensively surveyed in association with THP 1-05-188 HUM with no historical or archaeological sites discovered. In addition, a June 25, 2012 records check with the North Coastal Information Center includes the conversion exemption area. No sites were recorded within the project area.

Addendum 14CCR 1104.1(a)(2)(D) - Treatment of Logging Slash and Woody Debris.

1. Unless otherwise required, slash greater than one inch in diameter and greater than two feet long, and woody debris, except pine, shall receive full treatment no later than April 1 of the year following its creation, or within one year from the date of acceptance of the conversion exemption by the Director, whichever comes first.
2. All pine slash three inches and greater in diameter and longer than four feet must receive initial treatment if it is still on the parcel, within 7 days of its creation.
3. All pine woody debris longer than four feet must receive an initial treatment prior to full treatment.
4. Initial treatment shall include limbing woody debris and cutting slash and woody debris into lengths of less than four feet, and leaving the pieces exposed to solar radiation to aid in rapid drying.
5. Full treatment of all pine slash and woody debris must be completed by March 1 of the year following its creation, or within one year from the date of acceptance of the conversion exemption by the Director, whichever comes first.
6. Full slash and woody debris treatment may include any of the following:
 - a. Burying;
 - b. Chipping and spreading;
 - c. Piling and burning; or
 - d. Removing slash and woody debris from the site for treatment in compliance with (a)-(b). Slash and woody debris may not be burned by open outdoor fires except under permit from the appropriate fire protection agency, if required, the local air pollution control district or air quality management district. The burning must occur on the property where the slash and woody debris originated.

Anita asked me to follow up on an email you had sent her regarding Less Than 3-Acre Conversion Exemptions. For non-TPZ lands, the County requires a Building Inspector to verify that there are no Streamside Management Areas or other sensitive habitat in order to sign off the exemption. In residential areas, it may require a Special Permit from the Planning Division. On TPZ lands, no County review is required for Less Than 3-Acre Conversion Exemptions or 150-foot Fire Hazard Exemptions. Hope this answers your questions. Please contact me if you have any additional questions.

Sincerely,
