DISCUSSION

Staff, working with previous State Division of Boating and Waterways (DBW) grant funds, have developed plans and have permitted the renovation of the City's Samoa Boat Launch Facility. The entire facility will be brought up to current ADA standards, a new floating dock would be installed, an additional non-motorized vessel dock would be constructed and a new restroom facility installed. These improvements would improve safety and access to Humboldt Bay for both motorized and non-motorized watercraft.

Staff is seeking approximately \$2.5 million in grant funding for this project. Based on conversations with DBW staff, the City's project should be extremely competitive. The grant program would provide funding for construction of the improvements.

A requirement of the grant application process is to have Council adopt a resolution which authorizes staff to apply for funding. The attached resolution meets that requirement.
