RE: Water use at 200 Christian School Road (APN 524-201-030)

Ms. Roberts,

Your property at 200 Christian School Road in Willow Creek has an existing 5/8 inch water meter on the Willow Creek Community Services District water system. Your average annual water usage is approximately 500,000 gallons.

I understand you have inquired if this meter can continue to be used at this rate, plus an additional 3,000 gallons per month, for your agricultural business (536,000 gallons annually). This is acceptable to the Willow Creek Community Services District. Please be aware that your property is at a high elevation compared to the water tanks that serve you (the Willow Tower tanks across from Buddy's Auto). Your water pressure may become low if the Willow Tower tanks drop in water elevation which can occur during high summer usage.

Additionally, please note that the WCCSD has a Drought Ordinance in its Board Policy. In the event of a drought, the water usage may be restricted per the policy (see attached).

Please let me know if you have any additional questions.

Sincerely,

A handwritten signature in blue ink that reads "Susan O'Gorman". The signature is fluid and cursive.

Susan O'Gorman
General Manager
