- B. Effect of Insurance. Acceptance of the insurance required by this Agreement shall not relieve CONTRACTOR from liability under this provision. This provision shall apply to all claims for damages related to CONTRACTOR's performance hereunder regardless of whether any insurance is applicable or not. The insurance policy limits set forth herein shall not act as a limitation upon the amount of indemnification or defense to be provided hereunder.

15. INSURANCE REQUIREMENTS:

This Agreement shall not be executed by COUNTY, and CONTRACTOR is not entitled to any rights hereunder, unless certificates of insurance, or other proof that the following provisions have been complied with, are filed with the Clerk of the Humboldt County Board of Supervisors.

- A. General Insurance Requirements. If a general aggregate limit is used, such limit shall apply separately hereto or shall be twice the required occurrence limit.
2. Automobile/Motor Liability Insurance with a limit of liability not less than One Million Dollars (\$1,000,000.00) combined single limit coverage. Such insurance shall include coverage of all owned, hired and non-owned vehicles, and be at least as broad as Insurance Service Offices Form Code 1 (any auto).
3. Workers' Compensation Insurance, as required by the California Labor Code, with statutory limits, and Employers Liability Insurance with a limit of no less than One Million Dollars (\$1,000,000.00) per accident for bodily injury or disease. Said policy shall contain, or be endorsed to contain, a waiver of subrogation against COUNTY and its agents, officers, officials, employees and volunteers.
4. Professional Liability Insurance – Error and Omission Coverage including coverage in an amount no less than Two Million Dollars (\$2,000,000.00) for each occurrence (Four Million Dollars (\$4,000,000.00) general aggregate). Said

insurance shall be maintained for the statutory period during which CONTRACTOR may be exposed to liability regarding the services provided pursuant to the terms and conditions of this Agreement. CONTRACTOR shall require that such coverage be incorporated into its professional services agreements with any other entities.

B. Special Insurance Requirements. Said policies shall, unless otherwise specified herein, be endorsed with the following provisions:

1. The Comprehensive or Commercial General Liability Policy shall provide that COUNTY, and its agents, officers, officials, employees and volunteers, are covered as additional insured for liability arising out of the operations performed by, or on behalf of, CONTRACTOR. The coverage shall contain no special limitations on the scope of protection afforded to COUNTY or its agents, officers, officials, employees and volunteers. Said policy shall also contain a provision stating that such coverage:

 - e. Contains a cross liability, severability of interest or separation of insureds clause.
2. The above-referenced policies shall not be canceled, non-renewed or materially reduced in coverage without thirty (30) days prior written notice being provided to COUNTY in accordance with the notice requirements set forth herein. It is further understood that CONTRACTOR shall not terminate such coverage until COUNTY receives adequate proof that equal or better insurance has been secured.
3. The inclusion of more than one (1) insured shall not operate to impair the rights of one (1) insured against another insured, and the coverage afforded shall apply as though separate policies had been issued to each insured, but the inclusion of more than one (1) insured shall not operate to increase the limits of the insurer's liability.
4. For claims related to this Agreement, CONTRACTOR's insurance is the primary coverage to COUNTY, and any insurance or self-insurance programs maintained thereby are excess to CONTRACTOR's insurance and will not be used to contribute therewith.
5. Any failure to comply with the provisions of this Agreement shall not affect the coverage provided to COUNTY or its agents, officers, officials, employees and

volunteers.

6. CONTRACTOR shall furnish COUNTY with certificates and original endorsements effecting the required coverage prior to execution of this Agreement. The endorsements shall be on forms approved by the Humboldt County Risk Manager. Any deductible or self-insured retention over One Hundred Thousand Dollars (\$100,000.00) shall be disclosed to, and approved by, COUNTY. If CONTRACTOR does not keep all required policies in full force and effect, COUNTY may, in addition to any other available remedies, take out the necessary insurance and deduct the cost of said insurance from the monies owed to CONTRACTOR under this Agreement.
 7. COUNTY is to be notified immediately if twenty-five percent (25%) or more of any required insurance aggregate limit is encumbered, and CONTRACTOR shall be required to purchase additional coverage to meet the above-referenced aggregate limits.
- C. Insurance Notices. Any and all insurance notices required hereunder shall be sent to the addresses set forth below in accordance with the notice provisions described herein.

This section is expected to discuss area-wide settings as well as a brief discussion of the specific area surrounding each affected parcel. This section will include maps and other exhibits, as well as a narrative description of the project area and its surroundings. A baseline physical condition should be determined and be no longer than is necessary to provide an understanding of the significant effects of the proposed project and its alternatives. If applicable, the EIR should discuss any inconsistencies between the proposed project and the County General Plan and McKinleyville Community Plan.

Environmental Impact Evaluation

CONSULTANT will conduct an evaluation of impacts utilizing the baseline physical conditions for a threshold of significance for each topic. The significance of project-related impacts will then be determined for the project area. In assessing the impact of the proposed project on the environment the examination should be limited to changes in the affected area as they exist at the time of the Notice of Preparation being published. Direct and indirect significant effects of the project on the environment shall be clearly identified and described, giving due consideration to both the short-term and long-term effects. Except where impacts are expected to be acute and site specific, specific environmental topical areas to be addressed will include the following:

➤ Aesthetics

This section will address the project's potential to substantially impair the visible character of the project area's scenic resources. The EIR will include a discussion of proximity to scenic roadways and scenic vistas, existing lighting standards, and recommendations for mitigating any potentially significant impacts.

➤ Agriculture and Forest Resources

Agriculture and timber production uses will be assessed for the project area and parcels which are expected to convert to non-agricultural uses will be identified. An analysis of the agricultural suitability of the soil types on the subject site will be prepared.

➤ Air Quality

The proposed project will be analyzed using the North Coast Unified Air Quality Management District (NCAQMD) air quality standards. URBan EMISsions air quality modeling software (or an authorized equivalent) will be used to estimate the quantity of criteria pollutants expected to be generated by the project both in construction and in operations, including the impacts of automobiles traveling to and from the affected sites.

➤ Biological Resources

Existing information sources, including currently mapped streamside management / wetland areas, and the Natural Diversity Data Base (NDDDB) will be used to determine whether biological resources on or adjacent to any of the affected parcels are likely to be impacted. The EIR will need to evaluate any potential habitat for listed species, identify impacts and possible mitigation. The project proposes to use a 3-parameter wetland delineation within the town center. This will require analysis of the potential impacts to wetlands in changing the delineation criteria from a single parameter to three parameters. Wetland surveys are being

completed and will be available for the EIR Consultant to use in the analysis in the change in wetland definitions and in the actual impacts. The project proposes to set aside land for wetland conservation and recreation. The Town Center Ordinance also includes criteria for wetland mitigation.

➤ Cultural Resources

Information regarding historical resources in the project area must be reviewed and adequate mitigation measures should be proposed to preserve such resources. This includes historical structures, archaeological resources, human remains, etc.

➤ Energy

Description of potential impacts due to wasteful, inefficient, or unnecessary consumption of energy resources, during project construction or operation and potential conflict with state or local plans for renewable energy or energy efficiency.

➤ Geology and Soils

Existing information sources, including Alquist-Priolo Maps, soil surveys and similar data to address likely impacts related to soils, geologic hazards, seismic safety, and structural hazards shall be utilized. No fieldwork, technical or engineering analysis is anticipated, however, mitigation measures requiring such analysis prior to development may be appropriate for particular areas, depending upon the soil types shown to be present.

➤ Greenhouse Gas Emissions and Climate Change

An URBEMIS analysis shall be conducted to quantify the likely contribution of Carbon Dioxide and other greenhouse gases to the extent they can be determined. The primary sources of greenhouse gas emissions expected to be identified in conjunction with the project are construction impacts (short-term) and the transportation related impacts (long-term). Where proposed rezoning is likely to reduce overall vehicle trip length through support of a more land-efficient urban use, the potential beneficial effects of the project on greenhouse gas emissions will also be discussed.

➤ Hazards and Hazardous Materials

Identification of affected parcels on the State of California's lists of known locations of hazardous materials generators will need to be determined. It will be necessary to identify any significant hazards to the public or environment due to hazardous materials or foreseeable upset and accident conditions involving hazardous materials. Impairment of any adopted emergency response plans or evacuation plans must be determined.

➤ Hydrology and Water Quality

Issues associated with hydrology, water supply and water quality, of both surface and ground water must be analyzed. Flooding and drainage issues need to be addressed in this section to determine if proposed development will substantially alter existing drainage patterns. Identification of areas that may result in substantial erosion or increased surface runoff that would result in flooding on or off site need to be identified. The McKinleyville Community Plan includes drainage criteria.

➤ Land Use and Planning

Environmental impacts due to conflicts with any land use plan, policy, or regulation adopted for the purpose of avoiding or mitigating an environmental effect must be analyzed.

- Mineral Resources
Information on mineral resources will be referenced and supplemented as necessary.
- Noise
Using existing information such as community plans, the technical studies prepared by Humboldt County in support of the General Plan Update and noise contours for major transportation facilities prepared by other agencies, the potential for noise impacts to limit the development potential or to require sound mitigation strategies during construction must be determined. Construction noise will also be addressed. Existing policies regarding construction and development in noise impacted areas will be addressed.
- Population and Housing
Population and housing effects will be described in the context of the Regional Housing Needs Assessment and the policies of the adopted Housing Element. An estimate will be prepared of the number of residents expected to be accommodated within the project area, upon full buildout.
- Public Services
Using the technical reports prepared for the General Plan Update, a brief analysis of the capability of each affected community service provider to serve higher density residential uses as proposed needs to be prepared.
- Recreation
Community recreation facilities likely to be affected need to be identified and a description of potential effects of a higher intensity use of those facilities must be provided. If the recreation facilities currently available do not meet the demand of the proposed project, information regarding expansion or construction of recreational facilities should be provided.
- Transportation
An analysis of the transportation impacts associated with developing the site with a higher density mixed use is needed. The Town Center plan is contemplating the potential of no minimum parking requirement with a higher reliance on public transit, pedestrian and bicycle modes of transportation. The analysis also needs to evaluate the impacts (either as the primary project or project alternative) of reducing the number of lanes upon the major north south arterial through McKinleyville (Central Avenue.) The community is concerned about the amount of delay and redistributed traffic this will create. This needs to be modeled. The newest traffic counts for Central Avenue are from 2012.
- Tribal Cultural Resources
General information on cultural resources, historical sites and landmarks will be compiled and reported in this section. No fieldwork is anticipated. County Staff will provide a consultation request to the tribes with ancestral territory over the provide area consistent with AB52 protocol. (County will conduct the AB52 consultation.)
- Utilities and Service Systems
Using the technical reports prepared for the General Plan Update, and in consultation with utility providers, a brief analysis of the capability of local utility systems to serve higher density residential uses as proposed needs to be completed. The project needs to be evaluated to determine if it requires any construction or expansion of utilities or service systems to

adequately support the proposed development. Any hurdles that may pose a barrier to meeting the needs of the proposed development should be addressed.

➤ Wildfire

An analysis of the impacts on fire safety and fire hazards from the proposed higher density residential uses including impacts on emergency response plans or emergency evacuation plans, exacerbate wildfire risks, installation of infrastructure that may increase fire risk, and/or expose people or structures to significant risks needs to be provided.

➤ Mandatory Findings of Significance

A summary of the project's potential to substantially degrade the quality of the environment and sensitive habitat areas must be prepared. The summary should include impacts that are individually limited, but cumulatively considerable in relation to past projects, other current projects, and of probable future projects. Any environmental effects which will cause substantial adverse effects on humans directly or indirectly shall be included.

Significant Environmental Effects

CONSULTANT will identify and describe the direct and indirect effects of the project on the environment, giving due consideration to both the short- and long-term effects. The discussion should include relevant specifics of the area, the resources involved, physical changes, alterations to ecological systems, and changes induced in population distribution, population concentration, and the human use of the land.

Environmental Effects Which Cannot be Avoided

CONSULTANT will describe any significant impacts, including those which can be mitigated but not reduced to a level of insignificance. Impacts that cannot be alleviated with an alternative shall include their implications and the reasons why the project is being proposed.

Significant Irreversible Environmental Changes

CONSULTANT will describe any uses of nonrenewable resources during the initial and continued phases of the project which may be irreversible.

Growth-Inducing Impacts

CONSULTANT will discuss the ways in which the proposed project could foster economic or population growth, or the construction of additional housing, whether directly or indirectly, in the surrounding environment. The discussion should include any removal of obstacles to population growth, impacts of existing community service facilities, and individual or cumulative impacts on the environment due to other activities as a result of the project.

Mitigation Measures

CONSULTANT will describe feasible measures which could minimize significant adverse impacts. The proposed mitigation measures must be fully enforceable through permit conditions, agreements, or other legally binding instruments. Mitigation measures must have an essential connection between the mitigation measure and a legitimate governmental interest, and must be "roughly proportional" to the impacts of the project. Mitigation measures impacting historical resources or greenhouse gas emissions must be compliant with Section 15126.4 of the CEQA guidelines.

Project Alternatives

CONSULTANT will provide an analysis of a reasonable range of alternatives to the preferred project that would avoid or substantially lessen any of the significant effects of the preferred project. CONSULTANT proposes to evaluate alternatives, developed in close cooperation with the County of Humboldt. The alternatives will include a road diet on Central Avenue not being included, maintaining one parameter wetlands, and a reduced scale alternative that would limit development to two story buildings. A No Project alternative, which will assume that the proposed project will not be rezoned, must be addressed.

The EIR must identify the environmentally superior alternative and, if that is the no-project alternative, the environmentally superior alternative among the remaining alternatives.

Cumulative Impacts

CONSULTANT will address cumulative effects using the “full build out” method in which impacts are considered in the context of the anticipated development over their current planning period. Any reasonable, feasible options for mitigating or avoiding the project’s contribution to any significant cumulative effects will be identified.

Effects Not Found to be Significant

CONSULTANT will prepare a brief statement in this section explaining why possible significant effects were determined not to be significant and were therefore not discussed in detail.

References and Bibliography

CONSULTANT will compile a bibliography of technical documents and published literature consulted during the preparation of the EIR. Lists of all federal, state, and local agencies; other organizations and private individuals consulted during preparation of the EIR; and the list of persons who prepared the EIR, will be presented.

Submit ADEIR for Review

CONSULTANT will provide electronic copies of Administrative Draft EIR for in-house review and comment by staff.

Circulate Draft EIR

CONSULTANT will revise the ADEIR as necessary to reflect County of Humboldt comments. The resulting Draft EIR will be published and circulated for agency and public review according to provisions of the CEQA Guidelines. COUNTY anticipates that one public comment meeting will be scheduled during the review period of the Draft EIR.

Responses to Comments and Final EIR

Pursuant to Section 15088 of the CEQA Guidelines, the Final EIR must respond in writing to each oral and written comment of the DEIR made by individuals, agencies, and organizations that review it. CONSULTANT will provide initial responses to comments at the end of the EIR circulation period for review by County Staff.

Comments and responses to comments, along with any amendments or alterations to the Draft EIR made in response to those comments and the list of commenting agencies, organizations, and individuals will be published as a separate volume of the EIR which, when combined with the DEIR will constitute the Final EIR (FEIR).

ATTENDANCE AT PUBLIC HEARINGS

CONSULTANT activities expected to be included in this Task include, but are not limited to, the following:

- 1) Prepare display maps, power point presentations and presentation materials
- 2) Participate in review and preparation meetings with County Staff
- 3) Attend one or more Public Hearings at Planning Commission
- 4) Attend one or more Public Hearings at the Board of Supervisors
- 5) Prepare written responses to comments raised at hearings by members of the public, Commissioners or Board members.

An initial budget will be established for this task, to be expended only as needed to complete on-call tasks as assigned.

PROJECT MANAGEMENT

CONSULTANT may conduct meetings by phone, zoom or in person with County Staff. The purpose of the meetings will be to coordinate data deliveries, provide project updates, review methodologies and provide preliminary feedback regarding the likely effect of the ongoing analysis on the recommended Housing Inventory. The project management task also includes assignment and coordination of work effort, and schedule and budget maintenance
