Good morning, Dave,

I am writing in regard to the Georgi Aleksandrov project (APPS #11426) through the County of Humboldt, for which you are listed as the agent. I am currently working on preparing the staff report and had some questions about the project I was hoping you could help me with:

1. Please confirm if the below project description is accurate:

**Project Description:** A Conditional Use Permit for 22,000 square feet (SF) of existing mixed light cultivation, including 2,800 SF of ancillary propagation. Irrigation water is sourced from a spring diversion. Existing available water storage is 62,000 gallons in a series of hard-sided tanks and two (2) 20,000-gallon bladders, including 5,000 gallons dedicated to fire suppression. Estimated annual water usage is 159,200 gallons. Drying and curing occurs onsite within an existing 1,200 SF (30'x40') dry barn, with all other processing occurring offsite at a licensed processing or manufacturing facility. A maximum of four (4) people will be onsite during peak operations and no employees are required for the operation. Power is provided by two (2) generators. Special Permits are also requested for continued use and maintenance of the existing point of diversion and relocation of two (2) existing water tanks located within a Streamside Management Area (SMA) outside of the required buffer.

2. Are there any long-term plans to switch to an alternative power source (such as PG&E or solar)?

Thank you for your help!

Sincerely,  
Megan
