Introduction

Fortuna, known as “The Friendly City,” was incorporated in 1906 and is a small, rural community of just over 12,000 residents and covering an area of 5.1 square miles. The City of Fortuna is governed by a Council/Manager form of government. The City Council consists of five members, elected from the City at large, who serve four-year terms. The Mayor and the Mayor Pro Tem are elected biannually by the City Council from amongst its members. The City Manager works under the direction of the City Council and is responsible for supporting the policies enacted by the City Council, as well as managing the day-to-day operations of the City.

The City of Fortuna’s mission is “To be worthy of the public trust by providing timely, efficient, well-planned, and dependable services to the community.” Part of the City’s commitment to this mission is through a well-planned Five-Year Capital Improvement Program that works to maintain and replace aging facilities as well as construct new infrastructure, as it is needed.

What is a Capital Improvement Program? A Five-Year Capital Improvement Program (CIP) is a multi-year planning instrument used to identify needed capital improvement projects and to coordinate the financing and timing of improvements. The primary purpose of the CIP is to assist in the orderly implementation of the broad and comprehensive goals of the adopted General Plan and for the maintenance and replacement of the City’s infrastructure by establishing an orderly basis to guide local officials in making sound budget decisions and by focusing attention on community goals, needs, and capabilities to maximize the benefit of public expenditures.

Projects may include land and buildings, park and recreation facilities, street and storm drain facilities, wastewater collection and treatment facilities, and water treatment and distribution facilities.

An effective Capital Improvement Program:

1. Identifies specific public improvement projects by location, size, function, and cost (although some types of projects, such as street resurfacing and maintenance of water and sewer facilities may be shown on an annual allocation basis).
2. Establishes the timing for funding of major cost elements related to each project, such as right-of-way acquisitions, design, construction, etc.; for large projects, these may be spread over several years, while for smaller projects, only a single budget year is involved.
3. Proposes specific revenue sources for each project.
4. Facilitates priority setting where funds are insufficient to cover all desired projects.
5. Enhances coordination of separate but interrelated projects, whether internal or involving other agencies.
6. Gives other affected agencies, such as utilities, an opportunity to develop long-range programming.
7. Tends to discourage inefficient and frequent changes in allocation of capital resources.
8. Permits an educated approach to staffing for engineering, operation, and maintenance.

For most cities, a five-year CIP period appears to be workable and realistic. Under this guideline, it is common for the first year of the CIP to be combined into the annual budget process. In all cases, the CIP would be flexible enough to make the inevitable adjustments for unanticipated cost changes, urgent projects, or other factors. In addition, the City will be able to more clearly identify and discuss the consequences of a delay in timely project commencement due to such factors.

How are projects funded? Funding for projects is usually derived from special source funds including gas tax, water reserves, sewer reserves, remaining balances of the General Fund, or state, federal, and other grants.

Gas tax, water, and sewer fund revenues are budgeted only for capital projects in the categories appropriate to their sources.

The General Fund's ability to make significant contributions to the CIP has been declining over the last several years by a combination of factors. The City's General Fund has had its revenues reduced by the State budget crisis. The General Fund currently does not have the ability to finance capital improvement projects in the same way that is has done in the past.

Federal, state, and other grant funds may only be used for the purpose for which the funds were received.

Although this CIP falls short of funding the optimum level of infrastructure improvements, it does represent an effort to use all available funding sources for the most vital projects.

Project priorities should be established by:

1. Projects with a clear issue of public health and safety.
2. Projects which trigger irreversible or serious long-range consequences.
3. Projects that eliminate liabilities experienced in the past.
4. Projects mandated by county, state and/or federal laws, the public and other agencies.
5. Projects directly related to established goals or objectives.
6. Projects directly affecting the quality of life for residents of the City of Fortuna.

Every effort is made to ensure that all projects are described accurately and have sound cost estimates. Some projects are conceptual in nature and these cost estimates are difficult to generate and should be considered flexible.

Estimates are initially made for every project in 2024 dollars. As priorities for construction are assigned for each project, the dollar amount is updated to more accurately reflect costs within the proposed year of construction. **The estimates are general with the intent that they should be revised as they are brought into the annual budget process.**

The projects identified in this 2024-2029 CIP are considered essential in order to implement goals, protect public property from deterioration and extending its useful life, and preserve the City's prior infrastructure investments.

In summary, the 2024-2029 Five-Year Capital Improvement Program is a planning and budgeting tool that lists and classifies all proposed public improvement projects maximizing the investment to the public.

Respectfully Submitted,

Brendan Byrd
Director of Public Works/City Engineer

Merritt Perry
City Manager

Summary

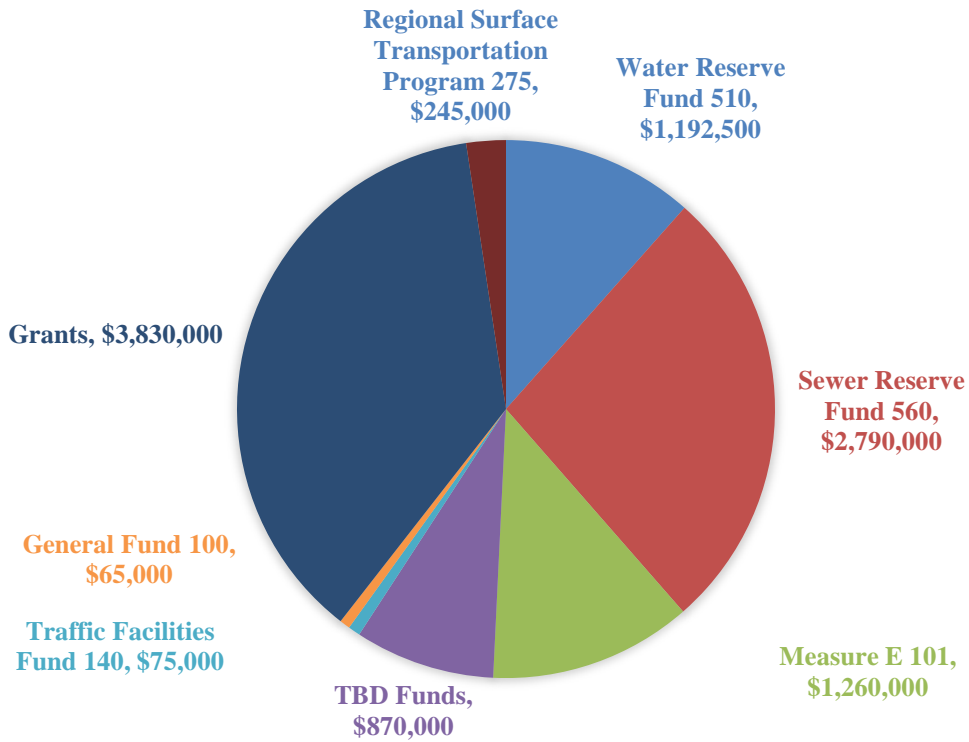

Projected Project Costs by Year and Department

	2024/2025	2025/2026	2026/2027	2027/2028	2028/2029
Water	\$1,192,500	\$2,250,000	\$1,300,000	\$1,150,000	\$1,150,000
Wastewater	\$2,790,000	\$4,400,000	\$15,550,000	\$15,100,000	\$4,800,000
Drainage	\$1,120,000	\$325,000	\$660,000	\$800,000	\$200,000
Streets	\$4,225,000	\$1,000,000	\$600,000	\$960,000	\$600,000
Parks/Recreation	\$895,000	\$0	\$3,000,000	\$0	\$0
Land/Buildings	\$105,000	\$150,000	\$1,000,000	\$150,000	\$150,000
Totals	\$10,327,500	\$8,125,000	\$22,110,000	\$18,160,000	\$6,900,000

Total of all projects in this CIP: \$65,622,500

2024/2025 FY PROJECTS BY FUNDING SOURCE

TOTAL CIP FUNDS BY USAGE

Description

Road, fence, and drainage repairs as needed.

Justification

This project will repair damage done to the access road over previous years of projects and maintenance as well as repair damaged fences due to falling redwood limbs and small trees. Drainage spouts will be inspected and repaired as needed.

Studies and Reports

Identified and recommended by the Water Treatment Crew.

Funding Sources

Water Reserves Fund 510

Prior Appropriations

Water Reserves Fund 510;
Repairs \$105,676

Comments

The main project elements include fencing, tree removal, roadway repairs, rock slope protection, and drainage improvements. Tree removal was completed in late 2022/early 2023, and fencing was completed in late 2023. remaining items include primarily drainage improvements.

(Chief Plant Operator)

Project Cost Estimate

	2024 Dollars	
1. Construction	\$200,000	24/25
Total	\$200,000	

Description

Replacement of the underground source main pipes at the Corrosion Control Facility. Construction of a new shallow well in place of previously drilled Well 5b. Addition of various electronic and metering equipment for the new well.

Justification

Current piping configuration results in pump inefficiencies from the water wells. The updated pipe configuration will create the most efficient operation for each well pump. Well 5 was previously underperforming, and the new Well 5b was found to have levels of manganese that require robust and expensive treatment in order to bring the well online.

Studies and Reports

Identified and recommended by City Consultant.

Water System Master Plan

CIP# 9109

Description

Develop an updated master plan for the water system of the entire City. Perform a rate study to inform required adjustments to City water rates.

Justification

This master plan will provide information that staff can use to identify improvements needed to develop future projects that protect the existing infrastructure and provide redundancy and a reliable water supply to the City.

Studies and Reports

Previous master plan by Oscar Larson & Associates April 2007

Project Cost Estimate

2024 Dollars

1. Planning

\$150,000

24/25

Total

\$150,000

Description

Replacement of the old 2” cast iron line with 6” C-900 (plastic) along the following alleys that connect I to L Street: the alley between 9th and 10th Street, the alley between 10th and 11th Street, and the alley between 11th and 12th Street. Also includes the alley connecting N to P Street between 13th and 14th Street, , replacement of the old 6” AC (concrete) with 6” C-900 (plastic) along Orchard Lane, replacement of the 4” cast iron pipe with 6” C-900 (plastic) on 14th Street from K Street to P Street, and replacement of the water main on Newburg Road between Fortuna Boulevard and Spring Street.

Justification

The upgraded line will provide better flow rates to homes and businesses in the area. Additionally, it will eliminate potential corrosion and water quality issues that can come from the existing cast iron lines and increase line sizes for improved fire flows.

Studies and Reports

Identified and recommended by the Utilities Crew.

Funding Sources

Water Reserve Fund 510

Prior Appropriations

N/A

Comments

This project may be completed by City Forces with the rental or purchase of a mini excavator, or through contract and bid document (TBD). This project includes installation of a new hydrant on Orchard Lane. Additionally, this project may be combined with sewer CIP #9067 for construction.

(Utilities Superintendent)

Project Cost Estimate

2024 Dollars

2. Construction	\$1,800,000	25/26
Total	\$1,960,000	

Drake Hill Road Water Main Replacement Project

CIP# 9115

Description

Replace asbestos cement pipe waterline with 8" C900 (plastic)

Justification

Currently some sections of Drake Hill Road are AC pipe while others are C900. The AC pipe is old and frequently causes leaks. This project would update all the sections to the newer C900 (plastic) pipe, which would decrease the likelihood of future leaks in this area.

Studies and Reports

This project was identified by the Utilities Superintendent.

Project Cost Estimate

	2024 Dollars	
1. Design	\$300,000	25/26
2. Construction	\$700,000	26/27
Total	\$1,000,000	

Description

Replacement of failed concrete pipe in the section of an access road formerly known as Barney Street. Install a twenty-four inch high density Polyethylene pipe. The pipe is located below the Stewart Tank Reservoir near 1038 Eleventh Street.

Justification

The concrete culvert has collapsed causing excess water to migrate. The overflow from Stewart Tank and surrounding storm water runoff uses this culvert. The City’s main water line runs parallel to the culvert.

Studies and Reports

Identified and recommended by General Services Staff.

Funding Sources

Water Reserves Fund 510

Prior Appropriations

N/A

Comments

The new culvert will start above the current existing Inlet and will extend approximately two hundred feet. The new culvert will tie into a newer drainage inlet and storm drain located on Eleventh Street.

Meadow Lane Water Main Replacement Project

CIP# TBD

Description

Replace with existing asbestos cement pipe with 6" C900 (plastic).

Justification

Existing water main currently runs through the front yards of homes on the west side of Meadow Lane. This project would move water line into the street to provide easier access for repairs. This is also one of the last streets in this area with an AC water main and will be upgraded to C900 (plastic) which should lead to a decrease in the amount of leaks on this line.

Studies and Reports

Identified by the Utilities Crew.

12th Street Water Main Project

CIP# 9065

Description

Replacement of the existing 6” and 8” AC (concrete) mains with 12” C-900 (plastic) mains from L Street to Newburg Road.

Justification

The existing mains are undersized concrete and will be replaced with the larger and more durable plastic to provide better flow rates to homes and businesses in the area.

Studies and Reports

Identified and recommended by 2007 OLA Water System Report.

Funding Sources

Water Reserves Fund 510

Prior Appropriations

Comments

May revisit project after completion of water study.

(Utility Superintendent)

Project Cost Estimate

2024 Dollars

1. Design	\$450,000	26/27
2. Construction	\$450,000	27/28

Total **\$900,000**

Description

Replace the existing 1” galvanized and plastic water line extending north along Carson Woods Road, beginning at Sunny Slopes Road. Add fire hydrants every 600-feet per requirements of the Fortuna Fire Department. Provide engineered bridge crossing for the water line. Replace service connections to existing meters.

Justification

The existing water line is too small to deliver adequate service pressure and volumes to existing residences along Carson Woods Road. During recent earthquakes from the past several years, the pipe has regularly failed due to pipe age.

Annual Water System Valve Replacement Project

CIP# 9990

Description

This CIP will provide funding in order to complete valve cluster replacements in areas requiring contractor assistance.

Justification

The city's water system has a number of valves that due to age and conditions are unable to be closed. This hampers efforts to both repair line breaks and to add to the system for development and expansion.

East Downtown Sewer Replacement Project

CIP# 9514

Description

Replacement of the existing sewer line with 6” SDR 35 (plastic) in the alleys between 14th and 15th Street as well as 15th to 16th Street from N Street to P Street. Also on 8th Street from P Street to Main Street.

Justification

The existing line was constructed from clay, which, over time, has led to storm water infiltration of the sewer. Replacing these lines will reduce the cost of treating this water at the wastewater treatment facility.

Studies and Reports

Identified and recommended by the Utilities Crew.

Hilltop Sewer Main Project

CIP# TBD

Description

Extend 6” SDR 35 (plastic) sewer main to include all of Hilltop Drive (approximately 900 feet).

Justification

Currently the City’s sewer ends at the intersection of Ridgeview and Hilltop. This leaves approximately 30 homes on Hilltop Drive with septic systems. City code requires anyone within 1,000 feet of City sewer to be connected to sanitary sewer system. This project will reduce the inherent ground water pollution sources from septic systems.

Treatment Plant PLC, VPN, and Hardware Upgrades CIP# TBD

Description

Replace defunct SE Modicon PLC Cards, non-functioning VPN, and rewire PLC cabinets (5 total).

Justification

Our Modicon PLCs were discontinued in 2020, and their end of life is in 2028. With a new plant upgrade on the way, we need PLCs with extended life that can keep up with our plant until the next upgrade is needed. Our VPN has been non-functional since 2020, and we need secure remote access to our SCADA system at all times. Wiring is optional, but currently some of our cabinets are an unlabeled, or mislabeled, mess. Getting PLC addresses properly labeled and all equipment wired during the plant upgrade can allow for proper future automation, maintenance, and operation of our equipment.

Studies and Reports

WWTP Strong's Creek Lift Station Meter Box and Minor Concrete Rehabilitation Project

CIP# 9126

Description

This CIP will make necessary repairs to the concrete chamber where influent flow from the Strong's creek and the CCC sewer lift stations enter the wastewater treatment plant.

The second part of this CIP will make necessary repairs to the concrete at the junction of the rectangular and circular chlorine contact chambers.

Justification

The Strong's creek junction box has been in existence since the early 80's and is exposed to large amounts of hydrogen/sulfide (H₂S). H₂S is highly corrosive to concrete and through the years, the box has corroded to the point where it is in need of replacement.

Citywide Stormdrain Maintenance Project Location Details

CIP# 9373

Description

12th and O Street crossing. Replace insufficient size concrete pipe. Upgrade with new pipe and drainage inlets. Historically, storm water typically backups during heavy weather events causing water to flood over the sidewalk and into private property (*see right picture*).

Description

Failed corrugated metal culvert located on North Main Street, in between the Double D's Restaurant and C. Crane Building. The culvert connects from the drainage ditch from Harlan Way to Main Street culvert. CMP has rusted out holes in the bottom of the culvert allowing running water to erode the trench material (*See bottom picture*).

Description

Replacement of the outfall and culvert at South 15th Street.

Justification

The existing corrugated metal pipe is deteriorated at the flow line (invert). This project will replace the damaged line and outfall to improve drainage and reduce soil erosion.

Studies and Reports

Identified and recommended by the General Services Crew.

Project Cost Estimate 2024 Dollars

1. Design	\$40,000	25/26
2. Construction	\$400,000	26/27
Total	\$440,000	

Description

Replacement of Mill Creek undercrossings at Weber Street, Rohnerville Road, Mill Street and Mountain View Road to allow for improved fish passage.

Justification

Due to perched or over steepened conditions, fish passage is not possible at these locations.

Studies and Reports

GHD- Geotechnical, Wetland Delineation, Biological Inventory and Cultural Resources (12-2023 thru 5-2024)

Funding Sources

WBC Grant Fund 350;

Kenmar Interchange Improvement Project

CIP# 9978

Description

This project is a complete look at the Interchange of Kenmar Road and Highway 101 including vehicular, pedestrian and cycling users.

Justification

This project will improve the traffic flow and pedestrian & cycling safety at this interchange with Highway 101.

Studies and Reports

Identified and recommended by the City Engineer.

Funding Sources

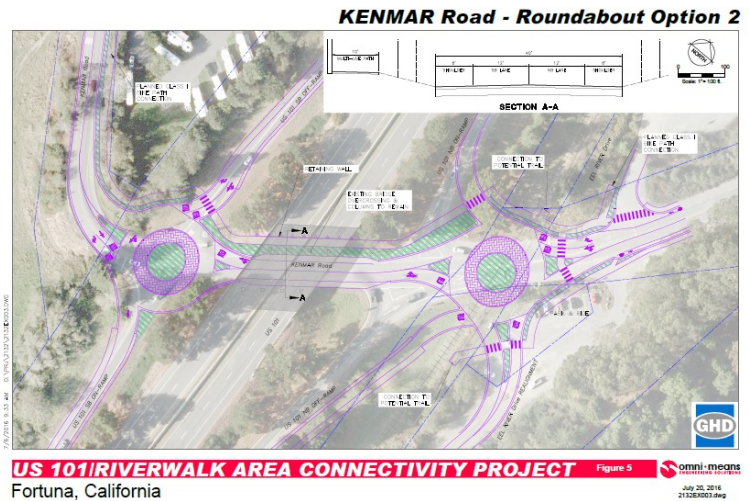

STIP Grant Fund 270

Prior Appropriations

Complete Streets grant through the Humboldt County Association of Governments provided for a Project Study Report on alternatives to improve this interchange.

STIP Grant Fund for PAED 270;
\$550,000

Comments

(City Engineer)

Project Cost Estimate

	2024 Dollars	
1. Design/Construction	\$2,600,000	24/25
Total	\$2,600,000	

Description

Remove barriers for people with disabilities at various locations in the City. In 2023/24, the City completed an ADA barrier removal project along N Street, in between the bus stop and the library.

Justification

The City is continuously removing barriers that might prevent its citizens from being able to use and enjoy City facilities. This project will do a big part in completing this goal.

Studies and Reports

2014 ADA transition Plan

Funding Sources

CDBG Fund 830

Prior Appropriations

CDBG Fund 830
N Street Project; \$600,000

Comments

Funding shown in the next two fiscal years will go to cover the development and implementation of a new ADA barrier removal project.

(City Engineer)

Project Cost Estimate

2024 Dollars

1. Design	\$80,000	24/25
2. Construction	\$400,000	25/26
Total	\$480,000	

Description

Paving of locations throughout the City as needed and as part of an annual contract.

Justification

A contract will be taken out annually with a qualified paving contractor who can then provide routine repairs and maintenance for City streets.

Studies and Reports

Identified and recommended by the General Services Crew.

Funding Sources

Measure E Fund 101; 55%
 RSTP Fund 275; 45%
 Other funds may be used as determined to be appropriate by project.

Prior Appropriations

Measure E Fund 101
 TDA Fund 140
 LTF Fund 260

Comments

Annual maintenance project based on need, locations to be identified by staff.

(General Services Superintendent)

Project Cost Estimate

2024 Dollars

1. Construction	\$175,000	24/25
2. Construction	\$225,000	25/26
3. Construction	\$225,000	26/27
4. Construction	\$225,000	27/28
5. Construction	\$225,000	28/29

Total \$1,075,000

Anticipated Project Description

L Street, in between 9th Street to 11th Street. Remove failing asphalt and replace with 0.25-feet of hot mix asphalt. L Street is located south of Main Street. L Street provides vehicles another path of travel for vehicles generally accessing Main Street. L Street sees higher volume of traffic and pedestrians during special events when Main Street is closed to through traffic.

Anticipated Project Description

Newburg Road, at various locations. In late 2023, staff are planning for a grind and inlay repair of Newburg Road in between Newburg Park and Elizabeth Barcus Way. Additionally, staff are planning a repair of approximately 700-feet in length along Newburg Road, generally in between the Gene Lucas Center and Nelson Lane.

Anticipated Project Description

Kenmar Road near the Kenmar Interchange and Ross Hill Road Intersection. This area, specifically the lanes travelling westbound into town, require rehabilitation to deal with what have become routine annual failures in the asphalt. Staff anticipate performing this pavement restoration in late 2023.

Anticipated Project Description

Kenmar Road, in between Rohnerville Road and Brandi Lane. For many decades, Kenmar Road was one of the main connections between Fortuna Boulevard and Rohnerville Road prior to Kenwood Road being built. Due to the lower volume of vehicle traffic, has slowly deteriorated over the course of time.

Description

Street slurry at multiple locations throughout the City of Fortuna.

Justification

This project is part of the regular maintenance and will seal the road surface and extend the life of the existing roadway.

Studies and Reports

Identified and recommended by the General Services Crew.

Funding Sources

RSPT Fund 275

Prior Appropriations

Comments

Locations to be determined annually by need. This is a county-wide collaborative project that allows for an economy of scale and a better price for Fortuna’s citizens. Next anticipated project will be in calendar year 2024.

(General Services Superintendent)

Project Cost Estimate

2024 Dollars

1. Construction	\$50,000	24/25
2. Construction	\$50,000	25/26
3. Construction	\$50,000	26/27
4. Construction	\$50,000	27/28
5. Construction	\$50,000	28/29

Total **\$250,000**

Citywide Concrete Project

CIP# 9073

Description

Repair of sidewalk and curb locations throughout the City as needed and as part of an annual contract.

Justification

A contract will be taken out annually with a qualified concrete contractor who can then provide routine repairs and maintenance for City curbs, gutters, and sidewalks on an on-call basis.

Studies and Reports

Identified and recommended by the General Services Crew.

Funding Sources

RSTP Fund 275

2. Construction	\$50,000	25/26
3. Construction	\$50,000	26/27
4. Construction	\$50,000	27/28
5. Construction	\$50,000	28/29

Total **\$295,000**

SB1 Paving Projects

CIP# 9997

Description

Paving and other maintenance improvements throughout the City as identified by staff on an annual basis.

Justification

The state of California passed SB1, the Road Maintenance and Rehabilitation Account in 2017, resulting in funds which are allocated to the City annually, to which projects are identified each year.

Studies and Reports

Pavement Condition Index document by Nichols Consulting Engineers.

Funding Sources

SB1 Fund 290

Prior Appropriations

Annual appropriations vary.

Comments

Locations will be identified as needed.

(General Services Superintendent)

Project Cost Estimate

2024 Dollars

1. Construction	\$500,000	24/25
2. Construction	\$275,000	25/26
3. Construction	\$275,000	26/27
4. Construction	\$275,000	27/28
5. Construction	\$275,000	28/29

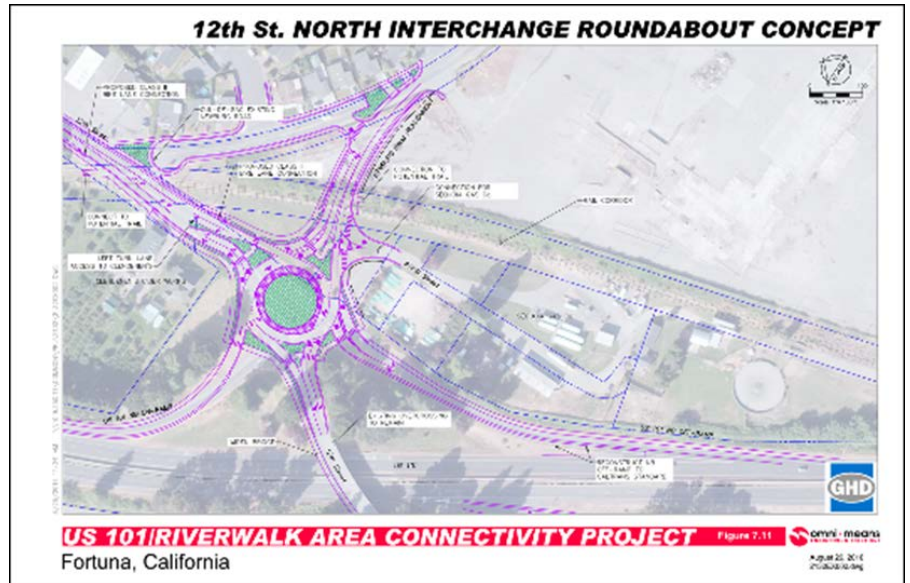

Total **\$1,600,000**

Description

This project is a complete look at the Interchange of 12th Street, Newburg Road and Highway 101 including vehicular, pedestrian and cycling users. The project would also investigate ways to expand non-motorized access on the Highway 101 overpass.

Justification

This project will improve the traffic flow and pedestrian & cycling safety at this interchange with Highway 101. The existing interchange has several geometric and safety deficiencies and is currently underperforming per the City’s General Plan LOS targets.

Comments

This project may be partially funded by a private donation.

(General Services Superintendent)

Project Cost Estimate

2024 Dollars

1. Construction	\$60,000	27/28
Total	\$60,000	

Description

This project is to design and complete a project to increase the level of service of this intersection, and to provide for increase non-motorized access across the intersection.

Justification

This intersection currently operates with a low level of services, and creates congestion issues along all legs of the intersection during peak times. Pedestrian crossing facilities across most legs of the intersection are unsafe. This project would complement the improvements proposed in CIP #9978.

Studies and Reports

Identified and recommended by the City Engineer. The City is in the process of performing a Project Study Report for the intersection to help guide and budget for a recommended improvement

Funding Sources

Future Funding TBD

Prior Appropriations

\$44,000 from Fund 140

Future Funding and Project Costs to be Determined

Description

Replacing the hardware in the traffic light cabinets for the Main Street, Newburg, and Redwood Way intersections. Upgrading the signal heads, pedestrian push buttons, and crosswalks on the Newburg Road intersection.

Justification

The signal heads on the Newburg intersection light are smaller than current standards. The control cabinets have outdated hardware and signal timing design needs to be revisited for current traffic conditions. The City’s 2021 Local Road Safety Plan recommended a number of improvements to the Newburg intersection including signal improvements and bike/pedestrian access improvements.

Parks and Recreation

Description

Readily available funds for acquiring additional park spaces for public use or for general park improvements.

Justification

Often the City has multiple general projects identified that might include land acquisition, assistance with engineering, drafting, conceptual design, grant writing, etc. in which funds may need to be readily available in order to pursue new opportunities in a timely fashion and in order to enhance and expand park spaces for public use.

Studies and Reports

Identified and recommended by the Parks Director.

Funding Sources

Prop 68 Rural Recreation and Tourism (RRT) or Regional Park Program (RPP) grants, Measure E Fund 101.

Prior Appropriations

N/A

Comments

No CIP specific funding for FY 2023/24. Any efforts on this project will be funded using the general park acquisition and improvement account, funded by Measure E.

River Lodge Exterior Staining Project

CIP# TBD

Description

The exterior stain on the River Lodge has become faded, so an application of staining is required to enhance the aesthetics of the facility.

Justification

This improvement project would enhance the River Lodge by creating a more desirable facility that would draw users wanting to host events, conferences, meetings, or banquets; resulting in higher revenues to the General Fund.

Studies and Reports

Identified and recommended by the Parks Director.

Funding Sources

1. Construction	\$35,000	24/25
Total	\$35,000	

Generators for Park 5, Firemen’s Pavilion and Museum Project CIP# TBD

Description

A generator that would have the ability to power the Firemen’s Pavilion, the Rohner Rec Hall, the Parks & Recreation Office, and the Depot Museum. All facilities are in-line and could be powered by one generator, in case of a power outage. Currently staff have identified a generator that is no longer in use in the City’s water system, and are planning to determine what steps are required to connect this generator at the parks facilities.

Justification

Currently, if a power-outage occurs, all electrical to these facilities ceases to be available. This makes it difficult for, not only City staff to be able to work efficiently on projects that require electricity, but for facility renters and park users who have access to these facilities, which can result in lost staff time, and lost revenue from facilities having to be closed due to no power.

Studies and Reports

Identified and recommended by the Parks Director.

Funding Sources

(Parks Director)

Project Cost Estimate

2024 Dollars

1. Construction	\$10,000	24/25
Total	\$10,000	

Description:

Readily available funds for developing an additional park space for public use and for general park improvements.

Justification:

The City purchased an adjacent 8.4-acre parcel to the southeast of the existing park in December of 2021 using combined City and RCRPD Prop 68 Per Capita funding.

There will be various, multi-phased projects to develop this site for recreational use, as funding opportunities become available. This may include assistance with engineering drafting, conceptual design, grant writing, land development, etc. in which funding may need to be readily available in order to pursue new opportunities in a timely fashion to expand this park space for public use, as the public has already identified desired park features (2019).

Studies and Reports

Identified and recommended by the City Manager and Parks & Recreation Director. Greenway Partners public outreach and conceptual design completed in 2019.

Funding Sources:

Measure E Fund 101, grants

Prior Appropriations

Prop 68 Per Capita land purchase; \$340,000
Greenway Partners; \$21,000

Vehicle Charging Station Project

CIP# TBD

Description

Installation of vehicle charging stations at several locations throughout Fortuna.

Justification

City of Fortuna currently has three charging stations located on 11th Street. This project would provide charging stations for citizens that purchase electric vehicles and wish to reduce their carbon footprint. Charging stations would be provided at the River Lodge Conference Center, N Street public parking lot, Rohner Park, the Corp Yard and Newburg Park.

2024 Dollars

1. Construction	\$150,000	25/26
2. Construcion	\$150,000	27/28
3. Construction	\$150,000	28/29
Total	\$450,000	

Description

The Monday club Chimney was damaged in the December 2022 earthquake. Immediately following the damage, staff worked with a local contractor to demolish sections of the chimney to make the building safe. The chimney now requires full demolition and reconstruction.

Justification

The Monday Club is an iconic piece of downtown infrastructure, and restoring its look is important. Additionally, the gas fireplace insert inside the building cannot be used until the chimney has been repaired.

Studies and Reports

N/A

Funding Sources

Staff anticipate that the City’s insurance policy/risk pool will cover the cost of demolition and reconstruction
