Power is sourced from an existing solar array and three 7kW Honda generators will be on-site for emergency backup purposes. A full processing facility is proposed with ADA bathroom and septic. A total of five employees are used for operations on-site. One residence will be used for on-site employee housing.

4. Peaksview, Inc. Special Permit Modification

Application Number: PLN-2020-16866-MOD01 (filed 04/13/2023)

Assessor's Parcel Number: 216-082-002-000 and 216-082-006-000

Harris Area

A Modification to the approved Special Permit (SP) PLN-2020-16866, to relocate the cultivation area on APN 216-082-002-0002 to an existing natural flat area. The approved SP and ZCC allows operation of up to 43,560 square feet of new mixed-light cannabis cultivation on two contiguous parcels (APN 216-082-002 and APN 216-082-006-200-000) with ancillary propagation facilities. Cultivation takes place in one cultivation area consisting of four mixed-light greenhouses. A 12,960-square-foot immature plant propagation area is adjacent to the greenhouses. The project further proposes relocation of the 9,600-square-foot wholesale nursery from APN 216-082-002-000 to APN 216-082-006-000 and repurposing the 4,440 square-foot immature plant propagation nursery and 8,640 square-foot mixed-light greenhouse on APN 216-082-002-000 for immature plant propagation or wholesale nursery activities. A 1-million-gallon rainwater catchment pond is located in the southeast corner of APN 216-082-006-000. Additional proposed water storage consists of ten (10) 5,000-gallon rainwater catchment storage tanks adjacent to the cultivation areas resulting in a total available water storage of 1.05 million gallons. Estimated annual water usage is approximately 600,000 gallons (13.9 gal/SF). Processing, including drying, curing and trimming, occurs onsite in an existing barn on APN 216-082-006-000. Post-processing activities would occur in a proposed 2,500 SF commercial building on APN 216-082-006-000. Up to 12 employees may be utilized during peak operations. PG&E improvements are proposed to move to grid power. The approved project included a Special Permit for development within the SMA for the use of 8,640 square-foot mixed-light greenhouse on APN 216-082-002-000.

Continue the project to the July 6, 2023 Planning Commission meeting.

7. Knappek Zone Reclassification

Assessor Parcel Numbers (APN) 107-091-007 and 107-096-002

Record No.: PLN-2022-17796

Honeydew Area

A Zone Reclassification to rezone approximately 75 acres on two properties from Agriculture Exclusive with a 160 acre minimum parcel size (AE-B-5(160)) into Timberland Production Zone (TPZ). The parcels have a total acreage of 115 acres (Parcel 107-091-007 is 75 acres and Parcel 107-096-002 is 40 acres). Presently 35 acres of Assessor's Parcel Number (APN) 107-091-007 is zoned AE-B-5(160) and all of APN 107-096-002 is zoned AE-B-5(160). After the proposed zone reclassification both properties will be fully rezoned TPZ. The rezone is in the public interest and is consistent with General Plan policies. The rezone conforms with the zoning to the existing and intended future land use of timber production. The rezone is consistent with the required findings for the zone reclassification, as well as the findings required under Section 312-50.8, Supplemental Timberland Production Zoning Procedures, and is consistent with the Forest Taxation Reform Act of 1976. The Forestry Review Committee reviewed the project at their meeting on February 8, 2023 and approved the Timber Management Plan by a vote of 4-0. The Timber Management Plan documents how timber operations can be coordinated on the two properties. The Humboldt County Planning staff believes that the project, as conditioned, has no potential for causing a significant effect on the environment. The project can be found statutorily exempt from CEQA pursuant to Section 15264.

Recommend the Board of Supervisors approve the Zone Reclassification.

A Coastal Development Permit and Conditional Use Permit including a General Plan Conformance Review for Orick Community Services District to replace an existing 100,000-gallon redwood water tank with a new 100,000-gallon, glass-fused, bolted steel tank with a concrete foundation. The existing redwood water tank is leaking and not designed to withstand a seismic event. The existing tank will be demolished and removed. The new tank will be constructed approximately 15 feet northeast of the original tank footprint and include the replacement of water and electrical lines. A new supervisory control and data acquisition (SCADA) system will be installed on the tank. An overflow outlet is proposed that will require riprap to be installed that will extend approximately six feet onto APN 520-171-005 within an existing drainage easement.
