Quoted Model: New Hyster H60XT Available Features

Hyster® H60XT pneumatic tire lift truck.
 Nominal 6,000 lb capacity at a 24" load center.

The XT series truck represents the Hyster commitment to quality and dependability by incorporating proven designs and systems to ensure productive, efficient operation to satisfy the demands in nearly any application for many years. Stay ahead of your competition with customization that costs you less. With the economical Hyster® XT truck, you'll get access to the same Hyster® Variable Power Technology™ that's in our premium Fortis® series. With this capability, you can customize your performance and fuel efficiency based on your needs. You will be able to run in fuel-efficient mode when production is less demanding, yet switch to a higher performance mode when deadlines are looming. Invest in durable products that reduce downtime. Hyster has engineered a patented stability system that every operator can appreciate. You'll find the Hyster Stability System (HSS®) easier to maintain due to fewer grease points and longer service intervals than the competition. The VISTA™PLUS mast was designed to maximize visibility for the operator and built strong to have better capacity at higher levels. Leak-free O-ring face seal (ORFS) fittings are used throughout the XT truck series to provide long term reliability and resistance to leaks. Fewer complicated parts means less risk of failure, enhancing uptime for your operation. Everything about the Hyster® XT is tough. Except servicing it. You won't realize the full benefits of the Hyster® XT lift truck until after your first service event experience. That's when its "cowl-to-counterweight" access and one-piece floorplate reveal other engineering advantages designed to keep your truck, and your operation, running smoothly. Configured so you don't have to remove the LP tank to open the hood, the Hyster® XT series is clearly easier for you to service.

Proposal Summary

Included Items	Description	Quantity
