 2.1. Method of Assessment 2

 2.2. Collection of Fees and Charges 2

3. List of Charges..... 3

1. EXECUTIVE SUMMARY

In 1993, the City of Arcata implemented its Stormwater Management Program in order to comply with Federal and State mandated requirements relating to the control of stormwater pollutants as well as the operation, maintenance, improvement, and replacement of the existing City stormwater/flood control facilities. The City's Stormwater Drainage Maintenance Fee is assessed to all property owners to pay for the operation, maintenance, improvement, and replacement of City stormwater drainage facilities, to reduce stormwater pollution, to collect and convey runoff, and to protect public health and safety.

Section 5470, et seq. of the California Health and Safety Code authorizes cities to enact an ordinance, approved by a two-thirds vote of the members of the legislative body, establishing fees and charges for services and facilities furnished by the City in connection with its storm drain system. The proceeds of these fees and charges may be used only for the acquisition, construction, reconstruction, maintenance, and operation of its storm drain facilities, including the repayment of principal and interest on bonds issued to finance the construction or reconstruction of such facilities.

The authorized, not to exceed, amounts and rates for storm drain fees and charges are as follows:

Parcel Classification	Rate
Single Family Residential	\$27.98 per unit
Non-Single Family Residential	\$ 0.011112 per square foot of impervious surface
Property Tax Exempt	Varies by property type

The following table summarizes the annual levy by Classification of parcel:

Parcel Classification	Number of Parcels	Levy Total
Single Family Residential	3,761	\$105,232.78
Non-Single Family Residential	636	\$125,079.83
Property Tax Exempt	55	\$ 44,519.91
Total	4452	\$274,832.52

2. ASSESSMENTS

2.1. Method of Assessment

The number of Stormwater Drainage Maintenance Fee was determined for each parcel based upon an estimate of the impervious surface associated with the use of the property.

- 1) Single Family (detached) Residential ("SFR") parcels were assumed to have an average of 2,500 sq. ft. of impervious surface.
- 2) Non-Single Family Residential are assessed on the basis of total impervious surface area at a rate of \$0.011112 per square foot.
- 3) Property Tax Exempt parcels are assessed using either of the above two methods, depending upon the underlying property type.

2.2. Collection of Fees and Charges

The storm drain fees and charges may be collected on the tax roll in the same manner, by the same persons, and at the same time as, together with and not separately from, the City's general taxes.

The City Council will have prepared each year, prior to the commencement of the fiscal year, a written report which will be filed with the City. The report is to contain a description of each parcel of real property receiving storm drain services and the amount of the annual fee and charge for each parcel. This charge will be computed in conformity with the fees and charges prescribed in the report.
