

**AGENDA SUMMARY
EUREKA CITY COUNCIL**

TITLE: Annual Water Supply and Assessment

DEPARTMENT: Public Works

PREPARED BY: Brian Issa

PRESENTED FOR: Action Information only Discussion

RECOMMENDATION

Information only, no action needed

FISCAL IMPACT

No Fiscal Impact Included in Budget Additional Appropriation

COUNCIL GOALS/STRATEGIC VISION

DISCUSSION

Completion of an annual water supply and demand assessment is required by state law. Because the City's water supply is entirely dependent on Humboldt Bay Municipal Water Authority, our analysis relies almost entirely on their reporting. Our report is attached for review as it is required to be presented to Council though no formal adoption of other action is required.

The City's water supply outlook continues to be both extremely positive and somewhat of an anomaly in the state due to hydrologic conditions specific to the Mad River watershed. Citywide water use continues to decline year-to-year, due both to the implementation of smart metering and an increase in the general level of consciousness around water conservation.

The draft annual report is attached for your review.
