RE: Phase I Environmental Site Assessment
CA Highway 36
Hydesville, California 95547
Hillmann Project No: C3-8983

Dear Mr. Albert:

Hillmann Consulting LLC has completed a Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in conformance with our contract agreement and the scope and limitations of ASTM Practice E1527-21, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 714-634-9500.

Sincerely,

Hillmann Consulting, LLC

Stephen Bartlett
Senior Project Manager

David Rutherford
Quality Management Director

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DEC	– Department of Environmental Conservation
DEP	– Department of Environmental Protection
DHS	– Department of Health Services
DNPL	– Delisted National Priority List
DOB	– Department of Buildings
DOH	– Department of Health
DOT	– Department of Transportation
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
EPA	– Environmental Protection Agency
ERNS	– Emergency Response Notification System
FD	– Fire Department
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LCP	– Lead-Containing Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
OER	– Office of Environmental Remediation
OPRA	– Open Public Records Act
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of CA Highway 36, Hydesville, California (the Subject Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E1527-21 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:	CA Highway 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/Agricultural land				
Approx. Property Area:	78.89 acres				
Buildings:	One barn				
Approx. Building Size:	2,800 ft ²				
Approx. Year Built:	1940s				
Commercial Occupants:	None				
Current Use:	Agricultural				
Inspected By:	Dan Louks				
Site Contact/Company:	Mr. Rafik Albert / EPD Solutions, Inc.				
Site Escort/Company:	Unescorted				
Inspection Date:	March 29, 2022				
Weather Conditions:	Cloudy, 60 degrees F

1.3 Findings, Opinions and Conclusions

Recognized Environmental Conditions & Significant Data Gaps

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E1527-21 of the Subject Property as described in Section 2.2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed the following *recognized environmental conditions* (RECs), *controlled recognized environmental conditions* (CRECs) and/or *significant data gaps* (SDGs) in connection with the Subject Property:

RECOGNIZED ENVIRONMENTAL CONDITIONS
No RECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS (CRECs)
No CRECs were identified.
SIGNIFICANT DATA GAPS (SDGs)
No SDGs were identified.

Historical Recognized Environmental Conditions (HRECs)

This assessment has revealed the following *historical recognized environmental conditions* (HRECs) in connection with the Subject Property:

HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS

No HRECs were identified

De Minimis and Other Environmental Conditions

The following *de minimis* and other environmental conditions were identified:

OTHER ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS

The Property has been utilized for agricultural fields as early as 1941. This use suggests the historical application of pesticides over an extended period of time, and the associated potential for accumulation of residual pesticide compounds in shallow soils. However, testing of shallow soils for pesticides compounds was conducted by Hillmann in 2021 as documented in a prior Phase I ESA report dated February 8, 2021. The testing included the collection of sixty (60) discrete soil samples from depths of 0.5 and 2.0 feet which were composited into fifteen (15) composite soil samples and submitted for metals and pesticide compounds. The analytical results indicated low concentrations of heavy metals below applicable residential screening levels. No OCP compounds were detected above method detection limits. A copy of the 2021 Phase I ESA report with soil testing is attached in Appendix C. Based on the results of the 2021 soil testing, the historic agricultural use of the Property is considered to be a REC in connection with the Property.

Although not directly observed during site reconnaissance, based on the historic residential use and agricultural use, Hillmann suspects the possible presence that a septic system serviced the former residence on the Property. Hillmann recommends proper closure and removal of this prior to redevelopment.

Hillmann observed a sprinkler and water pump on the Property.

The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however, there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.

A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation of Humboldt County Codes. Records for the west adjoining property at 1576 Highway 36 (Steve Wills Trucking and Logging) were received. A letter dated January 6, 2004, indicated DEH observed three (3) 55-gallon drums of diesel stored on the front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations. The violations were closed on April 6, 2007.

The adjoining property at 1576 CA-36 (Steve Wills Trucking and Logging) was listed under CERS ID 10020253. This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to the southwest. However, per Humboldt County records, it appears that business operations occur on APN 204-171-003, and not on any of the Property parcels (204-081-002, -004, -007). A letter dated January 6, 2004, indicated DEH observed three (3) 55-gallon drums of diesel on the front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations.

The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) was formerly occupied by Eel River Lumber Products saw mill in the early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of a 10,000-gallon diesel above ground storage tank, a 550-gallon gasoline above ground storage tank, a 200-gallon kerosene above ground storage tank, a 500-gallon waste oil drum, a 55-gallon drum of absorbent, and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of a Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four borings to test TPH-g, TPH-d, metals, and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on the results from the Limited Phase II Subsurface Investigation conducted by Hillmann Consulting in September of 2021, none of the soil gas samples had detectable concentrations of VOC. At the client's request, Hillmann conducted additional groundwater analyses on March 29, 2022, two groundwater samples were collected from borings installed on the western edge of the Property adjoining to the lumber mill at approximately 25-30 feet below ground surface and were analyzed for TPHcc and VOCs. Results indicated no detectable levels of TPHcc or VOCs in groundwater sampled. The complete report is available in [Appendix C](#).

The adjoining 1576 CA-36 site was also listed on the CUPA and WDS databases. The CUPA listing identifies Facility ID # FA0003173 with a current status listed as "01 – Active," a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.

Reynolds RV Repair at 988 Highway 36 is listed under CPS-SLIC, CUPA and CERS database. The site is located approximately 2,571 feet west-northwest of the Property. The CPS-SLIC listing indicates the site as an open SLIC case undergoing site assessment dated 12/29/2016. Based on the distance and groundwater gradient this listing is not considered to be a REC to the Property.

Environmental Professional Statement

I/We declare that, to the best of my professional knowledge and belief, I/we meet the definition of *Environmental professional* as defined in § 312.10 of 40 C.F.R. 312. I/we have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the *subject property*. I/We have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 C.F.R. Part 312.

David Rutherford
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as “Non-ASTM Scope concerns”, in accordance with the contracted scope of work scope for this assessment. BER is defined by ASTM E1527-21 as “a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.” The following is a summary of findings for the limited review of potential BERs, where applicable, as per the contracted scope of work and limitations outlined in Section 2. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
Subject	Findings	Not Appl.	Rpt. Ref.
Asbestos		X	7.1
Lead Paint		X	7.2
Radon	Property is located in the USEPA radon designation Zone 3 or 'low risk' area for radon.		7.3
Mold / Microbial Damage		X	7.4
NWI Wetlands	A streamside Management Area – Wolverton Gulch is depicted along the eastern edge of the Property.		7.5
Lead in Drinking Water	No potable water service at the Property is provided at the Property.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E1527-21. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. § 9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The goal of the processes established by ASTM E1527-21 is to identify *recognized environmental conditions* in connection with the Subject Property.

The term *recognized environmental condition* (REC) is defined by ASTM E1527-21 as “(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment.”

The term *controlled recognized environmental condition* is a type of recognized environmental condition and defined by ASTM E1527-21 as a “*recognized environmental condition affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls (for example, activity and use limitations or other property use limitations).*”

The term *historical recognized environmental condition* is defined as a “*previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established by the applicable regulatory authority or authorities without subjecting the subject property to any controls (for example, activity and use limitations or other property use limitations).*” The ASTM E1527-21 standard has clarified that a *historical recognized environmental condition* (HREC) is not a *recognized environmental condition* (REC).

The term *de minimis condition* is defined by the ASTM, “*...a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.*” A condition determined to be a *de minimis condition* is not REC nor a CREC.

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Subject Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.
- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Subject Property.
- A review of standard physical record sources for available topographic, geologic and groundwater data.
- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Subject Property from the present, back to the Subject Property's first developed use, or back to 1940, whichever is earlier.
- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Subject Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-21 standard:

Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Subject Property. If the Subject Property contains buildings built in 1990 or later, the contracted scope of work excludes a cursory non-intrusive visual screening or any other level of evaluation for suspect ACM; however, the exclusion for buildings built ≥ 1990 should not be interpreted to suggest that any such buildings are free of ACM or would not warrant evaluation of building materials for ACM prior to disturbance. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if a greater certainty is desired regarding ACM and potential asbestos hazards at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Subject Property. If the Property contains buildings built in 1980 or later, the contracted scope of work excludes any cursory non-intrusive visual screening or other level of evaluation for suspect LPB;

however, the scope of work exclusion for building built ≥ 1980 should not be interpreted to suggest that any such buildings are free of LPB or other lead hazards. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Subject Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Subject Property.

Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Subject Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Subject Property.

NWI Wetlands: The Property has been reviewed for jurisdictional wetlands using the National Wetlands Inventory Wetland Mapper (<http://wetlandsfws.er.usgs.gov/NWI/download.html>) to determine whether mapped federal wetlands have been indicated on the Subject Property. Any further evaluation or legal delineation of regulated wetlands areas is excluded from the scope of work.

It is also emphasized that a field delineation of regulated wetlands by a qualified professional would be warranted to more fully determine the presence or absence of regulated wetlands at the Subject Property.

Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	CA Highway 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Approx. Land Area:	78.89 acres				
Apprx. Latitude/Longitude:	North 40.545510 degrees/West 124.1156560 degrees				
Additional Details (if appl.):	Property consists of four adjoining parcels with the perimeters being fenced off on all sides.				
Property Owner:	Nyberg Philip J and Melinda J TR				

Zoning Designation:	Rural/Agricultural land
----------------------------	-------------------------

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Subject Property was not documented. Record gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 ESA Report Component Dates/Viability

The ASTM E1527-21 standard states that an environmental site assessment (ESA) is presumed to be viable when it is conducted within 180 days prior to the date of acquisition of the subject property (or, for transactions not involving an acquisition such as a lease or refinance, the date of the intended transaction). Specifically, all of the following components must be conducted or updated within 180 days prior to the date of acquisition or prior to the date of the transaction. The following table summarized the component completion dates:

ESA Component	Completion Date
Interviews	March 29, 2022
Env Lien Search	(excluded from scope)
Government Records Review	March 28, 2022
Visual Inspections	March 29, 2022
Env. Professional Declaration	April 5, 2022

2.5 User Reliance

This report is for the exclusive use of EPD Solutions, Inc. and additional relying entities, if any, named on the front cover. No additional individuals or entities shall be permitted to rely upon any data, interpretation, reports or other information or documentation contained in this report, without first obtaining the consent of EPD Solutions, Inc.; and without obtaining written consent from Hillmann in the form of a reliance agreement/letter.

Hillmann may, in its sole discretion, withhold its consent to additional reliance and/or Hillmann may condition consent for reliance upon payment of a fee or other conditions, but in any event, any individual or entity seeking the right to rely must agree to be bound by the provisions of a contract agreement with Hillmann.

2.6 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Subject Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Subject Property owners/occupants and/or site escort at the time of the site visit.
- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Subject Property and immediate surrounding area.

2.7 General Limitations and Exceptions

Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, would be further specified in Section 4.1.

Significant limitations related to the condition or accessibility of the Subject Property at the time of the site reconnaissance, if encountered, are reported in Section 6.1.

Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E1527-21 are reported.

Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Subject Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a

construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Subject Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Subject Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Subject Property contact(s) or as shown on any documents reviewed or received from the Subject Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-21 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and

that the User should consider whether recommendations for additional inquiries or other services are desired.

Recommended response actions offered in Section 1.3, if any, are provided as an option to the Client, and may have taken into account the Client's relation to the Subject Property and/or their intended purpose of this assessment. If included, it is not intended by Hillmann to represent the only course(s) of action, or inaction, to take. Furthermore, it is emphasized that additional response actions may become advisable depending on the outcome of the initial action(s) taken. Hillmann advises that Client and any additional authorized relying parties as specified on the report Cover and Section 2.5, or via letter of reliance extension, undertake consultation with legal counsel familiar with environmental and real estate law would be beneficial to the decision making process for the type and timing of a response action to identified RECs or Business Environmental Risks, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User(s) of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

The User(s) assumes responsibility for business decisions that it makes utilizing information in the report provided by Hillmann. Hillmann shall not be responsible for any conclusions, interpretations and/or decisions of the User(s).

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term “User” is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Subject Property; specifically, the entity or entities named on the front cover to which the report has been addressed.

3.1 Environmental Lien and Activity and Use Limitation (AUL) Search

The User did not provide Hillmann with the results of an environmental lien and AUL search for the subject property. No environmental liens or AULs were indicated by the search.

3.2 Prior Environmental Reports/Documentation

The following prior environmental reports/documentation was provided:

[Limited Phase II Subsurface Investigation Report, 20-034 North Coast Highway Solar, Highway-36, Hydesville, CA 10065](#); prepared by Hillmann Consulting and dated April 5, 2022. The report concluded the following:

“The subject site is active agricultural land that is being considered for a solar farm development. Previous testing of the soil for OCP and heavy metals indicated no significant or actionable concentrations that might impact the development. However, the site lies in close proximity to a site with a known UST case, which could potentially contaminate the Subject Property. Accordingly, a subsurface investigation was conducted to gauge possible impacts from off-site contaminant sources.

In September 2021, Hillmann conducted an independent subsurface investigation at the site that included installation of three soil gas probes to gauge possible subsurface contamination in targeted areas of the site near the former UST case. Results indicated none of the soil gas samples had detectable concentrations of VOC. As requested, Hillmann returned to the site in March 2022 and installed two borings drilled into groundwater for sampling. Results from laboratory analysis indicated neither groundwater sample had detectable concentrations of petroleum hydrocarbons or VOC. Based on these results, we recommend no further sampling at the site.”

[Limited Phase II Subsurface Investigation Report, 20-034 North Coast Highway Solar, Highway-36, Hydesville, CA 10065](#); prepared by Hillmann Consulting and dated September 17, 2021. The report concluded the following:

“The subject site is active agricultural land that is being considered for a solar farm development. Previous testing of the soil for OCP and heavy metals indicated no significant or actionable concentrations that might impact the development. However, the site lies in close proximity to a site with a known UST case, which could potentially contaminate the Subject Property. Accordingly, a subsurface investigation was conducted to gauge possible impacts from off-site contaminant sources.

In September 2021, Hillmann conducted an independent subsurface investigation at the site that included installation of three soil gas probes to gauge possible subsurface contamination in targeted

areas of the site near the former UST case. Results indicated none of the soil gas samples had detectable concentrations of VOC. Based on these results, we recommend no further sampling at the site.”

[Phase I Environmental Site Assessment, 20-034 North Coast Highway Solar, 204-081-002, -004,-007 and 204-171-047, CA Highway-36, Hydesville, CA 10065; prepared by Hillmann Consulting, Revised: April 30, 2020.](#) The report concluded the following regarding RECs:

“Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property, except for the following:

Recognized Environmental Conditions (RECs):

- *The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.*
- *The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be vapor risk and REC to the Property.*

Historical Recognized Environmental Conditions (HRECs):

- *No HRECs were identified.*

Controlled Recognized Environmental Conditions (CRECs):

- *No CRECs were identified.*

Hillmann recommends to perform a limited Phase II investigation for pesticides only. However, if the Property is ever redeveloped for uses other than a solar farm, a limited Phase II should be conducted to determine whether the Property has been impacted by the west-northwest adjoining site.”

[Phase I Environmental Site Assessment, 20-034 North Coast Highway Solar, 204-081-002, -004,-007 and 204-171-047, CA Highway-36, Hydesville, CA 10065; prepared by Hillmann Consulting, dated February 8, 2021.](#) The report concluded the following regarding RECs:

“Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property, except for the following:

Recognized Environmental Conditions (RECs):

- *The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be vapor risk and REC to the Property.*

Historical Recognized Environmental Conditions (HRECs):

- *No HRECs were identified.*

Controlled Recognized Environmental Conditions (CRECs):

- *No CRECs were identified.*

Hillmann recommends to perform a limited Phase II investigation, if the Property is ever redeveloped for uses other than a solar farm, to determine whether the Property has been impacted by the west-northwest adjoining site.”

3.3 User Responsibilities

Section 6 of the ASTM E1527-21 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-21 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	NR	<i>No Response</i>
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	NR	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	NR	
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	NR	
Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the		

Question:	Yes/No:	Detail:
environmental professional to identify conditions indicative of releases or threatened releases? For example,		
-Do you know the past uses of the property?	NR	
-Do you know of specific chemicals that are present or were once present at the property?	NR	
-Do you know of spills or other chemical releases that have taken place at the property?	NR	
-Do you know of any environmental cleanups that have taken place at the property?	NR	
The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?	NR	
Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.	NR	

NR-no response

3.4 User's Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-13, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Environmental Information

Physical Setting

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 112 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the south-southwest. The closest down gradient water body is Wolverton Gulch, located approximately 1,100 feet to the west-southwest.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Property is classified as "Ferndale." This soil type is described as silt loam surface texture with soils moderately fine or fine textures with a slow infiltration rate.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Quaternary System, and Quaternary Series.
Prior Env. Reports: (Section 3.2)	No additional relevant site specific geologic data was noted from a review of the prior environmental reports listed in Section 3.1.
Additional Sources/Data:	No additional physical setting sources or data was obtained.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the south-southwest.

Federal, State and Tribal Environmental Record Sources

Standard government records were obtained and reviewed primarily via a third-party regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT. The report provided government records from the standard environmental resources and within minimum search distances specified by Section 8.2.2-Table 2 of the ASTM E1527-21; and were reviewed for the purpose of identifying potential RECs in connection with the Subject Property. Additional detail of the source and significance of the regulatory databases can be found in the regulatory database report in Appendix E. Hillmann has also included discussion of records pertaining to the Subject Property from other government record sources not specifically listed under Table 2, as applicable.

Reported distances for adjoining property listings, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM "Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions" (ASTM E 2600-15); and also on elements of "Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources" (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to

non-petroleum product releases within 1,760 feet of the Subject Property in the up-gradient direction, 365 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Subject Property in the up-gradient direction, 165 feet of the Subject Property in the cross gradient direction and 100 feet of the Subject Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Subject Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Subject Property, if any, are identified and discussed in this section.

The EDR Radius Map report is attached in Appendix E.

Property Listings

The following listings of the Subject Property were identified:

Name/Address:	None
Database(s):	
Data Discussion:	
REC Discussion:	
VEC Discussion:	

Adjoining Property Listings

The following adjoining property listings were identified.

Name/Address:	Eel River Lumber Pro. Mill C /1576 Highway 36				
Database(s):	CUPA, WDS				
Distance in feet:	0	Direction:	NW	Gradient:	Up/Cross
Data Discussion:	<p>This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) the site was formerly occupied by Eel River Lumber Products saw mill in the early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of a 10,000-gallon diesel above ground storage tank, a 550-gallon gasoline above ground storage tank, a 200-gallon kerosene above ground storage tank, a 500-gallon waste oil drum, a 55-gallon drum of absorbent, and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of a Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four (4) borings to test TPH-g, TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on the results from the Limited Phase II Subsurface Investigation conducted by Hillmann Consulting in September of 2021, none of the soil gas samples had detectable concentrations of VOC.</p> <p>The CUPA listing identifies Facility ID # FA0003173 with a current status listed as “01 – Active,” a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.</p>				

REC Discussion:	Based on the details provided above, a REC is not suspected in connection with the Property.
VEC Discussion:	Based on the available data, a VEC is not suspected.

Surrounding Area Findings

The following is a discussion of non-adjointing sites identified as located within the ASTM specified search distance surrounding the Subject Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Subject Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Subject Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status.

UNMAPPED/ORPHAN LIST SITES

Notable Listings:	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below: None
--------------------------	--

Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Subject Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Subject Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
EPA MyProperty	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
Humboldt County Department of Environmental Health Division	FOI request	A response was received providing the following pertinent records: Records for the west adjoining property at 1576 Highway 36 (Steve Wills Trucking and Logging) were received. A letter dated January 6, 2004 indicated DEH observed three (3) 55-gallon drums of diesel stored on the front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations.
Department of Toxic Substances Control (DTSC)	FOI request	No response was received prior to report issuance.
Regional Water Quality Control Board (RWQCB)	FOI request	No response was received prior to report issuance.
County Air Pollution Control District (APCD)	FOI request	No response was received prior to report issuance.
CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.

Source	Type of Request	Outcome
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Online search	Hillmann reviewed available on-line records pertaining to the Property. No information indicative of a REC was identified.
www.realquest.com https://webgis.co.humboldt.ca.us/HCEGIS2.0/	Online search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report.

Pertinent records referenced in the above table have been included in Appendix F.

4.2 Historical Research

Historical records have been compiled and analyzed for historical property information and developing a history of previous uses of the subject property, adjoining properties and surrounding area. These records were reviewed for the purpose of identifying the likelihood of past uses having led to RECs in connection with the subject property.

The historical record sources listed below have been sought with the objective to document past uses of the subject property from the present back to the subject property’s first developed use, or back to 1940, whichever is earlier. The term “developed use” includes agricultural use, placement of fill dirt and other uses that do not involve structures. Hillmann has sought to review historical records in minimum intervals of five years.

Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Subject Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
(No Coverage)	Property:		
	Adjoining:		

A copy of the Certified Sanborn Map Report is attached in Appendix D.

City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Subject Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Subject Property.

Property	
Use(s) / Occupant(s):	Years
None identified	

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	Years
Mix of residential and commercial occupants	1992 - 1998
Trucking & Logging	2010 - 2017

A copy of the EDR City Directory report is attached in Appendix D.

Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix D) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Summary	
1944	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	No improvements are depicted.
1959, 1972	Property:	Unmapped.
	Adjoining:	Unmapped.
1979	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	Burners, commercial structures, and Rohnerville Airport are depicted to the northwest and west-northwest.
2012, 2015, 2018	Property:	No improvements are depicted.
	Adjoining:	Rohnerville Airport is depicted to the north-northwest.

If obtained, copies of historical topographic maps have been included in Appendix D.

Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix D, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary of Interpretation	
1941	Property:	Agricultural use and a barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east.
	Adjoining:	Agricultural use
1954, 1968, 1972	Property:	Agricultural use and a barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east.
	Adjoining:	Agricultural use, commercial structures, and vacant land
1983, 1989, 1998, 2005, 2009, 2012, 2016	Property:	Agricultural use and a barn like structure are depicted at the northern portion. Railroad track to the north and a streambed is depicted to the east.
	Adjoining:	Residential and commercial trucking is evident to the northwest.

If obtained, copies of historical aerial photographs have been included in Appendix D.

EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.1 and attached in Appendix E, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Subject Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	None
Historic Auto: (on-site/adjoining only)	None	None
MGP: (1-mile distance)	None	None

Petroleum/Natural Gas Well Review

The historical record sources and the California Geologic Energy Management Division (CalGEM) online mapping application were reviewed for records of historic petroleum and/or natural gas wells at the Subject Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.2)	Prior environmental reports reviewed as part of this assessment, as detailed in Section 3.1, did not provide additional pertinent detail of historical site usage.

Site Observations:	Indications of historic uses of the Property or adjoining properties were not observed during the site reconnaissance.
Other Sources:	No additional pertinent historical data was obtained.

Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Subject Property:

Property	
Date Range	Use
1941 to 2012	Agricultural use
2012 to 2016	Vacant land

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	Use
1941	Agricultural use
1954 to Present	Undeveloped land, agricultural use, and trucking yard
1998 to Present	Airport, commercial, light industrial, and undeveloped

Historical Records Data Failure

The ASTM E1527-21 standard defines data failure as failure to achieve the historical research objective even after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions were sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval. In encountered, data failure and its significance as a data gap is discussed below:

Objective	Met?	Detail	Significant?
First developed use/date determined?	No	The earliest documented use of the Property was agricultural uses in 1941.	No
Record sources at 5-year intervals back to 1940 or first developed use?	No	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Summary of Identified Past Uses of this section.	NA

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

Historic Uses REC Discussion

The review of historical records did not indicate evidence of a REC in connection with the Property.

The Property was utilized for agricultural fields since as early as 1941. This use suggests the historical application of pesticides over an extended period of time, and the associated potential for accumulation of residual pesticide compounds in shallow soils. Testing of shallow soils for pesticides compounds was conducted by Hillmann in 2021 as documented in a prior Phase I ESA report dated February 8, 2021. The testing included the collection of sixty (60) discrete soil samples from depths of 0.5 and 2.0 feet which were composited into fifteen (15) composite soil samples. The samples were submitted to A&R Laboratories in Ontario, California for laboratory analysis of organo-chlorine pesticides (OCP) by EPA Method 8081A, analysis of Title 22 Metals by EPA Method 6010B as recommended by DTSC guidance. The results indicated no detectable levels of OCPs, as well as, no elevated levels of heavy metals. Based on the soil testing results, the historic usage of the Property as agricultural land is not considered to be a REC in connection with the Property.

5.0 INTERVIEWS

5.1 Interviews with Owners, Operators and Occupants

Current Owner

Property Owner	Contact Name	Affiliation	Interview Type
Nyberg Philip J and Melinda J TR	Nyberg Philip J and Melinda J TR	Owner	Email/questionnaire

Interview Outcome/Findings:			
The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.			

5.2 Interviews with State and/or Local Government Officials

State and/or local governmental officials have been interviewed to obtain information of potential RECs in connection with the subject property. Many government agencies and their officials require submittal of written request for records in order to respond. The details in Section 4.1 list the various state and local government agencies contacted as part of this assessment, and the outcome of each inquiry. In addition, the details of regulatory database research in Section 4.1 may have included detail of interviews with officials pertinent to government records review and identification of RECs.

Additional interview of government officials not previously detailed in Sections 4.1 are discussed below, if applicable.

Name	Agency Name/Title	Interview Type
NA		
Interview Outcome/Findings:		
No additional local/state government officials were interviewed.		

6.0 SITE RECONNAISSANCE

6.1 Methodology and Limiting Conditions

A site reconnaissance was conducted to collect information and make observations to help identify RECs in connection with the subject property. This included visual and/or physical observations of the subject property and its structures, adjoining properties as viewed from the Subject Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares and accessed subject property structures. Subject property building exteriors were observed at ground level, unless otherwise indicated. Where applicable, building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Dan Lauks
Property Escort/Company:	Unescorted
Inspection Date:	March 29, 2022
Weather Conditions:	Cloudy, 60 degrees F

Significant Inaccessible Areas

No significant areas of the Property inaccessible at the time of the inspection were noted.

Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

6.2 General Site Setting

Site and Vicinity Characteristics

Abutting Roadways:	State Highway 36 to the north; River Bar Road to the east
Current Property Use:	The site is currently vacant land with a barn structure used for storage of bales. The barn is located on the northeast parcel 204-171-047; no structures are present on the remaining parcels.
Evidence of Past Property Uses:	None observed
Evidence of Past Adjoining Property Uses:	None observed
Surrounding Area Uses:	Commercial, residential and undeveloped land

Current Adjoining Property Uses

Dir	Street Address	Description
N	2031 Street Hwy 36	Residential
NE	River Bar Road	Undeveloped and Wolverton Gulch
E	1576 Street Hwy 36	Commercial truck storage yard
S	River Bar Road	Undeveloped land and residential

No visual observations indicative of a potential environmental concern were noted on the adjoining properties.

Topographic Characteristics

Terrain:	Flat to gently sloping, 10–15-foot cliff from the south to the north on the east side of the Property
Direction of Downward Slope:	Towards the south-southwest
On-site Water Bodies:	None observed
Other Significant Features:	None observed

General Description of Structures and Improvements

Buildings:	One barn
Approx. Building Size:	2,800 ft ²
Approx. Year Built:	1940s
Number of Stories:	One
Basement/Subgrade Levels:	NA
Exterior Ground Cover:	Grass/wild flowers
Ancillary Structures:	NA
Sources of Heating & Cooling:	No heating or cooling systems were present at the Subject Property.
Potable Water/Sewage Disposal:	No potable water or sewer services were present at the Subject Property.

6.3 Site Features and Conditions

Storage/Usage of Hazardous Substances and Petroleum Products

The following approximate number of containers, and general description of their contents, capacity, container types and storage conditions, were observed to be stored and/or used at the subject property:

Occupant	Substance	Qty/Container Type	Storage Conditions
NA	No significant storage or use noted		

Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/U ST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
(None)						

Strong, Pungent or Noxious Odors and their Sources

The following strong, pungent or noxious odors were noted at the Subject Property:

Standing Surface Water/Pools & Sumps

No standing water, pools or sumps containing liquids likely to be hazardous substances or petroleum products were noted.

Drums, Totes and Intermediate Bulk Containers

No hazardous substance or petroleum product drums were noted.

Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted.

PCBs in Oil Filled Electrical/Hydraulic Equipment

A pole mounted transformer was observed at the southeast side of the Property. There were no leaks observed around the transformer.

It is noted that identification of PCB containing fluorescent light ballasts, caulk, paint, or other materials located inside and are part of the building or structure is outside of the scope of the ASTM E1527-21 standard and this assessment.

Stains or Corrosion on Floors, Walls or Ceilings

No stains or corrosion of floors, walls or ceilings, excluding any staining from water, were noted.

Drains and Sumps

No floor drains or sumps were noted at the Subject Property.

Pits/Ponds/Lagoons

No pits, ponds or lagoons were identified in connection with waste treatment or disposal.

Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed.

On-Site Solid Waste Disposal/Fill Material

No evidence of on-site disposal of trash, construction debris, demolition debris or other solid waste was observed.

Waste Water

No sanitary sewer discharges were identified at the Subject Property.

Storm water runoff at the Subject Property is discharged off-site to local streams/drainage systems via overland flow.

No additional waste water discharges were identified at the Subject Property.

Septic Systems/Cesspools

No septic systems or cesspools were identified at the Subject Property. Based on the history of site development, the prior use of a septic system for sanitary sewer disposal cannot be ruled out. However, given the lack of identified prior industrial or other high risk site uses, septic systems formerly used at the Property would not be considered to be a REC in connection with the Property.

Wells

Hillmann observed a water well used for irrigation on the Property.

Railroad Spurs

The following railroad spurs were noted on the Subject Property:

The Northwestern Pacific Rail Line formerly ran through the northern portion of the Property; however, there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as “Non-Scope Considerations”). The ASTM E1527-21 standard defines the term business environmental risk (BER) as, “*a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.*”

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Subject Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

A cattle barn was observed at the Property. There are no inhabited buildings on the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Subject Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

The contracted scope of work included a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Hillmann did not observe evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

7.5 NWI Mapped Wetlands

The National Wetlands Inventory online Wetland Mapper (<https://www.fws.gov/wetlands/data/mapper.html>) was reviewed for indications of jurisdictional wetlands at or immediately

adjoining the Subject Property. The scope of work for this assessment excluded a visual determination of regulated wetlands at the Subject Property. It is emphasized that, regardless of the data reviewed via the NWI Wetlands Mapper, a field delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Subject Property.

The review indicated the following regulated wetland areas on the Property:

A streamside Management Area – Wolverton Gulch is depicted along the eastern edge of the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

No potable water service was identified at the Property.

RE: Supplemental Subsurface Investigation Report
20-034 North Coast Highway Solar
CA Highway 36
Hydesville, CA 10065
Hillmann Project Number: C3-8302

Dear Mr. Albert:

Hillmann Consulting, LLC, is pleased to provide this Supplemental Subsurface Investigation Report prepared for the above referenced property.

This report is for the exclusive use of the entities named on the front cover, its affiliates, designates and assignees, rating agencies, prospective bond holders and bond holders, and no other party shall have any right to rely on any service provided by Hillmann Consulting, LLC, without prior written consent.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact the Project Manager at 714-634-9500.

Very Truly Yours,
Hillmann Consulting, LLC

1.0 INTRODUCTION / BACKGROUND

Hillmann Consulting, LLC (Hillmann) conducted a Supplemental Subsurface Investigation at the agricultural Property known as 20-034 North Coast Highway Solar, located at Highway 36, Hydesville, California. The Property is currently agricultural land that has been in use since the 1940s. The site is being considered for redevelopment as a solar farm. The site location and its vicinity are indicated on **Figure 1**.

In January 2021, Hillmann completed a Phase I Environmental Site Assessment at the Property. The active site use for agricultural purposes was identified as a potential environmental concern that justified preliminary soil sampling for organo-chlorine pesticides (OCP). Hillmann completed a shallow soil sampling program and tested the soil for OCP and heavy metals. Results indicated none of the samples had concentrations of contaminants above current commercial screening levels. In addition, records indicate that the west-adjointing site located at 1576 CA-Highway 36, was formerly occupied by Eel River Lumber Products Mill C, that maintained a 550-gallon underground storage tank (UST) that was removed in 1987. The former saw mill operation used gasoline, diesel, and VOCs and was identified as a potential off-site concern.

Based on these results, a Limited Phase II Subsurface Investigation was conducted in September 2021 that included soil gas sampling in targeted locations near the off-site former UST. The results indicated no detectable concentrations of VOC in soil gas. As a supplement to this work, sampling of groundwater was requested by the Client. This supplemental report includes all data related to the off-site former UST investigation including the soil gas and groundwater sampling results.

The current investigation is an independent assessment of the site that was constrained by time and cost factors as part of a self-directed effort. The investigation included installation of three soil gas sampling probes and two groundwater borings at the site. This investigation was not intended to meet the more stringent requirements of a regulatory driven assessment.

2.0 GEOLOGY/HYDROGEOLOGY

Based on the drilling logs, the sediments beneath the site consist primarily of sandy silt and silty sand from near surface to 8 feet below surface grade. The deeper sediments consisted of silty clay with trace sand from 20 to 35 feet below grade, the maximum depth of exploration. Groundwater was encountered at about 25-30 feet below grade and was sampled as requested. Descriptions of the sediments encountered are presented in the drilling logs (**Appendix C**).

3.0 SITE INVESTIGATION

3.1 Soil Gas Sampling

On September 11, 2021, Hillmann installed three soil gas sampling probes (SG1-SG3) along the northwest portion of the site to total depths ranging from 7-8 feet below grade. The probes were installed using hand auger tools. The locations of the probes are indicated on **Figure 1**.

The soil gas sampling probes consist of plastic micro-porous vapor implants that are approximately 2 inches long with a 0.5-inch outside diameter, connected to 0.25-inch outside diameter nylaflow tubing that extended above the surface. The annulus around each vapor implant was backfilled with approximately 1 foot of screen-washed #3 sand. Six inches of dry bentonite was placed immediately above the sand pack, followed by one-foot of bentonite that was hydrated during placement. The bentonite was further sealed with hydrated bentonite and neat cement to grade to provide a secure borehole seal. The probes were finished with gas-tight fittings at the surface pending vapor purging and sampling.

The soil gas sampling probes were allowed to equilibrate for approximately 24 hours before collecting vapor samples. Prior to vapor sampling, shut-in and leak tests were conducted on the probes. The probe head was attached to the sampling train assembly of Nylaflow tubing, valves, and fittings and connected to a purge pump. The pump was used to evacuate the sealed system using an applied vacuum of 100 inches of water column (in. WC). The vacuum on each probe was monitored for 90 seconds with the sampling train system sealed. After the shut-in test was validated, the sampling train was leak tested. Liquid isopropyl alcohol was applied around all connections in the sampling train to evaluate whether the system was sealed from ambient air leaks. A detection of 10 times the reporting limit of this compound might suggest that ambient air leakage had occurred.

The purpose of purging is to remove stagnant air from the vapor sampling train to ensure representative samples are obtained. Each probe was purged using an adjustable vacuum pump set at 200 mL/minute. During purging, the soil gas was monitored for VOC, oxygen, and carbon dioxide content using a Mini-Rae 2000 multi gas detector to ensure that non-atmospheric formation air was being sampled (**Appendix D**).

After purging three soil gas volumes through the system, vapor samples were collected from the probes on September 12, 2021. During sampling, the purge pump was operated at 200 mL/minute, and the vacuum was monitored to ensure it was below 100 in. WC. Vacuum applied below this level helps ensure chemical partitioning from pore water to soil gas and the stress on the air seals are both minimized. The samples were containerized in Tedlar bags which were delivered to the laboratory for analysis. Fresh tubing was used on each sampling train between holes. The samples were for VOC using EPA Method 8260B by A&R Laboratories of Ontario, California.

Results from soil gas sampling indicated none of the samples had detectable concentrations of VOC. These results are summarized in **Table 1**. The laboratory report from soil gas sampling is included in **Appendix B**.

3.2 Groundwater Sampling

On March 29, 2022, Hillmann returned to the site to obtain groundwater samples as requested. A hollow stem auger was utilized to drill two groundwater borings (HB1 and HB2) to depths of 35-45 feet below grade. During drilling, soil samples were obtained at select depths to determine if groundwater was present. When saturated conditions were encountered, drilling was terminated and the borehole was allowed to equilibrate for about 30 minutes. Grab

groundwater samples were obtained from each boring using a clean acrylic bailer and were laboratory analyzed for petroleum hydrocarbons and VOC.

Results from groundwater sampling indicated neither groundwater sample had detectable concentrations of petroleum hydrocarbons or VOC. These results are summarized in **Table 2**. The laboratory report from groundwater sampling is included in **Appendix B**.

4.0 CONCLUSIONS AND RECOMMENDATIONS

The subject site is active agricultural land that is being considered for a solar farm development. Previous testing of the soil for OCP and heavy metals indicated no significant or actionable concentrations that might impact the development. However, the site lies in close proximity to a site with a known UST case, which could potentially contaminate the Subject Property. Accordingly, a subsurface investigation was conducted to gauge possible impacts from off-site contaminant sources.

In September 2021, Hillmann conducted an independent subsurface investigation at the site that included installation of three soil gas probes to gauge possible subsurface contamination in targeted areas of the site near the former UST case. Results indicated none of the soil gas samples had detectable concentrations of VOC. As requested, Hillmann returned to the site in March 2022 and installed two borings drilled into groundwater for sampling. Results from laboratory analysis indicated neither groundwater sample had detectable concentrations of petroleum hydrocarbons or VOC. Based on these results, we recommend no further sampling at the site.

5.0 LIMITATIONS

This Subsurface Investigation was performed in accordance with generally and currently accepted engineering practices and principles; however, the procedures and methodologies used in this investigation are not intended to meet all specific regulatory guidelines as this work was completed as a self-directed effort. Although the data in this report is indicative of subsurface conditions in areas investigated, no further conclusions regarding the absence or presence of subsurface contamination in other areas of the site should be construed or inferred other than those expressly stated in this report. The conclusions made are based on information obtained from field observations, independent laboratory analytical results, and from current and relevant Federal, State, regional, and local agencies.

TABLE 1

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
 B1 = BOD dilution water is over specifications . The reported result may be biased high.
 D = Surrogate recoveries are not calculated due to sample dilution.
 E = Estimated value; Value exceeds calibration level of instrument.
 H = Analyte was prepared and/or analyzed outside of the analytical method holding time
 I = Matrix Interference.
 J = Analyte concentration detected between RL and MDL.
 Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
 S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
 RL = Reporting Limit, Adjusted by DF
 MDL = Method Detection Limit, Adjusted by DF
 Qual = Qualifier
 Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

For any feedback concerning our services, please contact Jenny Jiang, Project Manager at 951.779.0310. You may also contact Ken Zheng, President at office@arlaboratories.com.

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications. The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

WELL TYPE Monitoring Extraction Injection Cathodic Protection
 Soil Gas Piezometer Geothermal Other _____

WELLS TO BE DESTROYED Number of Wells NA

DESTRUCTION METHOD Pressure Grout Overbore Other _____

SUSPECTED CONTAMINATES Potential hydrocarbons

CONTAINMENT/DISPOSAL OF INVESTIGATION DERIVED WASTE _____

Contained in DOT drums pending characterization

Facility ID # _____

Permit # SR0002331

DO NOT WRITE ABOVE THIS LINE - FOR AGENCY USE ONLY

PERMITS WILL NOT BE PROCESSED WITHOUT THE FOLLOWING:

- Completed application and fees, must be submitted together.
- Detailed Site Plan - overhead view.
- Well construction details - specifications of borehole, casing/screen interval, filter pack, seal and surface features.
- Lead agency workplan concurrence - required for regulated cleanup sites.
- Off-site work - encroachment permit for work in municipal right-of-way; access agreement for work on private property.

UPON COMPLETION OF WORK:

- Well identification number must be displayed on the well box/monument.
- State Water Well Completion Report (form DWR 188) must be submitted within 60 days of completion of work.

CERTIFICATES OF INSURANCE:

- A Currently effective General Liability Certificate of Insurance is on file with Humboldt County Division of Environmental Health, endorsed to include the Humboldt County Division of Environmental Health named as additional insured.
- A Currently effective Worker's Compensation Certificate of Insurance is on file with Humboldt County Division of Environmental Health, endorsed to include the Humboldt County Division of Environmental Health named as additional insured.

I hereby agree to comply with all laws, ordinances and regulations of the County of Humboldt Division of Environmental Health (DEH) and State of California pertaining to water well construction. I acknowledge this application will become a permit only after workplan concurrence by the lead agency with regulatory jurisdiction (DEH, North Coast Regional Water Quality Control Board, Department of Toxic Substances Control / California Environmental Protection Agency). I understand this permit is not transferable and expires one hundred twenty (120) days from the date of permit approval. I will notify DEH at (707) 445-6215 Five (5) working days prior to commencing this work.

For well installation/destruction, I will submit a State Water Well Completion Report (form DWR 188) within 60 days of completion of work to obtain final approval of this permit.

RE: Limited Phase II Subsurface Investigation Report
20-034 North Coast Highway Solar
CA Highway 36
Hydesville, CA 10065
Hillmann Project Number: C3-8584

Dear Mr. Albert:

Hillmann Consulting, LLC, is pleased to provide this Limited Phase II Subsurface Investigation Report prepared for the above referenced property.

This report is for the exclusive use of the entities named on the front cover, its affiliates, designates and assignees, rating agencies, prospective bond holders and bond holders, and no other party shall have any right to rely on any service provided by Hillmann Consulting, LLC, without prior written consent.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact the Project Manager at 714-634-9500.

Very Truly Yours,
Hillmann Consulting, LLC

Brandon Clements
Partner; Western Regional Director

APPENDIX D - Soil Gas Monitoring Data

1.0 INTRODUCTION / BACKGROUND

Hillmann Consulting, LLC (Hillmann) conducted a Limited Phase II Subsurface Investigation at the agricultural land known as 20-034 North Coast Highway Solar, located at Highway 36, Hydesville, California. The Property is currently agricultural land that has been in use since the 1940s. The site is being considered for redevelopment as a solar farm. The site location and its vicinity are indicated on **Figure 1**.

In January 2021, Hillmann completed a Phase I Environmental Site Assessment at the Property. The active site use for agricultural purposes was identified as a potential environmental concern that justified preliminary soil sampling for organo-chlorine pesticides (OCP). Hillmann completed a shallow soil sampling program and tested the soil for OCP and heavy metals. Results indicated none of the samples had concentrations of contaminants above current commercial screening levels. In addition, records indicate that the west-adjointing site located at 1576 CA-Highway 36, was formerly occupied by Eel River Lumber Products Mill C, that maintained a 550-gallon underground storage tank (UST) that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs, and was identified as a potential off-site concern.

Based on these results, a Limited Phase II Subsurface Investigation was conducted at the Property that included soil gas sampling in targeted locations near the off-site former UST. The current investigation is an independent assessment of the site that was constrained by time and cost factors as part of a self-directed effort. The investigation included installation of three soil gas sampling probes at the site. This investigation was not intended to meet the more stringent requirements of a regulatory driven assessment.

2.0 GEOLOGY/HYDROGEOLOGY

Based on the drilling logs, the sediments beneath the site consist primarily of sandy silt and silty sand from near surface to 8 feet below surface grade. Groundwater was not encountered during drilling. Descriptions of the sediments encountered are presented in the drilling logs (**Appendix C**).

3.0 SITE INVESTIGATION

On September 11, 2021, Hillmann installed three soil gas sampling probes (SG1-SG3) along the northwest portion of the site to total depths ranging from 7-8 feet below grade. The probes were installed using hand auger tools. The locations of the probes are indicated on **Figure 2**.

The soil gas sampling probes consist of plastic micro-porous vapor implants that are approximately 2 inches long with a 0.5-inch outside diameter, connected to 0.25-inch outside diameter Nylaflo tubing that extended above the surface. The annulus around each vapor implant was backfilled with approximately 1 foot of screen-washed #3 sand. Six inches of dry bentonite was placed immediately above the sand pack, followed by one-foot of bentonite that was hydrated during placement. The bentonite was further sealed with hydrated bentonite to grade to provide a secure borehole seal. The probes were finished with gas-tight fittings at the surface pending vapor purging and sampling.

The soil gas sampling probes were allowed to approximately 24 hours before collecting vapor samples. Prior to vapor sampling, shut-in and leak tests were conducted on the probes. The probe head was attached to the sampling train assembly of Nylaflo tubing, valves, and fittings and connected to a purge pump. The pump was used to evacuate the sealed system using an applied vacuum of 100 inches of water column (in. WC). The vacuum on each probe was monitored for 90 seconds with the sampling train system sealed. After the shut-in test was validated, the sampling train was leak tested. Liquid isopropyl alcohol was applied around all connections in the sampling train to evaluate whether the system was sealed from ambient air leaks. A detection of 10 times the reporting limit of this compound might suggest that ambient air leakage had occurred.

The purpose of purging is to remove stagnant air from the vapor sampling train to ensure representative samples are obtained. Each probe was purged using an adjustable vacuum pump set at 200 mL/minute. During purging, the soil gas was monitored for VOC, oxygen, and carbon dioxide content using a Mini-Rae 2000 multi gas detector to ensure that non-atmospheric formation air was being sampled (**Appendix D**).

After purging three soil gas volumes through the system, vapor samples were collected from the probes on September 12, 2021. During sampling, the purge pump was operated at 200 mL/minute, and the vacuum was monitored to ensure it was below 100 in. WC. Vacuum applied below this level helps ensure chemical partitioning from pore water to soil gas and the stress on the air seals are both minimized. The samples were containerized in Tedlar bags which were delivered to the laboratory for analysis. Fresh tubing was used on each sampling train between holes. The samples were for VOC using EPA Method 8260B by A&R Laboratories of Ontario, California.

3.1 Laboratory Results

Results from soil gas sampling indicated none of the samples had detectable concentrations of VOC. These results are summarized in **Table 1**. The laboratory report from soil gas sampling is included in **Appendix B**.

4.0 CONCLUSIONS AND RECOMMENDATIONS

The subject site is active agricultural land that is being considered for a solar farm development. Previous testing of the soil for OCP and heavy metals indicated no significant or actionable concentrations that might impact the development. However, the site lies in close proximity to a site with a known UST case, which could potentially contaminate the Subject Property. Accordingly, a subsurface investigation was conducted to gauge possible impacts from off-site contaminant sources.

In September 2021, Hillmann conducted an independent subsurface investigation at the site that included installation of three soil gas probes to gauge possible subsurface contamination in targeted areas of the site near the former UST case. Results indicated none of the soil gas samples had detectable concentrations of VOC. Based on these results, we recommend no further sampling at the site.

5.0 LIMITATIONS

This Subsurface Investigation was performed in accordance with generally and currently accepted engineering practices and principles; however, the procedures and methodologies used in this investigation are not intended to meet all specific regulatory guidelines as this work was completed as a self-directed effort. Although the data in this report is indicative of subsurface conditions in areas investigated, no further conclusions regarding the absence or presence of subsurface contamination in other areas of the site should be construed or inferred other than those expressly stated in this report. The conclusions made are based on information obtained from field observations, independent laboratory analytical results, and from current and relevant Federal, State, regional, and local agencies.

TABLE 1
Summary of Soil Gas Sampling Results (ug/L)

Sample ID	Benzene	Toluene	Ethylbenzene	Xylenes	TCE	PCE	Other VOC

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
 B1 = BOD dilution water is over specifications . The reported result may be biased high.
 D = Surrogate recoveries are not calculated due to sample dilution.
 E = Estimated value; Value exceeds calibration level of instrument.
 H = Analyte was prepared and/or analyzed outside of the analytical method holding time
 I = Matrix Interference.
 J = Analyte concentration detected between RL and MDL.
 Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
 S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
 RL = Reporting Limit, Adjusted by DF
 MDL = Method Detection Limit, Adjusted by DF
 Qual = Qualifier
 Tech = Technician

As regulatory limits change frequently, A & R Laboratories advises the recipient of this report to confirm such limits with the appropriate federal, state, or local authorities before acting in reliance on the regulatory limits provided.

RE: Phase I Environmental Site Assessment
20-034 North Coast Highway Solar
CA Highway- 36
Hydesville, California 10065
Hillmann Project No: C3-7896

Dear Mr. Albert:

Hillmann Consulting LLC is pleased to provide the results of our Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in general accordance with the scope and limitations of ASTM Practice E 1527-13, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 908-688-7800.

Sincerely,

Hillmann Consulting, LLC

[Shilpa Sunil]
[Environmental Project Manager]

[Ryan Terwilliger]

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DNPL	– Delisted National Priority List
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
ERNS	– Emergency Response Notification System
FDNY	– Fire Department, City of New York
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
INST	– Institutional
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NCDOH	– Nassau County Department of Health
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NJDEP	– New Jersey Department of Environmental Protection
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
NYCDEP	– New York City Department of Environmental Protection
NYCDOB	– New York City Department of Buildings
NYCOER	– New York City Office of Environmental Remediation
NYSDEC	– New York State Department of Environmental Conservation
OPRA	– Open Public Records Act
PADEP	– Pennsylvania Department of Environmental Protection
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
SCDHS	– Suffolk County Department of Health Services
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
USEPA	– United States Environmental Protection Agency
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of parcels CA Highway- 36, Hydesville, California (the Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-13 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:	CA Highway- 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/ Agricultural land				
Approx. Property Area:	Total ~78.89 acres				
Buildings/# of Floors	A barn to the northeast parcel 204-171-047, No structures are present on remaining of the parcels				
Approx. Building Area:	Barn: approximately 2,800 SF				
Approx. Year Built:	1940s				
Commercial Occupants:	None				
Current Use:	Vacant lot				
Prior Uses:	Agricultural				
Inspected By:	Mr. Ryan Terwilliger				
Site Contact/Company:	Mr. Rafik Albert / EPD Solutions, Inc.				
Site Escort/Company:	None				
Inspection Date:	April 14, 2020				
Weather Conditions:	Clear, 70° F

Data Gaps:	X				2.3

1.3 Findings, Opinions and Conclusions

1.3.1 Recognized Environmental Conditions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

RECOGNIZED ENVIRONMENTAL CONDITIONS	
REC#1	The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.
REC#2	The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be vapor risk and REC to the Property.
HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No HRECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No CRECs were identified.

SIGNIFICANT DATA GAPS

No SDGs were identified.

1.3.2 REC Response Action Recommendations

The following table presents recommended response actions to the identified RECs for further investigation and/or corrective action:

REC RESPONSE ACTION SUMMARY TABLE	
REC	Response Action
REC # 1 and REC #2	Hillmann recommends to perform a limited Phase II investigation for pesticides only. However, if the Property is ever redeveloped for uses other than a solar farm, a limited Phase II should be conducted to determine whether the Property has been impacted by the west-northwest adjoining site.

1.3.3 Notable Environmental Conditions / De Minimis Conditions

The following environmental conditions were identified, but are not considered to be a REC in connection with the Property:

NOTABLE ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS	
1.	Although not directly observed during site reconnaissance, based on the historic residential use and agricultural use, Hillmann suspects the possible presence that a septic system serviced the former residence on the Property. Hillmann recommends proper closure and removal of this prior to redevelopment.
2.	The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. The site is currently used as cattle pasture. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.
3.	Hillmann observed a sprinkler and water pump on the Property.
4.	The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however, there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.
5.	A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation, of Humboldt County Codes. The violations were closed on April 6, 2007.
6.	The adjoining property at 1576 CA-36 (Steve Wills Trucking and Logging) was listed under CERS ID 10020253. However, Per the Humboldt County records it appears that business operations occur on APN 204-171-003, and not on any of the Property parcels (204-081-002, -004, -007). A letter dated January 6, 2004 indicated DEH observed three 55-gallon drums of diesel stored in front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations.
7.	The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) The site was formerly occupied by Eel River Lumber Products saw mill early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of 10,00-gallon diesel above ground storage tank, 550-gallon gasoline above ground storage tank 200-gallon kerosene above ground storage tank, 500-gal waste oil drum, 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four boings to test TPH-g. TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.

	The site was listed on the CUPA and WDS databases. This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. The CUPA listing identifies Facility ID # FA0003173 with a current status listed as "01 – Active", a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.
8.	Reynolds RV Repair at 988 Highway 36 is listed under CPS-SLIC, CUPA and CERS database. The site is located approximately 2,571 feet west northwest of the Property. The CPS-SLIC listing indicates site as an open SLIC case undergoing site assessment dated 12/29/2016. Based on the distance and groundwater gradient this listing is not considered to be REC to the Property.

1.3.4 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

[Ryan Terwilliger]
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as “Non-ASTM Scope concerns”, in accordance with the contracted scope of work scope for this assessment. The following is a summary of findings for applicable BERs. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
Subject	Findings	Not Appl.	Rep. Ref.
Asbestos		X	7.1
Lead Paint		X	7.2
Radon	Property is located in a Radon Zone 3 – an USEPA designation for an area with low potential for elevated indoor radon levels to occur.		7.3
Mold / Microbial Damage		X	7.4
NWI Wetlands	No mapped wetland areas were depicted at the Property.		4.1
Lead in Drinking Water	Potable water service at the Property is provided by a utility connection with the Hydesville City Water Supply System. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-13. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The primary goal of the processes established by ASTM E1527-13 is to identify *recognized environmental conditions* in connection with the Property.

The term *recognized environmental condition (REC)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The ASTM has also defined the terms *historical recognized environmental conditions* and *controlled recognized environmental conditions* as two additional types of RECs. The term *historical recognized environmental condition (HREC)* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls or engineering controls).

The term *controlled recognized environmental condition (CREC)* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Conditions determined to be “*de minimis conditions*” are not considered to be RECs, HRECs or CRECs. *De minimis condition* is defined by the ASTM, “...as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Property.
- A review of standard physical record sources for available topographic, geologic and groundwater data.
- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier.
- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.1.1 Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-13 standard:

Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if more certainty is desired regarding ACM and potential asbestos hazards at the Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Property.

Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Property.

NWI Wetlands: Review of US Fish and Wildlife Service National Wetland Inventory digitized data of mapped wetlands as presented in the attached EDR Radius Map plus Geocheck Report.

It is emphasized that, regardless of the wetlands data obtained via the EDR Geocheck-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	CA Highway- 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Approx. Land Area:	Total ~78.89 acres				
Apprx. Latitude/Longitude:	North 40.5427460 degrees/West 124.1168740 degrees				
Additional Details (if appl.):	Property consists of four adjoining parcels with the perimeters being fenced off on all sides.				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/ Agricultural land				

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Property was not documented. Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 User Reliance

This report is for the exclusive use of the User(s) named on the front cover. No other party(ies) shall have any right to rely on the content of this report without first obtaining the consent of the original report User; and without obtaining written consent from Hillmann in the form of a letter of reliance or report recertification.

2.5 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Property owners/occupants and/or site escort at the time of the site visit.
- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Property and immediate surrounding area.

2.6 General Limitations and Exceptions

2.6.1 Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, are further specified in Section 4.4.

Significant limitations related to the condition or accessibility of the Property at the time of the site reconnaissance, if encountered, are reported in Section 5.1.

2.6.2 Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-13 are reported.

2.6.3 Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Property contact(s) or as shown on any documents reviewed or received from the Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-13. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information

gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-13 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

The recommended response actions to the identified RECs presented in Section 1.3, if any, are not intended to represent the only course(s) of action to take; nor does it imply any opinion as to the timing of the action. Furthermore, it is emphasized that additional response actions may become warranted depending on the outcome of the initial action(s) taken. Hillmann advises that consultation with legal counsel familiar with environmental and real estate law may be beneficial to the decision making process for the type and timing of a response action to identified RECs, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term “User” is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Property; specifically, the entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

No prior environmental reports/documentation were provided.

3.2 User Questionnaire

Section 6 of the ASTM E1527-13 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-13 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	NR	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	NR	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	NR	
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	NR	

<p>Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,</p>		
-Do you know the past uses of the property?	NR	
-Do you know of specific chemicals that are present or were once present at the property?	NR	
-Do you know of spills or other chemical releases that have taken place at the property?	NR	
-Do you know of any environmental cleanups that have taken place at the property?	NR	
<p>The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?</p>	NR	
<p>Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.</p>	NR	

NR-no response

3.3 Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-13, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Physical Setting Sources

The following physical setting sources were reviewed:

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 88 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the south-southwest. The closest water body is Wolverton Gulch to the east and Van Duzen River, located approximately 1100 feet to the WSW.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Property is classified as "Ferndale". This soil type is described as silt loam surface texture with soils moderately fine or fine textures with a slow infiltration rate.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Quaternary System, and Quaternary Series.
Prior Env. Reports: (Section 3.1)	No prior environmental reports were obtained.
Additional Sources/Data:	No additional physical setting sources or data was obtained.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the south-southwest.
NWI Wetlands Data: (EDR Geocheck-Physical Setting Source Addendum)	A streamside Management Area - Wolverton Gulch is depicted along the eastern edge of the Property.

4.2 Historical Use – Property and Adjoining Properties

Research has been conducted in an attempt to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.2.1 Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
	Property:	(no coverage)	
	Adjoining:		

A copy of the Certified Sanborn Map Report is attached in Appendix D.

4.2.2 City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Property’s street address. The following is a generalized summary of the findings of city directory research for past occupants of the Property.

Property	
Use(s) / Occupant(s):	Years
None identified	

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	Years
Mix of residential and commercial occupants.	1992 - 1998
Trucking & Logging	2010 - 2017

A copy of the EDR City Directory report is attached in Appendix D.

4.2.3 Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix D) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Summary	
1944	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	No improvements are depicted
1959, 1972	Property:	Unmapped
	Adjoining:	Unmapped
1979	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	Burners and commercial structures and Rohnerville Airport are depicted to the northwest and west-northwest
2012	Property:	No improvements are depicted.
	Adjoining:	Rohnerville Airport is depicted to the north- northwest

4.2.4 Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix D, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary of Interpretation	
1941	Property:	Agricultural use and small residential structures barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east
	Adjoining:	Agricultural use
1954, 1968, 1972	Property:	Agricultural use and small residential structures a barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east
	Adjoining:	Agricultural use, commercial structures, and vacant land
1983, 1989, 1998, 2005, 2009, 2012, 2016	Property:	Agricultural use and small residential structures a barn like structure are depicted at the northern portion. Railroad track to the north and a streambed is depicted to the east
	Adjoining:	Residential and commercial trucking is evident to the northwest.

4.2.5 EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.3, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	None
Historic Auto: (on-site/adjoining only)	None	None
MGP: (1-mile distance)	None	None

4.2.6 Petroleum/Natural Gas Well Review

The historical record sources and the California Division of Oil, Gas, and Geothermal Resources (DOGGR) online mapping application were reviewed for records of historic petroleum and/or natural gas wells at the Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

4.2.7 Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.1)	Not applicable; no prior reports were provided.

Site Observations:	The site is currently used as cattle pasture. Hillmann observed a water pump. The surrounding vicinity characteristics undeveloped land/ agricultural land and commercial uses.
Other Sources:	No additional pertinent historical data was obtained.

4.2.8 Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Property:

Property	
Date Range	Use
1941 to 2012	Agricultural use
2012 to 2016	Vacant land

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	Use
1941	Agricultural use
1954 to Present	Undeveloped land, agricultural use and trucking yard
1998 to Present	An airport, commercial, light industrial and undeveloped

4.2.9 Historical Records Data Failure

The ASTM E1527-13 standard defines data failure as a failure to achieve the ASTM specified historical research objectives after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions should be sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval.

Objective	Met?	Detail	Significant?
First developed use/date determined?	No	The earliest documented use of the Property was agricultural uses in 1941	No
Record sources at 5-year intervals back to 1940 or first developed use?	Yes	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Section 4.2.8.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

4.2.10 Historic Uses REC Discussion

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

The Property was historically developed for agricultural use as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.

The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation is considered to be vapor risk and REC to the Property.

4.3 Standard Environmental Record Sources

A regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT was obtained and reviewed. The report provided a search of standard environmental record sources for listings of the Property, adjoining properties and sites within the surrounding area; and has been reviewed for the purpose of identifying listings suggesting a potential impact to the Property due to presence or migration of hazardous substances and/or petroleum products. Additional descriptions of the meaning and significance of the regulatory databases can be found in the regulatory database report in Appendix E. The EDR Radius Map™ Report provided a search of the following database categories in accordance with the requirements of the ASTM Standard E1527-13:

Regulatory Database	Search Distance
Fed. National Priorities List (NPL/a.k.a. "Superfund" sites) & Proposed NPL	1-mile
Fed. Delisted NPL	½-mile
Fed. Superfund Enterprise Management System (SEMS; formerly CERCLIS)	½-mile
Fed. SEMS-ARCHIVE (formerly known as CERCLIS NFRAP)	½-mile
Fed. RCRA Corrective Action Sites (CORRACTS)	1-mile
Fed. RCRA Transport/Storage/Disposal (TSD) sites	½-mile
Fed. RCRA Generators (LQG, SGQ & CESQG)	Site & Adjoining
Fed. Institutional Control/Engineering Control (IC/EC) Registries	Site only
Fed. Emergency Response Notification System (ERNS)	Site only
State/Tribal Hazardous Waste Sites (SHWS)	1-mile
State/Tribal Landfill and/or Solid Waste Disposal (LF/SWF)	½-mile
State/Tribal Leaking Storage Tanks	½-mile
State/Tribal Registered Storage Tanks	Site & Adjoining
State/Tribal IC/EC Registries	Site
State/Tribal Voluntary Cleanup Sites	½-mile
State/Tribal Brownfields	½-mile
Additional Federal, State, Tribal and Local Environmental Databases	Variable

Reported distances for adjoining listings discussed in Section 4.3.4, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients indicated where applicable in Sections 4.3.4 and 4.3.5 have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

4.3.1 Supplemental Database Listings

The regulatory database report was also reviewed for listings on supplemental databases, in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases of significant concern, if identified, is discussed in Sections 4.3.3 and 4.3.4. Otherwise, none of the other supplemental database listings identified by the regulatory database report are considered to be a REC in connection with the Property.

4.3.2 Limited Tier I Vapor Encroachment Screening

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions” (ASTM E 2600-15); and also on elements of “Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources” (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Property in the up-gradient direction, 365 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Property in the up-gradient direction, 165 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Property, if any, are identified and discussed in Sections 4.3.3, 4.3.4 and 4.3.5.

4.3.3 Property Listings

The following listings of the Property were identified:

Name/Address:	None
Database(s):	
Data Discussion:	
REC Discussion:	
VEC Discussion:	

4.3.4 Adjoining Property Listings

The following adjoining property listings were identified. Reported distances, where applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property. The reported gradient has been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Name/Address:	Eel River Lumber Pro. Mill C /1576 Highway 36				
Database(s):	CUPA, WDS				
Distance in feet:	Adjoining	Direction:	NW	Gradient:	Up/Cross
Data Discussion:	<p>The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) The site was formerly occupied by Eel River Lumber Products saw mill early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of 10,000-gallon diesel above ground storage tank, 550-gallon gasoline above ground storage tank 200-gallon kerosene above ground storage tank, 500-gal waste oil drum, 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four boings to test TPH-g. TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.</p> <p>The site was listed on the CUPA and WDS databases. This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. The CUPA listing identifies Facility ID # FA0003173 with a current status listed as "01 – Active", a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.</p>				
REC Discussion:	Based on the details provided above, a REC is suspected in connection with the Property. Additional evaluation would be required to determine whether a REC exists.				
VEC Discussion:	Based on the available data, a VEC exists.

4.3.5 ASTM Search Distance Findings

The following is a discussion of non-adjointing sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status. Listings for the following databases, if identified, have been discussed above in Sections 4.3.3 and 4.3.4: Registered Storage Tanks, Federal RCRA Generators, Federal and State EC/IC, ERNS. A copy of the full regulatory database report, including available details of all listed sites, is included in Appendix E.

UNMAPPED/ORPHAN LIST SITES	
Notable Listings:	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below: None

4.4 Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
EPA MyProperty	Online search	A response was received stating that no records were found.
Humboldt County Department of Environmental Health Division	FOI request	Records for the west adjoining property at 1576 Highway 36 (Steve Wills Trucking and Logging) were received. A letter dated January 6, 2004 indicated DEH observed three 55-gallon drums of diesel stored in front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of 10,00-gallon diesel above ground storage tank, 550-gallon gasoline above ground storage tank 200-gallon kerosene above ground storage tank, 500-gal waste oil drum, 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four boings to test TPH-g, TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.
Humboldt County Planning and Building Department	FOIA request	A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation, of Humboldt County Codes. And the violations were closed on April 6, 2007.
Department of Toxic Substances Control (DTSC)	FOI request	No response was received prior to report issuance.

Source	Type of Request	Outcome
Regional Water Quality Control Board (RWQCB)	FOI request	A response was received stating that no records were found.
County Air Pollution Control District (APCD)	FOI request	No response was received prior to report issuance.
CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
www.realquest.com https://webgis.co Humboldt.ca.us/HCEGIS2.0/	Online search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report. The Property is zoned Agricultural exclusive.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares. Building exteriors were observed at ground level, unless otherwise indicated. Where applicable, representative areas of building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Ryan Terwilliger
Property Escort/Company:	None
Inspection Date:	April 14, 2020
Weather Conditions:	Clear, 70° F

5.1.1 Significant Inaccessible Areas

No significant areas of the Property inaccessible at the time of the inspection were noted.

5.1.2 Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

Abutting Roadways:	Sate Highway 36 to the north; River Bar Road to the east
Current Property Use:	The site is currently used as cattle pasture. Hillmann observed a water well and agricultural pump.
Evidence of Past Property Uses:	None observed.
Evidence of Past Adjoining Property Uses:	None observed.
Surrounding Area Uses:	Commercial, residential and undeveloped land

5.2.2 Current Adjoining Property Uses

Dir	Street Address	Description
N	2031 Street HWY 36	Residential
E	River Bar Road	Undeveloped and Wolverton Gulch
W	1576 Street HWY 36	Commercial truck storage yard
S	River Bar Road	Undeveloped land and residential

5.2.3 Topographic Characteristics

Terrain:	Flat to gently sloping, 10-15 foot cliff from the south to the north on the east side of the Property
Direction of Downward Slope:	Towards the east-northeast
On-site Water Bodies:	None observed
Other Significant Features:	None observed

5.2.4 General Description of Structures

Buildings/# of Floors	A barn to the northeast parcel 204-171-047, No structures are present on remaining of the parcels
Approx. Building Area:	Approximately 2,800 SF
Approx. Year Built:	1940s
Ancillary Structures:	None observed
Sources of Heating & Cooling:	No heating or cooling systems were present at the Property.
Potable Water/Sewage Disposal:	No potable water or sewer services were present at the Property.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were observed to be stored and used by property occupants:

Occupant	Substance	Qty/Container Type	Storage Conditions
NA	No significant storage or use noted		

5.3.2 Drums

No hazardous substance or petroleum product drums were noted on the Property.

5.3.3 Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted on the Property.

5.3.4 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property.

5.3.5 Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/ UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
(none)						

5.3.6 PCBs in Oil Filled Electrical/Hydraulic Equipment

A pole mounted transformer was observed at the southeast side Property. There were no leaks observed around the transformer.

5.3.7 Odors

No strong, pungent or noxious odors were noted on the Property.

5.3.8 Pools of Liquid

No standing water or pools of liquid likely to contain hazardous substances or petroleum products were noted at the Property.

5.3.9 Interior Stains or Corrosion

No interior stains or corrosion due to hazardous substance/petroleum products spills/releases were noted at the Property.

5.3.10 Interior Drains/Sumps

No floor drains or sump pits were noted at the Property other than for storm water or sewage management.

5.3.11 Exterior Pits/Ponds/Lagoons

No exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed at the Property.

5.3.13 On-Site Solid Waste Disposal/Fill Material

No evidence of any on-site solid waste dumping was noted at the Property. No evidence of recently deposited fill materials was observed at the Property.

5.3.14 Waste Water

Sanitary sewage generated at the Property is discharged via an on-site septic system. See Section 5.3.15 for additional details regarding the septic system.

Storm water runoff at the Property is discharged via roof drains into the municipal sewer system.

No additional waste water discharges were identified at the Property.

5.3.15 Septic Systems

No septic systems were identified at the Property. Based on the history of site development, the prior use of a septic system for sanitary sewer disposal cannot be ruled out. The on-site septic systems are not anticipated to be a REC in connection with the Property. However, should the Property be planned for redevelopment in the future, the septic systems should be properly removed under applicable rules and regulations.

5.3.16 Wells

Hillmann observed a water well on the Property.

5.3.17 Railroad Spurs

The following railroad spurs were noted on the Property:

The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Subject	Name/Affiliation	Summary
Property Owner / Representative	Not applicable	The Property owner / representative was not available for interview at the time of the assessment.
Property Occupants	Not applicable	Property was unoccupied.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment.
Owners/Occupants of Adjoining or Nearby Properties	Not applicable	The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.4.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as “Non-Scope Considerations”). The ASTM E1527-13 standard defines the term business environmental risk (BER) as, “*a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.*”

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

No buildings were present at the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

As per the contracted scope of work, Hillmann conducted a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Hillmann did not observe evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

7.5 NWI Mapped Wetlands

As indicated in the Physical Setting Source table of Section 4.1 a streamside Management Area - Wolverton Gulch, is depicted along the eastern edge of the Property.

The scope of work for this assessment excludes a visual determination of regulated wetlands at the Property. It is emphasized that, regardless of the wetlands data obtained via the EDR Geotrack-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with [Hydesville water] A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

CA-36
FORTUNA, CA 95540

COORDINATES

Latitude (North): 40.5427460 - 40° 32' 33.88"
Longitude (West): 124.1168740 - 124° 7' 0.74"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 405419.6
UTM Y (Meters): 4488387.5
Elevation: 88 ft. above sea level

3	REYNOLDS RV REPAIR	988 HIGHWAY 36	CPS-SLIC, CUPA Listings, CERS	Higher	2571, 0.487, WNW

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Federal Delisted NPL site list

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>REYNOLDS RV REPAIR</i>	<i>988 HIGHWAY 36</i>	<i>WNW 1/4 - 1/2 (0.487 mi.)</i>	<i>3</i>	<i>13</i>
Database: CPS-SLIC, Date of Government Version: 12/09/2019 Facility Status: Open - Inactive Global Id: T10000001463				

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
KEN BAREILLES TRUCKI EPA ID:: CAL000440754	1178 HWY 36	NW 1/8 - 1/4 (0.209 mi.)	2	12

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

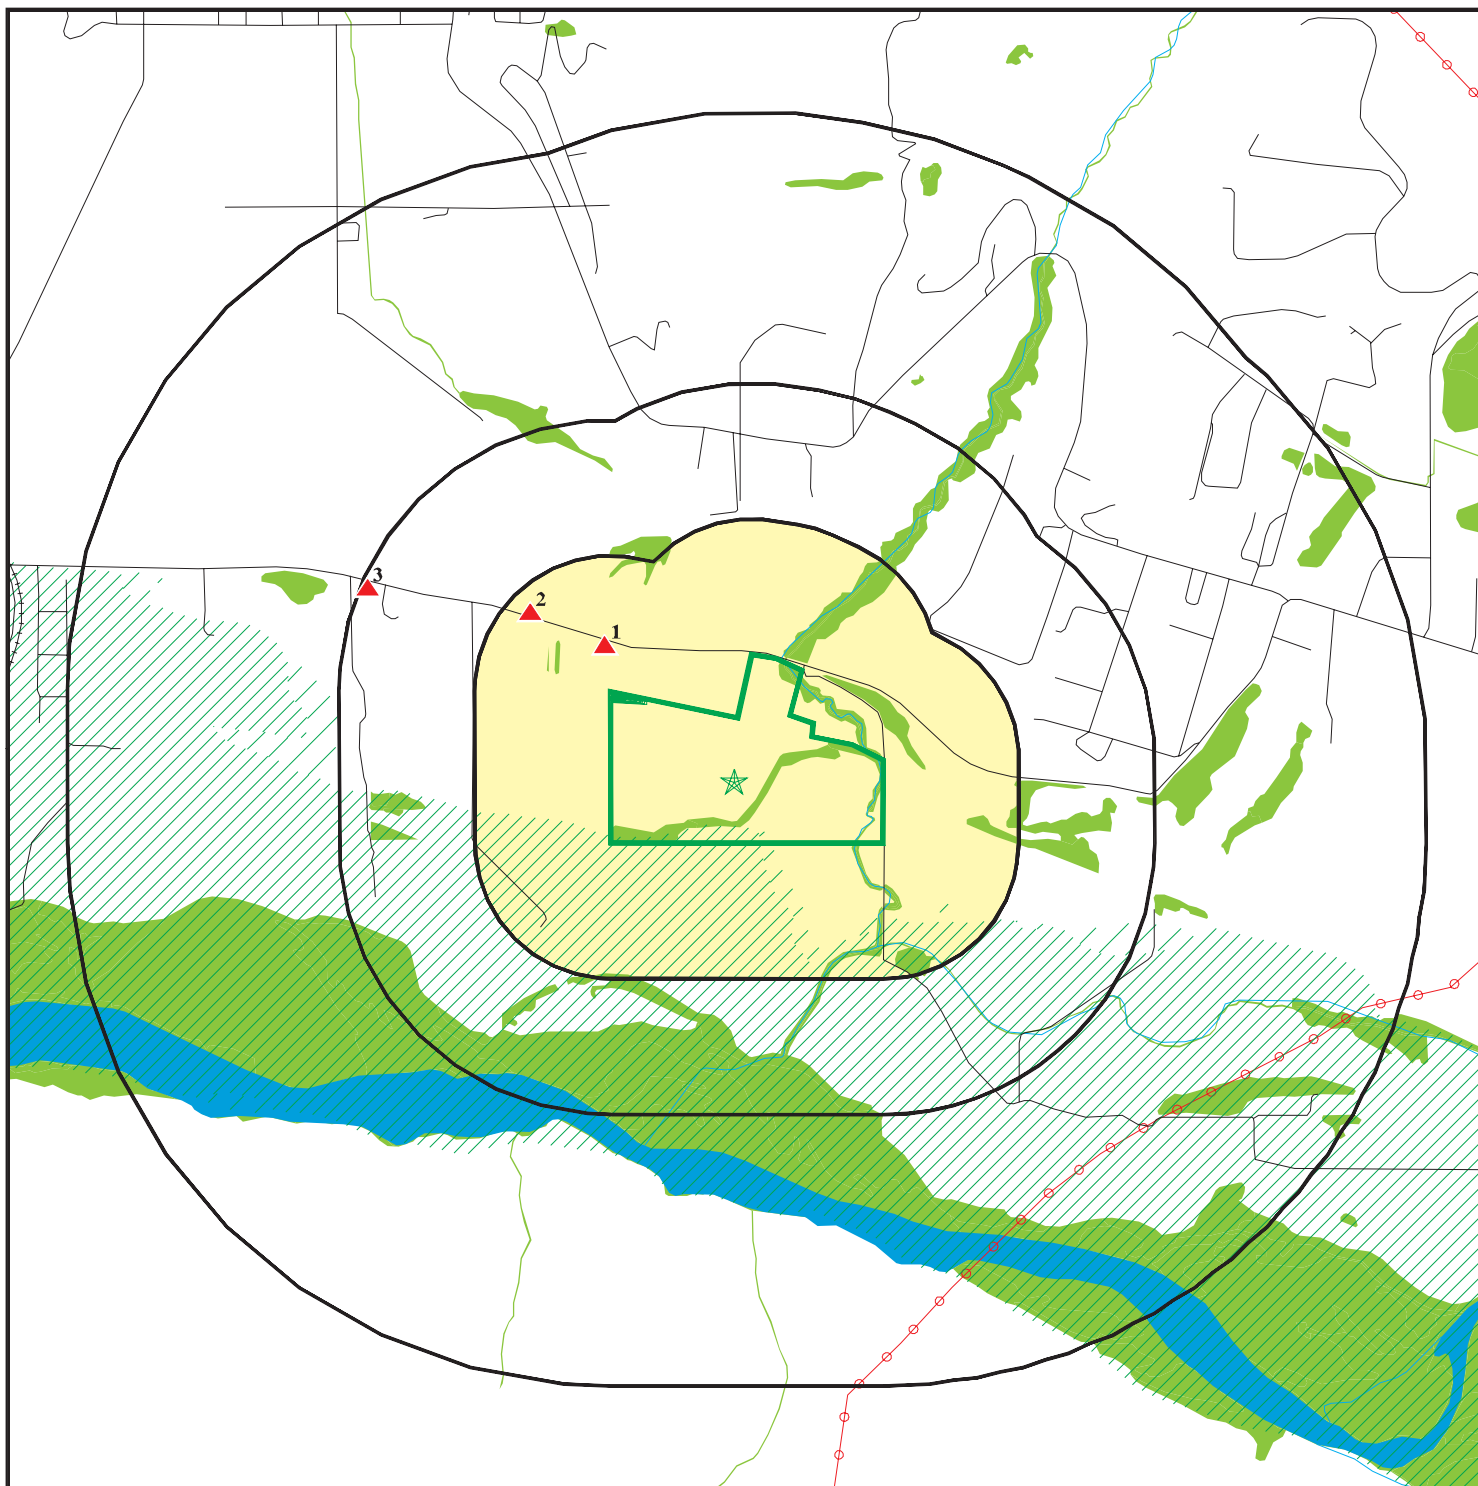

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>EEL RIVER LUMBER PRO</i> Database: CUPA HUMBOLDT, Date of Government Version: 11/13/2019 Permit Status: 01 - Active Permit Status: 02 - Inactive Permit Status: (none) Local Site Id: FA0003173	<i>1576 HIGHWAY 36</i>	<i>NW 0 - 1/8 (0.087 mi.)</i>	<i>1</i>	<i>9</i>

EXECUTIVE SUMMARY

There were no unmapped sites in this report.

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020	Source: EPA
Date Data Arrived at EDR: 02/05/2020	Telephone: N/A
Date Made Active in Reports: 02/14/2020	Last EDR Contact: 03/04/2020
Number of Days to Update: 9	Next Scheduled EDR Contact: 04/13/2020
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/30/2020	Source: EPA
Date Data Arrived at EDR: 02/05/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

Date of Government Version: 08/30/2013	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/21/2014	Telephone: 617-520-3000

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

Date of Government Version: 09/30/2017	Source: Environmental Protection Agency

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

West Map:	5629090 FORTUNA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles

Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: FERNDALE

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	21 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
2	21 inches	61 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
3	61 inches	80 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Surficial Soil Types: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam
stratified
silty clay loam
sand
silt loam
coarse sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Claude Young, Code Compliance Officer
Planning Division
County of Humboldt
Eureka, CA 95501

Dear Mr. Young:

I am in receipt of your two correspondences dated March 5, 2007 regarding APN 204-171-47 incorrectly identified as 2020 State Highway, Hydesville. If it is really mine, the address is 1576 Hwy 36, Fortuna.

Please send the described "demolition" permit application so that it might be submitted prior to your April 2, 2007 deadline.

Additionally, under both the Freedom of Information Act and my right to know my accuser, I am formally requesting the identity of the "Complainant" to whom you are forwarding copies of my correspondence from you.

Sincerely,

Phil Nyberg

Dear Mr. Young:

I am in receipt of the attached complaint of alleged Addition/Remodel involving Parcel #204-171-047.

The activity involved removal of a structure that your Environmental Health Department had previously determined to be uninhabitable. The removal was essentially complete at the time of receipt of your communication.

Your communication states that the demolition of a structure requires a "building permit". Surely I can't be the only person who would deem such terminology absurd.

I assure you that I had no idea that removing an uninhabitable old house from my own property required your blessing. The job is complete - the "hazardous" situation has been eliminated - there is nothing to inspect. Pursuing an after the fact permit would be simply extorting money with no beneficial purpose. Accordingly I would ask that the matter be dropped.

Recently my car was stolen in Fortuna, the couple captured in it three days later in Eureka - the car deemed totaled. The Humboldt County District Attorney couldn't seem to find the time to prosecute the perpetrators. I guess it would be interesting to see if it is more important to prosecute folks who are simply removing a hazard from their property.

Again, I respectfully request that you consider this matter closed.

Sincerely,

Phil Nyberg

Re: Complaint regarding alleged Addition / Remodel
Violation of Humboldt County Code Sections 311-10; 312-3; 312-51.5 and 314-7.1
Assessment Parcel Number 204-171-047-000 Location: 2020 St Hwy 36, Hydesville
Property Zoning AE-20 (Agriculture Exclusive) 1576

Dear Property Owner:

By certified letter of February 9, 2007 you were advised of an apparent violation of the Humboldt County Code on your property, and were asked to contact our Department.

The Addition / Remodel will require building permits. Contact the Building Division to start the Permit process. If you have additional questions you may contact the Building Division at (707) 445-7245 or 1-800-900-4034.

As you have avoided and failed to respond in any manner perhaps more drastic measures are called for to enable us to remedy any violations.

It is your disregard of these notices that require these more drastic actions to abate a public nuisance. Under guidelines set forth in Humboldt County Code Section 2131, the Code Enforcement Unit, in addition to the issuance of a formal Notice of Nuisance, may issue an Order Imposing Administrative Penalty and record a Lis Pendens against your property to insure payment of any monetary awards which may be awarded after a proper hearing. It should be noted that under the Administrative Penalty Ordinance, each day of violation subjects the property owner to a separate penalty of between \$250 and \$10,000.

Please be advised that this will be the last notice to you before this matter is referred to the District Attorney Investigator for further proceedings. However, we would like to resolve this violation and you may contact us in writing or by phone at (707) 268-3702 **no later than April 2, 2007**, and avoid further enforcement action.

Thank you for your immediate attention to this matter.

Sincerely,
Community Development Services

LICENSED CONTRACTOR'S DECLARATION

I hereby affirm under penalty of perjury that I am licensed under provisions of Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code, and my license is in full force and effect.

License No. 675869 Contractor CROZIER DENNIS

License Class C10 Contractor X Dennis Crozier Date 7-14-97

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.);

I am exempt under Sec. _____, B.&P.C. for the reason:

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are: STATE FUND Policy Number 1413277-97

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers'-compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 7-14-97 Applicant: X Dennis Crozier

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.):

Lender's Name NONE

Lender's Address _____

Work will commence within 180 days after date of issuance of permit. Work stoppage for a period of 180 days or more requires permit renewal at one half the cost of the Building Permit Fees if requested within one year of stoppage. When we disagree on the use of alternate methods of construction, alternate materials or interpretation of the code, you may appeal. Ask for details.

I certify that I have read this application and state that the above information is correct. I agree to comply with all county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

Phil Nyberg, D.V.M.
105 Main Street
Fortuna, CA 95540-1840

Subject: Rental Dwelling 1576 Hwy 36

Dear Dr. Nyberg,

This is a follow-up to our conversation of April 8 and your letter of April 9, 2004. As I indicated during our conversation, the Division of Environmental Health (DEH) identified housing violations at the above rental dwelling during our inspection of November 12, 2003 (see enclosed inspection report). Violations noted include a broken window, faulty wiring on back of the house, a missing board on front porch, mold, and rodent access points into the dwelling. In addition diesel contamination outside the dwelling is a health concern due to the potential for indoor contamination.

As you indicated, you have possible renters who wish to perform additional work on the dwelling including repair of the above items. You also indicated that this may take up to six months. We request that once this work is complete you contact us to perform a follow-up inspection to clear the violations identified during our November 12, 2003 inspection. This should be done prior to occupancy. In addition, any remodeling work should be performed under a permit obtained from the Humboldt County Building Division. They can be contacted at 445-7245.

The extent of diesel contamination and the possible impact to groundwater should be investigated, but will not be overseen by our office. You do have the option of requesting oversight of the investigation and cleanup by our office. If you wish to request our review and sign off, then an agreement would need to be signed acknowledging the scope of work and the need to pay DEH's review time at an hourly rate (currently \$96).

If you have any additional questions, please contact me.

Sincerely,

Brian Cox, REHS
Director, Division of Environmental Health

Dear Mr. Cox:

Thank you for this mornings conversation regarding the issue of our 1576 Hwy 36 house.

After our conversation I realized that this was the first time I had been informed that there were other issues of record involving the occupancy of the house.

In the event that we choose to repair the building, I would appreciate you providing me a listing of the items of concern so that we may be sure all are accounted for in our improvements.

Thank you,

Phil Nyberg

Subject: Phil Nyberg

Phil Nyberg and I finally connected this morning concerning his rental at 1576 Hwy 36 in Alton. The former tenant has moved out and the property is vacant. I indicated to him that the contaminated soil is his responsibility, is primarily a liability issue for him as the property owner, and that our authority is limited in requiring clean-up. I also let him know that we have visited the site and that there were substandard housing issues that still needed to be resolved including a broken window, a missing board on the front porch, substandard wiring on the back porch, mold, missing heater, and other items. He also indicated that the front porch is contaminated with diesel, but said the dwelling is an old farm house which may need to be demolished or completely renovated.

He said that he has prospective tenants who would like to renovate the dwelling and live there rent free for five years, but was waiting for clearance from us on the contamination issue. The tenants would not move in for six months while they performed some of the renovation work. I said that he was clear to make this arrangement, but asked that he or the new tenants contact us prior to occupancy so that we can clear the substandard housing violations on record. He agreed to this.

We should send a letter to clarify the need to contact us prior to occupancy and that he should obtain the appropriate permits from Building Division.

Please let me know if you need any additional information.

Cox, Brian

From: Cox, Brian
Sent: Thursday, April 01, 2004 2:57 PM
To: Crandall, Phillip; Arnold, Jeff
Subject: RE: Nyberg Issue

Two of our staff visited the site. The first visit was based on a housing complaint. The housing inspector referred the diesel contamination to the haz mat inspector. After receiving the referral, our haz mat inspector, Jeff Birdsall visited the site and found a 3 x 4 foot diesel stain and received information that at least 30 gallons of diesel had been spilled on the site. He inspected the site in November 2003, verbally notified Mr. Nyberg in November of the situation, and wrote a notice of violation (NOV) in early January 2004 indicating in the letter that we had visited the site. We delayed the issuance of the NOV because Mr. Nyberg said in November that he could not access the property for 60 days. Jeff Birdsall had hoped that Mr. Nyberg would voluntarily clean up the property without sending a notice. Nyberg has been cooperative on another of his sites that was contaminated.

I have seen that Planning and Building will often send notices without visiting sites or confirming the facts, but the Division of Environmental Health always visit sites and confirms information before sending notices of violation.

I'm ready to call Nyberg to tell him that ultimately it is his responsibility to clean up the contamination as a property owner, that we do not need to oversee the cleanup. We are not mandated to require clean-up of contaminated sites, except in cases in which there is a specific immediate threat to human health and safety. For this site, the harm to future tenants and to groundwater is not really clear. The only way to know is if Mr. Nyberg commissioned an investigation of the extent of contamination. There are no specific public health protection standards for small spills of petroleum products. In many cases we would refer contamination concerns to the state, however this one is too small for the state to respond. The laws relating to groundwater contamination mostly concern the responsible party's future liability, which in many cases is ultimately decided by the courts.

We can discuss this on Monday and go over the file. I've discussed with staff that they need to be more proactive in keeping me informed of these issues before they escalate, but we can't always predict which ones will become volatile. And yes, we are all innocent until proven guilty.

Roger said that Nyburg received a letter from the County (EH) that he had contaminated land. He said that the County took the word of a former tenant of the property that there was contamination. Nyburg said that the County never even came out to visit before sending him the letter, asking that Nyburg test the soil for contamination, send the results to the County, and finally clean up the property. I hope we didn't do that..... aren't we innocent until proven guilty?

Dear Roger:

I'm passing this stuff along to you in the hope that there is some way some common sense might be instilled in this, the waste of your County agencies.

If they could just accept that nothing is or needs to be perfect and that questionable, non-recurrent, probably non-existent problems might be overlooked, they just might not drive every productive human being out of this county.

Thanks for anything you can do.

Eureka, CA 95501

Dear Mr. Birdsall:

I have just returned to work following hip replacement surgery and am responding to your letter of February 27, 2004 which was delivered in my absence.

My purpose in responding is to re-iterate that I do not accept the premise that there, in fact, is diesel contaminated soil located on my property at 1576 Hwy. 36 in Fortuna California.

As you were previously notified, when our tenant was evicted we removed the diesel drum in question along with the makeshift lines going to his "grow operation" from the front porch of the house. Inspection of the area adjacent to the porch reveals normal vegetation which would not be the case with contaminated soil.

The idea that you are pursuing an improbable case of "contamination" based on the report of a disgruntled, pot growing former tenant frankly outrages me. In the unlikely event that Mr. Mehrten's criminal activity did result in any spillage that reached the soil through the porch, it would truly be minimal and you are effectively asking me to tear the house down to find out.

There are, I'm sure, environmental issues before your department that have merit and potential deleterious consequences to our County. This is certainly not one of them.

At a time when County Government funding is at a premium, it would seem that the policy of harassing citizens over issues as minor and questionable as this one would be re-evaluated and resources concentrated on situations of meaningful impact. I would certainly hope the County's budget-setting process will express the need for some sort of common sense in department operations.

Once again, the source of the potential problem has been removed. I have seen no evidence that there has been spillage involving the soil.

Sincerely,

Phil Nyberg

INSPECTED BY: **Larry Lancaster**
 PERSONS PRESENT DURING INSPECTION: **Don Mehrten**
 COPY PROVIDED TO: _____
 FOR OFFICE USE ONLY:
 DATA ENTRY: _____ PAGE **1** OF **1**

**THE FOLLOWING VIOLATION CATEGORY SECTIONS ARE REQUIREMENTS
OF THE CALIFORNIA HEALTH & SAFETY CODE**

INSECTS - Eliminate insects (cockroaches, flies, fleas, etc.) and all evidence of insects by safe, legal, and effective methods. Eliminate vermin harborage conditions by sealing cracks and crevices in walls, cabinets, etc.

RODENTS - Eliminate rodents through safe, legal, and effective methods. Rodent-proof exterior and unit entry doors to eliminate gaps greater than ¼". Seal all openings at walls, floors, ceilings, inside cabinets, and around gas and plumbing lines. Eliminate evidence of rodents.

WATER SUPPLY - Provide adequate hot (110°F) and cold running water under pressure to all plumbing fixtures at all times.

PLUMBING - Maintain all plumbing lines and plumbing fixtures free from defects. Properly repair or replace all loose, leaky, clogged or otherwise faulty plumbing lines.

STAIRS - Repair/replace all loose, missing, or damaged balustrades, balusters, handrails, treads, or risers at stairways and stair landings.

WALLS - Repair/replace all water damaged, broken, cracked, buckled, missing, peeling, blistered, or deteriorated walls, wall coverings (including areas within cabinets or behind drawers), and doors.

FLOORS - Repair/replace all torn, deteriorated, worn, loose, damaged, cracked, uneven, or warped floors or floor coverings.

CEILINGS - Repair/replace all water damaged, broken, cracked, missing, peeling, blistered, sagging, or deteriorated ceilings or ceiling covering.

ELECTRICAL - Repair/replace all damaged, defective, worn, or missing electrical wiring, outlets, or switch plates.

POOL/SPA - Maintain the swimming pool and area clean and in good repair. Provide required signs and safety equipment. (CA H & S)

TOILETS - Repair/replace all damaged, missing, cracked, broken, malfunctioning, or deteriorated toilets and their components.

SINKS - Repair/replace all damaged, missing, broken, malfunctioning, cracked or deteriorated sinks (including worn enamel) or sink fixtures.

BATH/SHOWERS - Repair/replace all damaged, missing, broken, cracked, malfunctioning, or deteriorated baths/showers or their fixtures.

COMFORT HEAT - Provide comfort heat (70°F) to all dwelling units in accordance with all local building requirements. Repair/replace any damaged, broken, malfunctioning, or deteriorated comfort heating units. (CA H & S 17920.3)

APPLIANCES/FURNISHINGS - Maintain all owner-furnished appliances and furnishings in good condition or repair.

OCCUPANCY - Areas such as closets, pantries, toilet rooms, service rooms, garages, laundries, connecting corridors, unfinished attics, cellars and similar spaces are not allowed for human occupancy.

LIGHTING - Repair/replace all damaged, malfunctioning, missing or deteriorated required lighting fixtures and their components.

WINDOWS/VENTILATION - Repair/replace all damaged, broken, cracked, torn, inoperable, malfunctioning, missing, or deteriorated windows, ventilation units, window screens, or their components. Window screens shall be 16" mesh or smaller in tight fitting frames.

REFUSE AREA - Store all garbage and refuse in appropriate containers with tight-fitting lids. Garbage shall not be kept for more than 7 days. Rubbish may not be kept for more than 15 days. Maintain trash areas and containers clean and in good condition.

SANITATION - Maintain the building, dwelling units, and the premises free from debris, rubbish, garbage and other offensive matter. All usable material, including wood, shall be stored off the ground not less than 18 inches to prevent rodent harborage. Animal, fowl or bird other than cats, dogs, canaries and birds of the Psittacine family are required to be kept at least 35 feet from any food establishment or dwelling and more than 100 feet from any school or hospital.

MAINTENANCE - Maintain the building (s) and all units in good repair.

ROOF - Repair/replace damaged, missing, or deteriorated roof or roof covering.

VENT SCREENS - Provide corrosive resistant wire mesh screen with openings no larger than 1/16 of one square inch in a tight fitting frame to all foundation vent openings and all other openings in building to prevent the entry of vermin.

CALIFORNIA STATE FRANCHISE TAX BOARD WARNING

Sections 17274 and 24436.5 of the State Revenue and Taxation Code provide; in part, that a taxpayer, who derives rental income from housing determined by the local regulatory agency to be substandard by reason of violation of state or local codes dealing with health, safety, or building, cannot deduct from state personal income tax and bank and corporation income tax, deductions for interest, depreciation or taxes attributable to such substandard structure where the substandard conditions are not corrected within six (6) months after notice of violation by the regulatory agency. THE DATE OF THIS NOTICE MARKS THE BEGINNING OF THAT SIX-MONTH PERIOD. The Department is required by law to notify the Franchise Tax Board of failure to comply with these Code sections.

Please be advised that the above WARNING is for the purpose of compliance with the State Revenue and Taxation Code only. Compliance with Health Laws as noted on the attached Inspection Report or Notice of Violation must be made within the time specified on the Report or notice.

LEAD CORRECTION ADVISORY

WARNING: You are hereby advised that corrections ordered by this report/official notice may disturb surfaces that may contain lead-based paint. Lead-based paint can be commonly found in housing built prior to 1978.

Prior to making any corrections ordered and in conjunction with repairs or rehabilitation, you must determine if lead is present in the dwelling unit/apartment/room. All corrective actions must be conducted in a manner that will protect occupants, workers, and others from exposure to contamination.

OTHER INDOOR ENVIRONMENTAL HAZARDS

Exposure to internal environmental elements such as asbestos, molds and mildew, dust mites, droppings from cockroaches and rodents, carbon monoxide, formaldehyde, pesticides, and radon also contribute to unhealthy housing environments. All corrective actions must be conducted in a manner that will protect occupants, workers, and others from exposure to these elements.

Subject: Illegal Disposal of Hazardous Waste

Location: 1576 Highway 36, Hydesville, CA

Dear Mr. Nyberg:

This letter is in response to your letter dated February 17, 2004. The letter sent to you by Humboldt County Division of Environmental Health (DEH) on January 6, 2004 required that you have the diesel-contaminated soil on your property excavated. Additionally, you were to have disposed of the contaminated soil as hazardous waste or have it characterized by laboratory analysis for disposal and provide copies of receipts to DEH verifying legal disposal by February 27, 2004.

DEH does not concur with your statement that the contaminated soil does not constitute a public health or environmental risk. Additionally, the extent of contamination cannot be determined until the excavation has commenced and the area where the spill occurred has been made more accessible.

DEH will provide you with an extension until March 14, 2004 to submit copies of receipts to our office.

Please feel free to contact me at (707) 268-2234 if I may be of assistance in this matter.

Sincerely,

Jeff Birdsall, REHS

Jeff Birdsall, REHS
Humboldt County Department of Health and Human Services
Division of Environmental Health
100 H Street, Suite 100
Eureka, CA 95501

Dear Mr. Birdsall:

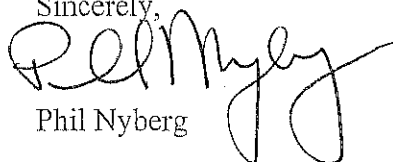

This letter is in reference to our telephone conversation in November 2003 and your subsequent letter of January 6, 2004.

As you are aware, at the time of your call we were in the process of evicting Mr. Mehrtens from 1576 Hwy 36, where he was using the illegal diesel setup you described to heat and light his extensive upstairs marijuana growing operation. His response was to move his plants, notify you he had spilled diesel and refuse to deal with the issue. The eviction has since been completed, the abandoned drums and lines removed and properly disposed of.

It appears that the magnitude of the alleged spillage was overstated by Mr. Mehrtens simply as a way to make his eviction as troublesome as possible and does not constitute a public health or environmental risk. The massive debris has been removed and plans are underway to dismantle or burn the house itself.

I trust that you will concur that this matter should be closed as having either no or insignificant public health or environmental implications.

Sincerely,

Phil Nyberg

Fortuna, CA 95540

Subject: Illegal Disposal of Hazardous Waste

Location: 1576 Highway 36, Hydesville, CA

Dear Mr. Nyberg:

On November 14, 2003, Humboldt County Division of Environmental Health (DEH) responded to a complaint at the above location. DEH observed three fifty-five gallon drums of diesel fuel stored on the porch of the house. There was a plastic line delivering fuel from one of the drums to what the tenant of the property said was a "fire monitor heater" in the home. DEH observed soil contaminated with diesel fuel below the porch on the southwest side. DEH was not able to observe if there was additional contamination under the porch due to inaccessibility. DEH told the tenant what corrective actions were needed and the tenant refused to agree to make them.

The illegal disposal of hazardous waste on your property presents a risk to public health and the environment, and constitutes a violation of the laws of Humboldt County and the State of California. DEH requires that all the diesel contaminated soil be excavated and disposed of as hazardous waste or be characterized by laboratory analysis for disposal. Provide receipts verifying lawful disposal to this office by February 27, 2004. I have included a partial list of local contractors and hazardous waste disposal information for your convenience. DEH recommends that the drums on the porch be stored in a more secure manner in order to prevent any potential additional releases.

Please feel free to contact me at (707) 268-2234 if you have any questions or if I may be of assistance.

Sincerely,

Humboldt County Division of Environmental Health
100 H Street, Suite 100
Eureka, California 95501

Subject: Phase II Subsurface Investigation Workplan at the Former Eel River Lumber Products, Mill C, Highway 36, Alton, California

Dear Mr. Crawford:

SCS Engineers is pleased to present this letter workplan for a Phase II Subsurface Investigation at the Former Eel River Lumber Products, Mill C, Highway 36, Alton, California. The proposed work includes advancing four borings at the locations illustrated on the attached site plan and submitting the samples for laboratory analyses

A. Methodology

The borings will be advanced using 7 to 8-inch hollow stem augers to an approximate depth of 20 to 25 feet bgs, depending on depth to groundwater. One soil sample will be collected from borings B-2, B-3 and B-4, from the approximate groundwater interface or at the discretion of the field geologist. The soil sample sleeves will be covered with Teflon sheeting, sealed with plastic end caps, labeled, and placed in an ice chest. The soil sample(s) will be transported to a California-certified analytical laboratory using proper chain-of-custody protocol. An SCS geologist will log the soil from the borings in general accordance with the Unified Soil Classification System.

A grab groundwater sample will be collected from the borings using a separate disposable bailer for each boring. Depending on apparent water quality and hole stability, a temporary screen may be placed in the boring prior to collection of the grab groundwater sample. The samples will be properly labeled and placed in a cooler with ice, and transferred to a California-certified analytical laboratory using proper chain-of-custody protocol.

The soil borings will be backfilled to the surface with low permeability material in accordance with HCDEH requirements after sampling is completed in order to minimize vertical fluid migration within the boreholes.

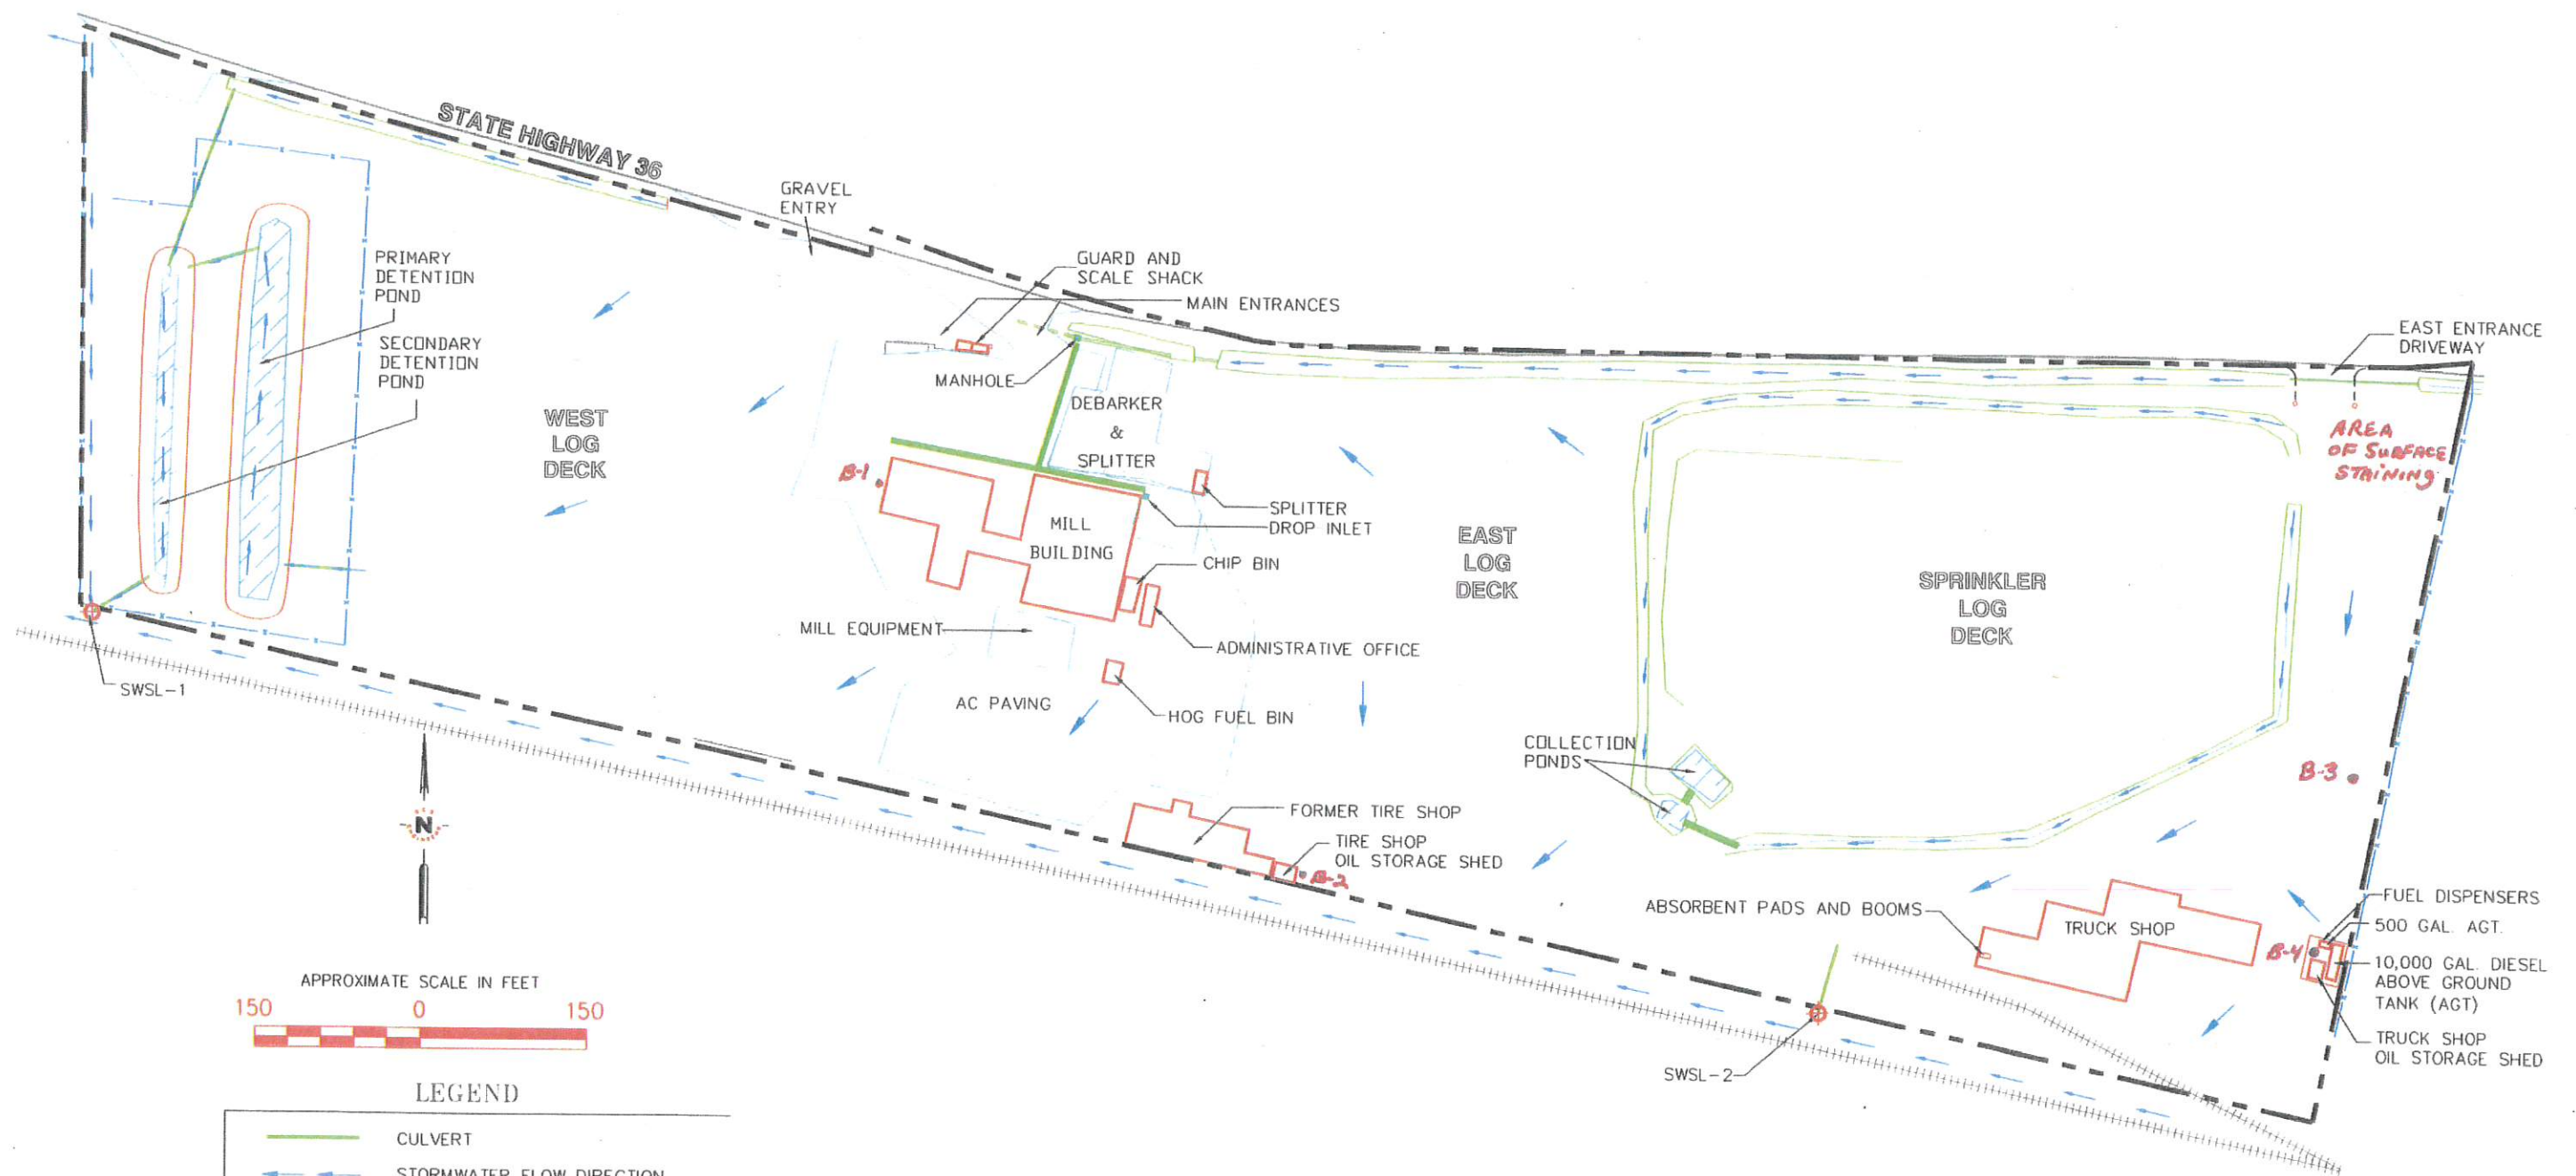

Mr. Norman Crawford

RE: Underground tank closure Sawmills A, B, and C.

Dear Mr. Campbell:

This department has received contradictory reports regarding the soil analysis and the contractor failed to call for inspection as agreed on the permits.

For the above stated reasons the previous "sniff test" is not acceptable.

Please provide the appropriate soil sample analysis according to the enclosed information within thirty (30) days.

Verification of disposition of the tank by a manifest or receipt is also required before final approval.

Sincerely,

RE: Tank Closure - Eel River Sawmills A, B, C

Dear Jim:

Per your letter of September 13, 1988 the following additional information relative to the above listed closure is submitted:

- Item 1 - Soil sample analysis - Allan Baird performed sniff tests - See attached waiver form.
- Item 5 - We completed the closure of this facility during the month of November 1987. The final inspection can be made at your convenience.
- Item 6 - Rinsate Disposal - See attached letter.

Sincerely,

David W. Morris
President

Re: Underground tank closures Mills A, B, C

Dear Mr. Campbell:

This department will be unable to give final approval of your underground storage tank closure until the following information is received:

1. Soil sample analysis results.
2. Passing precision tank tightness test within one year of physical closure date.
3. Copy of manifest showing delivery of hazardous materials to an approved disposal site.
4. Soil sample boring log.
5. Call for final inspection.
6. Other:
 1. Rinsate disposal
 2. Permit has expired

Please provide the above indicated items to this department within fifteen (15) days.

Sincerely,
Paul W. Anderson, M.D., M.P.H.

RE: EEL RIVER SAW MILLS
3 - UNDER GROUND TANK
1 - SEMI ABOVE GROUND
TANK CLOSURE

ATTENTION: Jim Clark

Dear Jim,

We are requesting a waiver for an abandoned and filled fuel storage tank belonging to E. R. S. M. in FORTUNA / RIO DELL. We augered test holes and took samples of soils from approximately 2' feet deep and 5' feet deep. We detected no odor of gasoline or other petroleum substances by smell in either of our samples taken. Therefore, we are requesting a waiver based on the lack of the vapors from petroleum substances. We have the samples stored here at our office.

If you need additional information, feel free to call us at 725-5182. Thank you.

Sincerely,

Alta M. Baird

Mr. Dave Frye
Eel River Sawmills
1053 Northwestern Avenue
Fortuna, CA 95540

Dear Mr. Frye:

This letter is to confirm my inspection of Eel River Sawmills, Mill C in Alton. The purpose of the inspection was to verify the compliance of the facility with Waste Discharge Requirements Order No. 85-113. My observations during the inspection verify that the mill is being operated in compliance with Order No. 85-113.

During the inspection we discussed the abandoned underground tank at the mill. As we discussed, it would be recommendable to coordinate with the Humboldt County Health Department to properly abandon the tank.

Sincerely,

ORIGINAL SIGNED BY

Cathleen A. Goodwin

Gentlemen:

The Humboldt County Air Pollution Control District requires permits for gasoline storage tanks with capacities greater than 250 gallons. Since you are now the owners of the sawmill at Alton, the permit, H-V005, issued to Halvorsen Lumber Products is no longer valid and needs to be reissued under your ownership. Please complete the enclosed application for transfer of ownership and return with the \$10.00 transfer fee. Also complete applications for gasoline storage tanks at your sawmills near Rio Dell and Redcrest; we don't have permits issued on these (no fee required). The attached diagram illustrates a submerged fill pipe which is required in gasoline storage tanks installed after January 1, 1971.

Sincerely,

To: Shilpa Sunil
Subject: 1576 Hwy 36

Hi Shilpa, I just got into my database. Looks like we have a business, Steve Wills Trucking and Logging at that address (CERS ID 10020253). However, it appears that business operations for them occur on APN 204-171-003, not on any of the parcels you cited (204-081-002, -004, -007). Anyway, not sure if that helps or confuses, feel free to call to discuss, and again, when I get into the office this Thurs Apr 9, I will see if I can glean any more info from any paper files.

Thanks,

Norm (707) 599-4788

Hello Shilpa-

The parcels in question are zoned Agriculture Exclusive and appear to be engaged in agricultural use. It is not clear whether it is hay production, cattle grazing or a combination of both. I hope that answers your question. If you need any additional information, feel free to reach out.

Thanks.

APPENDIX G

PROJECT PERSONNEL QUALIFICATIONS

J. Ryan Terwilliger

Operations Director, West Coast

EDUCATION:

B.S. Environmental Science, University of Southern California, Los Angeles, CA -2006

CERTIFICATION:

Cal-OSHA Certified Asbestos Consultant
CDPH Accredited Lead
Inspector/Assessor/ Project Monitor

CA Certified Site Surveillance Technician
OSHA 40 - Hr HAZWOPER

YEARS OF EXPERIENCE:

With Hillmann: 6 years

Total: 12 years

PROFESSIONAL EXPERIENCE:

Mr. Terwilliger is responsible for business operations, fiscal management and field staff management for Hillmann's California Office. He also performs asbestos surveys and investigations to identify asbestos and lead materials associated with occupational hazards. He supervises work practices and controls in accordance with job specifications, current EPA, OSHA and State Regulations for Asbestos remediation projects in commercial, industrial and multi-family residential buildings. Mr. Terwilliger performs IAQ, mold and moisture investigations in commercial, industrial and residential facilities nationwide. He also performs awareness training for asbestos, lead and microbial agents. Mr. Terwilliger provides litigation support consultation.

Representative Experience Includes:

Tishman Speyer Properties, Various locations: Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include environmental health and safety, industrial hygiene, phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs and indoor air quality programs on various commercial, industrial and multi-family residential properties. Mr. Terwilliger is an Environmental Scientist on this contract, conducting on-site environmental services including phase I site assessments and NPDES water quality testing.

Westfield – Environmental Program, Various locations:

Since 2000, Hillmann has been providing an environmental program encompassing environmental health and safety, Phase I environmental site assessments, asbestos and lead surveys, air monitoring, bid administration and O&M programs, industrial hygiene and indoor air quality programs, and hazardous materials assessments on their mall properties throughout the county. Mr. Terwilliger is an Environmental Scientist on this contract performing industrial hygiene services that include indoor air quality monitoring, Phase I environmental site assessments, asbestos and lead surveys.

Brookfield Office Properties, Various sites, CA: Hillmann has been providing hazardous materials surveys, development abatement specifications, and managing the oversight activities during the abatement at various Brookfield owned sites throughout California. Mr. Terwilliger functions as a Project Manager for this contract.

California Department of Transportation, Central Valley and Northern CA: Hillmann has been performing asbestos and Lead-based Paint Surveys for the California Department of Transportation. Performed comprehensive asbestos containing materials and lead-based paint surveys of residential and commercial buildings that were slated for demolition and generated report of findings in order to aid the Department of Transportation (DOT) in facilitating the road improvement programs and building renovations throughout the

Central Valley area. Also during the abatement of asbestos from DOT owned buildings, provided contractor oversight and air monitoring services for regulatory compliance.

Verizon, Various Sites, CA. Hillmann conducted hazardous materials surveys, development abatement specifications, and project monitoring during abatement at various Verizon owned sites throughout California. Mr. Terwilliger functioned as the Project Manager.

Public Storage, Los Angeles, CA: Hillman performed comprehensive asbestos, lead-based paint and universal waste materials survey of commercial and industrial buildings throughout Southern California. Hazardous materials surveys were conducted prior to renovation for the storage units. Mr. Terwilliger developed abatement specifications and managed the abatement activities during the renovations of the buildings. He functioned as the Project Manager on this contract.

RE: Phase I Environmental Site Assessment
20-034 North Coast Highway Solar
CA Highway- 36
Hydesville, California 10065
Hillmann Project No: C3-8302

Dear Mr. Albert:

Hillmann Consulting LLC is pleased to provide the results of our Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in general accordance with the scope and limitations of ASTM Practice E1527-13, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 714-634-9500.

Sincerely,

Hillmann Consulting, LLC

UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of parcels CA Highway- 36, Hydesville, California (the Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-13 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:	CA Highway- 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/ Agricultural land				
Approx. Property Area:	Total ~78.89 acres				
Buildings/# of Floors	A barn on the northeast parcel 204-171-047; no structures are present on the remaining parcels				
Approx. Building Area:	Barn: approximately 2,800 SF				
Approx. Year Built:	1940s				
Commercial Occupants:	None				
Current Use:	Vacant lot				
Prior Uses:	Agricultural				
Inspected By:	Mr. Ryan Terwilliger				
Site Contact/Company:	Mr. Rafik Albert / EPD Solutions, Inc.				
Site Escort/Company:	Unescorted				
Inspection Date:	January 30, 2021				
Weather Conditions:	Overcast, 45° F

1.3 Findings, Opinions and Conclusions

1.3.1 Recognized Environmental Conditions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

RECOGNIZED ENVIRONMENTAL CONDITIONS	
REC#1	The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be soil vapor risk and REC to the Property.
HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No HRECs were identified.

CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No CRECs were identified.
SIGNIFICANT DATA GAPS	
	No SDGs were identified.

1.3.2 REC Response Action Recommendations

The following table presents recommended response actions to the identified RECs for further investigation and/or corrective action:

REC RESPONSE ACTION SUMMARY TABLE	
REC	Response Action
REC #1	No additional action at this time. If the Property is planned in the future for redevelopment with inhabited buildings, additional investigation should be conducted to assess potential subsurface impacts from the west-northwest adjoining site.

1.3.3 Notable Environmental Conditions / De Minimis Conditions

The following environmental conditions were identified, but are not considered to be a REC in connection with the Property:

NOTABLE ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS	
1.	The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Due to a concern of shallow soil impacts resulting from cumulative applications of pesticides at the site, limited soil sampling and analysis was conducted at the time of the Phase I ESA site inspection. Hillmann collected fifteen (15) composited soil samples at depths of 0.5 and 2.0 feet below ground surface in order to determine the presence of any subsurface contamination. The results indicated low concentrations of heavy metals, which were all below applicable residential screening levels. No OCP compounds were detected above method detection limits. The analytical results are included in Appendix F. Based on the results of the limited soil testing, the historic agricultural uses/nursery of the Property are not considered to be a REC in connection with the Property. A detail discussion of the soil sampling results can be found in Section 7.7.
2.	Although not directly observed during site reconnaissance, based on the historic residential use and agricultural use, Hillmann suspects the possible presence that a septic system serviced the former residence on the Property. Hillmann recommends proper closure and removal of this prior to redevelopment.
3.	Hillmann observed a sprinkler and water pump on the Property.
4.	The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however, there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.
5.	A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation, of Humboldt County Codes. The violations were closed on April 6, 2007.
6.	The adjoining property at 1576 CA-36 (Steve Wills Trucking and Logging) was listed under CERS ID 10020253. This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. However, per Humboldt County records, it appears that business operations occur on APN 204-171-003, and not on any of the Property parcels (204-081-002, -004, -007). A letter dated January 6, 2004 indicated DEH observed three 55-gallon drums of diesel on the front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations.
7.	The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) The site was formerly occupied by Eel River Lumber Products saw mill early 1970s. A 550-gallon underground storage tank installed in 1979 was

	<p>removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of a 10,000-gallon diesel above ground storage tank, a 550-gallon gasoline above ground storage tank, a 200-gallon kerosene above ground storage tank, a 500-gal waste oil drum, a 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of a Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four borings to test TPH-g, TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and REC to the Property.</p> <p>The 1576 CA-36 site was also listed on the CUPA and WDS databases. The CUPA listing identifies Facility ID # FA0003173 with a current status listed as "01 – Active", a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.</p>
8.	<p>Reynolds RV Repair at 988 Highway 36 is listed under CPS-SLIC, CUPA and CERS database. The site is located approximately 2,571 feet west northwest of the Property. The CPS-SLIC listing indicates site as an open SLIC case undergoing site assessment dated 12/29/2016. Based on the distance and groundwater gradient this listing is not considered to be REC to the Property.</p>

1.3.4 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

David Rutherford
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as “Non-ASTM Scope concerns”, in accordance with the contracted scope of work scope for this assessment. The following is a summary of findings for applicable BERs. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
Subject	Findings	Not Appl.	Rep. Ref.
Asbestos		X	7.1
Lead Paint		X	7.2
Radon	Property is located in a Radon Zone 3 – an USEPA designation for an area with low potential for elevated indoor radon levels to occur.		7.3
Mold / Microbial Damage		X	7.4
NWI Wetlands	No mapped wetland areas were depicted at the Property.		4.1
Lead in Drinking Water	No potable water service at the Property is provided at the Property.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E1527-13. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The primary goal of the processes established by ASTM E1527-13 is to identify *recognized environmental conditions* in connection with the Property.

The term *recognized environmental condition (REC)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The ASTM has also defined the terms *historical recognized environmental conditions* and *controlled recognized environmental conditions* as two additional types of RECs. The term *historical recognized environmental condition (HREC)* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls or engineering controls).

The term *controlled recognized environmental condition (CREC)* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Conditions determined to be “*de minimis conditions*” are not considered to be RECs, HRECs or CRECs. *De minimis condition* is defined by the ASTM, “...as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Property.
- A review of standard physical record sources for available topographic, geologic and groundwater data.
- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier.
- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.1.1 Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-13 standard:

Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if more certainty is desired regarding ACM and potential asbestos hazards at the Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Property.

Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Property for evidence of systemic microbial problems, including visible mold

growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Property.

NWI Wetlands: Review of US Fish and Wildlife Service National Wetland Inventory digitized data of mapped wetlands as presented in the attached EDR Radius Map plus Geocheck Report.

It is emphasized that, regardless of the wetlands data obtained via the EDR Geocheck-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	CA Highway- 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Approx. Land Area:	Total ~78.89 acres				
Apprx. Latitude/Longitude:	North 40.545510 degrees/West 124.1156560 degrees				
Additional Details (if appl.):	Property consists of four adjoining parcels with the perimeters being fenced off on all sides.				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/ Agricultural land				

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Property was not documented. Record gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 User Reliance

This report is for the exclusive use of the User(s) named on the front cover. No other party(ies) shall have any right to rely on the content of this report without first obtaining the consent of the original report User; and without obtaining written consent from Hillmann in the form of a letter of reliance or report recertification.

2.5 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Property owners/occupants and/or site escort at the time of the site visit.
- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Property and immediate surrounding area.

2.6 General Limitations and Exceptions

2.6.1 Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, are further specified in Section 4.4.

Significant limitations related to the condition or accessibility of the Property at the time of the site reconnaissance, if encountered, are reported in Section 5.1.

2.6.2 Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-13 are reported.

2.6.3 Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Property contact(s) or as shown on any documents reviewed or received from the Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The regulatory research is designed to meet the requirements of ASTM Standard E1527-13. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-13 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

The recommended response actions to the identified RECs presented in Section 1.3, if any, are not intended to represent the only course(s) of action to take; nor does it imply any opinion as to the timing of the action. Furthermore, it is emphasized that additional response actions may become warranted depending on the outcome of the initial action(s) taken. Hillmann advises that consultation with legal counsel familiar with environmental and real estate law may be beneficial to the decision making process for the type and timing of a response action to identified RECs, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term “User” is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Property; specifically, the entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

The following prior environmental reports/documentation was provided:
Phase I Environmental Site Assessment, 20-034 North Coast Highway Solar, 204-081-002, -004,-007 and 204-171-047, CA Highway-36, Hydesville, CA 10065; prepared by Hillmann Consulting, dated December 11, 2019. The report concluded the following regarding RECs:

“Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the Property, except for the following:

Recognized Environmental Conditions (RECs):

- *The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.*
- *The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be vapor risk and REC to the Property.*

Historical Recognized Environmental Conditions (HRECs):

- *No HRECs were identified.*

Controlled Recognized Environmental Conditions (CRECs):

- *No CRECs were identified.*

Hillmann recommends to perform a limited Phase II investigation for pesticides only. However, if the Property is ever redeveloped for uses other than a solar farm, a limited Phase II should be conducted to determine whether the Property has been impacted by the west-northwest adjoining site.”

3.2 User Questionnaire

Section 6 of the ASTM E1527-13 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-13 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
<p>Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?</p>	NR	
<p>Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?</p>	NR	
<p>Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?</p>	NR	
<p>Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?</p>	NR	
<p>Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,</p>		
<p>-Do you know the past uses of the property?</p>	NR	
<p>-Do you know of specific chemicals that are present or were once present at the property?</p>	NR	
<p>-Do you know of spills or other chemical releases that have taken place at the property?</p>	NR	
<p>-Do you know of any environmental cleanups that have taken place at the property?</p>	NR	
<p>The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?</p>	NR	
<p>Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous</p>	NR	

Question:	Yes/No:	Detail:
substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.		

NR-no response

3.3 Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-13, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Physical Setting Sources

The following physical setting sources were reviewed:

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 111 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the south-southwest. The closest water body is Wolverton Gulch to the east and Van Duzen River, located approximately 1,100 feet to the west-southwest.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Property is classified as "Ferndale". This soil type is described as silt loam surface texture with soils moderately fine or fine textures with a slow infiltration rate.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Quaternary System, and Quaternary Series.
Prior Env. Reports: (Section 3.1)	No additional relevant site specific geologic data was noted from a review of the prior environmental reports listed in Section 3.1.
Additional Sources/Data:	No additional physical setting sources or data was obtained.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the south-southwest.
NWI Wetlands Data: (EDR Geocheck-Physical Setting Source Addendum)	A streamside Management Area - Wolverton Gulch is depicted along the eastern edge of the Property.

4.2 Historical Use – Property and Adjoining Properties

Research has been conducted in an attempt to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.2.1 Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
	Property:	(no coverage)	
	Adjoining:		

A copy of the Certified Sanborn Map Report is attached in Appendix D.

4.2.2 City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Property’s street address. The following is a generalized summary of the findings of city directory research for past occupants of the Property.

Property	
Use(s) / Occupant(s):	Years
None identified	

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	Years
Mix of residential and commercial occupants	1992 - 1998
Trucking & Logging	2010 - 2017

A copy of the EDR City Directory report is attached in Appendix D.

4.2.3 Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix D) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Summary	
1944	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	No improvements are depicted
1959, 1972	Property:	Unmapped
	Adjoining:	Unmapped
1979	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	Burners and commercial structures and Rohnerville Airport are depicted to the northwest and west-northwest
2012	Property:	No improvements are depicted.
	Adjoining:	Rohnerville Airport is depicted to the north-northwest

4.2.4 Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix D, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary of Interpretation	
1941	Property:	Agricultural use and a barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east
	Adjoining:	Agricultural use
1954, 1968, 1972	Property:	Agricultural use and a barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east
	Adjoining:	Agricultural use, commercial structures, and vacant land
1983, 1989, 1998, 2005, 2009, 2012, 2016	Property:	Agricultural use and a barn like structure are depicted at the northern portion. Railroad track to the north and a streambed is depicted to the east
	Adjoining:	Residential and commercial trucking is evident to the northwest.

4.2.5 EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.3, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	None
Historic Auto: (on-site/adjoining only)	None	None
MGP: (1-mile distance)	None	None

4.2.6 Petroleum/Natural Gas Well Review

The historical record sources and the California Division of Oil, Gas, and Geothermal Resources (DOGGR) online mapping application were reviewed for records of historic petroleum and/or natural gas wells at the Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

4.2.7 Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.1)	Not applicable; no prior reports were provided.

Site Observations:	The site is currently used as cattle pasture. Hillmann observed a water pump. The surrounding vicinity characteristics undeveloped land/ agricultural land and commercial uses.
Other Sources:	No additional pertinent historical data was obtained.

4.2.8 Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Property:

Property	
Date Range	Use
1941 to 2012	Agricultural use
2012 to 2016	Vacant land

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	Use
1941	Agricultural use
1954 to Present	Undeveloped land, agricultural use and trucking yard
1998 to Present	An airport, commercial, light industrial and undeveloped

4.2.9 Historical Records Data Failure

The ASTM E1527-13 standard defines data failure as a failure to achieve the ASTM specified historical research objectives after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions should be sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval.

Objective	Met?	Detail	Significant?
First developed use/date determined?	No	The earliest documented use of the Property was agricultural uses in 1941	No
Record sources at 5-year intervals back to 1940 or first developed use?	Yes	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Section 4.2.8.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

4.2.10 Historic Uses REC Discussion

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

The Property was historically developed for agricultural use as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Due to this, Hillmann collected sixty (60) soil borings which were composited into fifteen (15) soil samples in order to determine the presence of any subsurface contamination from pesticides or Title 22 Metals. The borings were collected between 0.5 and 2 feet bgs. The samples all appeared visually clean with no discernable odor. Soil samples collected were preserved for analysis in laboratory jars, sealed with Teflon tape and plastic end caps, wrapped in aluminum foil and stored on ice. Samples were submitted to A&R Laboratories in Ontario, California for laboratory analysis of organo-chlorine pesticides (OCP) by EPA Method 8081A, analysis of Title 22 Metals by EPA Method 6010B as recommended by DTSC guidance. The results indicated no detectable levels of OCPs, as well as no elevated levels of heavy metals. The complete lab report can be found in Appendix F. Due to this; the historic usage of the Property as agricultural land is not considered to be a REC in connection with the Property.

The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be soil vapor risk and REC to the Property. No additional action at this time. If the Property is planned in the future for redevelopment with inhabited buildings, additional investigation should be conducted to assess potential subsurface impacts from the west-northwest adjoining site.

4.3 Standard Environmental Record Sources

A regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT was obtained and reviewed. The report provided a search of standard environmental record sources for listings of the Property, adjoining properties and sites within the surrounding area; and has been reviewed for the purpose of identifying listings suggesting a potential impact to the Property due to presence or migration of hazardous substances and/or petroleum products. Additional descriptions of the meaning and significance of the regulatory databases can be found in the regulatory database report in Appendix E. The EDR Radius Map™ Report provided a search of the following database categories in accordance with the requirements of the ASTM Standard E1527-13:

Regulatory Database	Search Distance
Fed. National Priorities List (NPL/a.k.a. "Superfund" sites) & Proposed NPL	1-mile
Fed. Delisted NPL	½-mile
Fed. Superfund Enterprise Management System (SEMS; formerly CERCLIS)	½-mile
Fed. SEMS-ARCHIVE (formerly known as CERCLIS NFRAP)	½-mile
Fed. RCRA Corrective Action Sites (CORRACTS)	1-mile

Fed. RCRA Transport/Storage/Disposal (TSD) sites	½-mile
Fed. RCRA Generators (LQG, SGQ & CESQG)	Site & Adjoining
Fed. Institutional Control/Engineering Control (IC/EC) Registries	Site only
Fed. Emergency Response Notification System (ERNS)	Site only
State/Tribal Hazardous Waste Sites (SHWS)	1-mile
State/Tribal Landfill and/or Solid Waste Disposal (LF/SWF)	½-mile
State/Tribal Leaking Storage Tanks	½-mile
State/Tribal Registered Storage Tanks	Site & Adjoining
State/Tribal IC/EC Registries	Site
State/Tribal Voluntary Cleanup Sites	½-mile
State/Tribal Brownfields	½-mile
Additional Federal, State, Tribal and Local Environmental Databases	Variable

Reported distances for adjoining listings discussed in Section 4.3.4, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients indicated where applicable in Sections 4.3.4 and 4.3.5 have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

4.3.1 Supplemental Database Listings

The regulatory database report was also reviewed for listings on supplemental databases, in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases of significant concern, if identified, is discussed in Sections 4.3.3 and 4.3.4. Otherwise, none of the other supplemental database listings identified by the regulatory database report are considered to be a REC in connection with the Property.

4.3.2 Limited Tier I Vapor Encroachment Screening

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions” (ASTM E 2600-15); and also on elements of “Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources” (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Property in the up-gradient direction, 365 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Property in the up-gradient direction, 165 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Property, if any, are identified and discussed in Sections 4.3.3, 4.3.4 and 4.3.5.

4.3.3 Property Listings

The following listings of the Property were identified:

Name/Address:	None
Database(s):	
Data Discussion:	
REC Discussion:	
VEC Discussion:	

4.3.4 Adjoining Property Listings

The following adjoining property listings were identified. Reported distances, where applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property. The reported gradient has been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Name/Address:	Eel River Lumber Pro. Mill C /1576 Highway 36			
Database(s):	CUPA, WDS			
Distance in feet:	Adjoining	Direction:	NW	Gradient: Up/Cross
Data Discussion:	<p>This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) The site was formerly occupied by Eel River Lumber Products saw mill in the early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of a 10,000-gallon diesel above ground storage tank, a 550-gallon gasoline above ground storage tank, a 200-gallon kerosene above ground storage tank, a 500-gal waste oil drum, a 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four borings to test TPH-g, TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.</p> <p>The CUPA listing identifies Facility ID # FA0003173 with a current status listed as "01 – Active", a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.</p>			
REC Discussion:	Based on the details provided above, a REC is suspected in connection with the Property. Additional evaluation would be required to determine whether a REC exists.			
VEC Discussion:	Based on the available data, a VEC may exist. Additional evaluation would be required to confirm whether a significant vapor intrusion impact to the Property exists.			

4.3.5 ASTM Search Distance Findings

The following is a discussion of non-adjointing sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status. Listings for the following databases, if identified, have been discussed above in Sections 4.3.3 and 4.3.4: Registered Storage Tanks, Federal RCRA Generators, Federal and State EC/IC, ERNS. A copy of the full regulatory database report, including available details of all listed sites, is included in Appendix E.

UNMAPPED/ORPHAN LIST SITES	
	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific

	search distance or warranting discussion have either been discussed in the preceding tables or are detailed below:
Notable Listings:	None

4.4 Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
EPA MyProperty	Online search	A response was received stating that no records were found.
Humboldt County Department of Environmental Health Division	FOI request	<p>Records for the west adjoining property at 1576 Highway 36 (Steve Wills Trucking and Logging) were received. A letter dated January 6, 2004 indicated DEH observed three 55-gallon drums of diesel stored on the front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations.</p> <p>A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of a 10,000-gallon diesel above ground storage tank, a 550-gallon gasoline above ground storage tank, a 200-gallon kerosene above ground storage tank, a 500-gal waste oil drum, a 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four borings to test TPH-g, TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report.</p>
Humboldt County Planning and Building Department	FOIA request	A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation, of Humboldt County Codes. And the violations were closed on April 6, 2007.
Department of Toxic Substances Control (DTSC)	FOI request	No response was received prior to report issuance.
Regional Water Quality Control Board (RWQCB)	FOI request	A response was received stating that no records were found.

Source	Type of Request	Outcome
County Air Pollution Control District (APCD)	FOI request	No response was received prior to report issuance.
CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found. https://geotracker.waterboards.ca.gov/profile_report?global_id=T0602393346
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
www.realquest.com https://webgis.co.humboldt.ca.us/HCEGIS2.0/	Online search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report. The Property is zoned Agricultural exclusive.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares. Building exteriors were observed at ground level, unless otherwise indicated. Where applicable, representative areas of building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Ryan Terwilliger
Property Escort/Company:	Unescorted
Inspection Date:	January 30, 2021
Weather Conditions:	Overcast, 45° F

5.1.1 Significant Inaccessible Areas

No significant areas of the Property inaccessible at the time of the inspection were noted.

5.1.2 Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

Abutting Roadways:	State Highway 36 to the north; River Bar Road to the east
Current Property Use:	The site is currently used as cattle pasture. Hillmann observed a water well used for irrigation and agricultural pump.
Evidence of Past Property Uses:	None observed.
Evidence of Past Adjoining Property Uses:	None observed.
Surrounding Area Uses:	Commercial, residential and undeveloped land

5.2.2 Current Adjoining Property Uses

Dir	Street Address	Description
N	2031 Street HWY 36	Residential
E	River Bar Road	Undeveloped and Wolverton Gulch
W	1576 Street HWY 36	Commercial truck storage yard
S	River Bar Road	Undeveloped land and residential

5.2.3 Topographic Characteristics

Terrain:	Flat to gently sloping, 10–15-foot cliff from the south to the north on the east side of the Property
Direction of Downward Slope:	Towards the east-northeast
On-site Water Bodies:	None observed
Other Significant Features:	None observed

5.2.4 General Description of Structures

Buildings/# of Floors	A barn on the northeast parcel 204-171-047; no structures are present on remaining of the parcels
Approx. Building Area:	Approximately 2,800 SF
Approx. Year Built:	1940s
Ancillary Structures:	None observed
Sources of Heating & Cooling:	No heating or cooling systems were present at the Property.
Potable Water/Sewage Disposal:	No potable water or sewer services were present at the Property.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were observed to be stored and used by property occupants:

Occupant	Substance	Qty/Container Type	Storage Conditions
NA	No significant storage or use noted		

5.3.2 Drums

No hazardous substance or petroleum product drums were noted on the Property.

5.3.3 Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted on the Property.

5.3.4 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property.

5.3.5 Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/ UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
(none)						

5.3.6 PCBs in Oil Filled Electrical/Hydraulic Equipment

A pole mounted transformer was observed at the southeast side Property. There were no leaks observed around the transformer.

5.3.7 Odors

No strong, pungent or noxious odors were noted on the Property.

5.3.8 Pools of Liquid

No standing water or pools of liquid likely to contain hazardous substances or petroleum products were noted at the Property.

5.3.9 Interior Stains or Corrosion

No interior stains or corrosion due to hazardous substance/petroleum products spills/releases were noted at the Property.

5.3.10 Interior Drains/Sumps

No floor drains or sump pits were noted at the Property other than for storm water or sewage management.

5.3.11 Exterior Pits/Ponds/Lagoons

No exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed at the Property.

5.3.13 On-Site Solid Waste Disposal/Fill Material

No evidence of any on-site solid waste dumping was noted at the Property. No evidence of recently deposited fill materials was observed at the Property.

5.3.14 Waste Water

No sanitary sewer discharges were identified at the Property.

Storm water runoff at the Property is discharged off-site to local streams/drainage systems via overland flow.

No additional waste water discharges were identified at the Property.

5.3.15 Septic Systems

No septic systems were identified at the Property. Based on the history of site development, the prior use of a septic system for sanitary sewer disposal cannot be ruled out. Any on-site septic systems are not anticipated to be a REC in connection with the Property.

5.3.16 Wells

Hillmann observed a water well used for irrigation on the Property.

5.3.17 Railroad Spurs

The following railroad spurs were noted on the Property:

The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however, there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Subject	Name/Affiliation	Summary
Property Owner / Representative	Not applicable	The Property owner / representative was not available for interview at the time of the assessment.
Property Occupants	Not applicable	Property was unoccupied.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment.
Owners/Occupants of Adjoining or Nearby Properties	Not applicable	The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.4.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as “Non-Scope Considerations”). The ASTM E1527-13 standard defines the term business environmental risk (BER) as, “*a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.*”

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

A cattle barn was observed at the Property. There are no inhabited buildings on the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

As per the contracted scope of work, Hillmann conducted a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Hillmann did not observe evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

7.5 NWI Mapped Wetlands

As indicated in the Physical Setting Source table of Section 4.1 a streamside Management Area - Wolverton Gulch, is depicted along the eastern edge of the Property.

The scope of work for this assessment excludes a visual determination of regulated wetlands at the Property. It is emphasized that, regardless of the wetlands data obtained via the EDR Geocheck-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

No potable water service was identified at the Property.

7.7 Limited Phase II Soil Investigations

The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Due to a concern of shallow soil impacts resulting from cumulative applications of pesticides at the site, limited soil sampling and analysis was conducted at the time of the Phase I ESA site inspection. Hillmann advanced sixty (60) soil borings which were composited into fifteen (15) soil samples. Soil samples were collected at approximate depths of 0.5 and 2 feet below ground surface. The samples all appeared visually clean with no discernable odor. Soil samples collected were preserved for analysis in laboratory jars, sealed with Teflon tape and plastic end caps, wrapped in aluminum foil and stored on ice. Samples were submitted for laboratory analysis of organo-chlorine pesticides (OCP) by EPA Method 8081A, and analysis of Title 22 Metals by EPA Method 6010B as recommended by DTSC guidance, by A&R Laboratories in Ontario, California. The results indicated low concentrations of heavy metals, which were all below applicable residential screening levels. No OCP compounds were detected above method detection limits. A summary of the results can be found in the table below, the complete lab report can be found in Appendix F.

Summary of Organo-Chlorine Pesticide Results (mg/Kg)

Sample ID	4,4 DDD	4,4 DDE	4,4 DDT	Other OCP (Endrin Aldehyde)	Other OCP (Endosulfan II)

DTSC Background	12	--	--	--	--	--	--	--	--	--

Notes: ND - Not Detected.

EPA Regional Screening Levels (RSLs) are human health risk based screening levels used by EPA and DTSC in residential and commercial settings. DTSC Background Concentration is based on statistical study of sites throughout southern California. This concentration may be used as a screening level for anthropogenic and naturally occurring levels of arsenic in soil in Southern California.

** - Values modified by DTSC HERO Note 3. Please refer to lab report for complete results.*

RE: Phase I Environmental Site Assessment
20-034 North Coast Highway Solar
CA Highway- 36
Hydesville, California 10065
Hillmann Project No: C3-7896

Dear Mr. Albert:

Hillmann Consulting LLC is pleased to provide the results of our Phase I Environmental Site Assessment of the above referenced property. This assessment was performed in general accordance with the scope and limitations of ASTM Practice E 1527-13, which is the latest version of the E1527 standard published by the ASTM.

We appreciate the opportunity to provide environmental due diligence services. If you have any questions concerning this report, or if we can assist you in any other matter, please contact our office at 908-688-7800.

Sincerely,

Hillmann Consulting, LLC

[Shilpa Sunil]

List of Abbreviations/Acronyms

Hillmann may use the following abbreviations and acronyms for common terminology described in our report. Not all abbreviations or acronyms may be applicable to this report:

ACM	– Asbestos Containing Material
AOC	– Area of Concern
AST	– Aboveground Storage Tank
ASTM	– American Society for Testing Materials
BER	– Business Environmental Risk
CEA	– Classification Exception Area
CERCLA	– Comprehensive Environmental Response Compensation and Liability Act
CERCLIS	– Comprehensive Environmental Response Compensation and Liability Information System
CESQG	– Conditionally Exempt Small Quantity Generator
COC	– Chemicals of Concern
CORRACTS	– Corrective Action Sites
CREC	– Controlled Recognized Environmental Condition
DNPL	– Delisted National Priority List
DTSC	– Department of Toxic Substances Control
ENG	– Engineering
ERNS	– Emergency Response Notification System
FDNY	– Fire Department, City of New York
FOI/FOIA/FOIL	– Freedom of Information / Freedom of Information Act / Freedom of Information Letter
HVAC	– Heating Ventilation & Air Conditioning
HREC	– Historic Recognized Environmental Condition
IAQ	– Indoor Air Quality
INST	– Institutional
ISRA	– Industrial Site Recovery Act
LBP	– Lead-Based Paint
LQG	– Large Quantity Generator
LTANK	– Leaking Storage Tank
LUST	– Leaking Underground Storage Tank
SDS/MSDS	– Safety Data Sheet / Material Safety Data Sheet
NA	– Not Applicable
NCDOH	– Nassau County Department of Health
NFA	– No Further Action
NFRAP	– No Further Remedial Actions Planned
NJDEP	– New Jersey Department of Environmental Protection
NPDES	– National Pollutant Discharge Elimination System
NPL	– National Priority List
NYCDEP	– New York City Department of Environmental Protection
NYCDOB	– New York City Department of Buildings
NYCOER	– New York City Office of Environmental Remediation
NYSDEC	– New York State Department of Environmental Conservation
OPRA	– Open Public Records Act
PADEP	– Pennsylvania Department of Environmental Protection
PAH	– Polycyclic Aromatic Hydrocarbon
PCE	– Perchloroethylene
RAO	– Response Action Outcome
RCRA	– Resource Conservation and Recovery Act
RCRIS	– Resource Conservation and Recovery Information System
REC	– Recognized Environmental Condition
RWQCB	– Regional Water Quality Control Board
SCAQMD	– South Coast Air Quality Management District
SCDHS	– Suffolk County Department of Health Services
SDG	– Significant Data Gap
SEMS	– Superfund Enterprise Management System
SRP	– Site Remediation Program
SQG	– Small Quantity Generator
SVOC	– Semi-Volatile Organic Compound
TCE	– Trichloroethylene
TSDF	– Treatment Storage and/or Disposal Facility
USEPA	– United States Environmental Protection Agency
UST	– Underground Storage Tank
VEC	– Vapor Encroachment Condition
VOC	– Volatile Organic Compound

1.0 FINDINGS, OPINIONS, AND CONCLUSIONS

Hillmann Consulting, LLC (Hillmann) performed a Phase I Environmental Site Assessment (ESA) of parcels CA Highway- 36, Hydesville, California (the Property). The assessment has been conducted in accordance with our contracted scope of work and the ASTM Standard Practice E 1527-13 for Phase I Environmental Site Assessments and All Appropriate Inquiries (AAI) Final Rule 40 CFR Part 312. This section contains a summary of findings, opinions and conclusions made by this assessment. However, this section, alone, does not constitute the complete assessment. The report must be read in its entirety.

1.1 Summary of Project Details

Primary Street Address:	CA Highway- 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/ Agricultural land				
Approx. Property Area:	Total ~78.89 acres				
Buildings/# of Floors	A barn to the northeast parcel 204-171-047, No structures are present on remaining of the parcels				
Approx. Building Area:	Barn: approximately 2,800 SF				
Approx. Year Built:	1940s				
Commercial Occupants:	None				
Current Use:	Vacant lot				
Prior Uses:	Agricultural				
Inspected By:	Mr. Ryan Terwilliger				
Site Contact/Company:	Mr. Rafik Albert / EPD Solutions, Inc.				
Site Escort/Company:	None				
Inspection Date:	April 14, 2020				
Weather Conditions:	Clear, 70° F				

1.2 Findings Summary Table

Assessment Subject	No REC	REC	CREC	HREC	Rpt. Ref.

Data Gaps:	X				2.3

1.3 Findings, Opinions and Conclusions

1.3.1 Recognized Environmental Conditions

Hillmann has performed a Phase I Environmental Site Assessment in accordance with the scope and limitations of ASTM Practice E 1527-13 of the Property as described in Section 2 of this report. Any additions to, exceptions to, or deletions from this practice are also described in Section 2 of this report. This assessment has revealed no evidence of *recognized environmental conditions* in connection with the Property, except for the following:

RECOGNIZED ENVIRONMENTAL CONDITIONS	
REC#1	The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.
REC#2	The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation used gasoline, diesel and VOCs and is considered to be vapor risk and REC to the Property.
HISTORICAL RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No HRECs were identified.
CONTROLLED RECOGNIZED ENVIRONMENTAL CONDITIONS	
	No CRECs were identified.

SIGNIFICANT DATA GAPS

No SDGs were identified.

1.3.2 REC Response Action Recommendations

The following table presents recommended response actions to the identified RECs for further investigation and/or corrective action:

REC RESPONSE ACTION SUMMARY TABLE	
REC	Response Action
REC # 1 and REC #2	Hillmann recommends to perform a limited Phase II investigation for pesticides only. However, if the Property is ever redeveloped for uses other than a solar farm, a limited Phase II should be conducted to determine whether the Property has been impacted by the west-northwest adjoining site.

1.3.3 Notable Environmental Conditions / De Minimis Conditions

The following environmental conditions were identified, but are not considered to be a REC in connection with the Property:

NOTABLE ENVIRONMENTAL CONDITIONS / DE MINIMIS CONDITIONS	
1.	Although not directly observed during site reconnaissance, based on the historic residential use and agricultural use, Hillmann suspects the possible presence that a septic system serviced the former residence on the Property. Hillmann recommends proper closure and removal of this prior to redevelopment.
2.	The Property was historically developed for agricultural uses as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. The site is currently used as cattle pasture. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.
3.	Hillmann observed a sprinkler and water pump on the Property.
4.	The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however, there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.
5.	A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation, of Humboldt County Codes. The violations were closed on April 6, 2007.
6.	The adjoining property at 1576 CA-36 (Steve Wills Trucking and Logging) was listed under CERS ID 10020253. However, Per the Humboldt County records it appears that business operations occur on APN 204-171-003, and not on any of the Property parcels (204-081-002, -004, -007). A letter dated January 6, 2004 indicated DEH observed three 55-gallon drums of diesel stored in front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations.
7.	The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) The site was formerly occupied by Eel River Lumber Products saw mill early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of 10,00-gallon diesel above ground storage tank, 550-gallon gasoline above ground storage tank 200-gallon kerosene above ground storage tank, 500-gal waste oil drum, 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four boings to test TPH-g. TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.

	The site was listed on the CUPA and WDS databases. This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. The CUPA listing identifies Facility ID # FA0003173 with a current status listed as “01 – Active”, a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.
8.	Reynolds RV Repair at 988 Highway 36 is listed under CPS-SLIC, CUPA and CERS database. The site is located approximately 2,571 feet west northwest of the Property. The CPS-SLIC listing indicates site as an open SLIC case undergoing site assessment dated 12/29/2016. Based on the distance and groundwater gradient this listing is not considered to be REC to the Property.

1.3.4 Environmental Professional Statement

I declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR 312. I have the specific qualifications based on education, training and experience to assess a *property* of the nature, history and setting of the subject *property*. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

[Ryan Terwilliger]
Environmental Professional

1.4 Business Environmental Risks / Non-ASTM Scope

Hillmann has performed a limited review of the following potential Business Environmental Risks (BER), also known as “Non-ASTM Scope concerns”, in accordance with the contracted scope of work scope for this assessment. The following is a summary of findings for applicable BERs. For a more detailed discussion of the findings and contracted scope of work, please see the referenced report section.

BUSINESS ENVIRONMENTAL RISKS / NON-ASTM SCOPE			
Subject	Findings	Not Appl.	Rep. Ref.
Asbestos		X	7.1
Lead Paint		X	7.2
Radon	Property is located in a Radon Zone 3 – an USEPA designation for an area with low potential for elevated indoor radon levels to occur.		7.3
Mold / Microbial Damage		X	7.4
NWI Wetlands	No mapped wetland areas were depicted at the Property.		4.1
Lead in Drinking Water	Potable water service at the Property is provided by a utility connection with the Hydesville City Water Supply System. A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water.		7.6

2.0 INTRODUCTION

2.1 Purpose and Scope

This assessment was conducted utilizing generally accepted Phase I ESA industry standards in accordance with the ASTM Standard Practice E 1527-13. The ASTM describes these methodologies as representing good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the “landowner liability protections,” or “LLPs”): that is, the practice that constitutes all appropriate inquiries into the previous ownership and uses the property consistent with good commercial and customary practice as defined at 42 U.S.C. §9601(35) (B). The primary goal of the processes established by ASTM E1527-13 is to identify *recognized environmental conditions* in connection with the Property.

The term *recognized environmental condition (REC)* is defined by the ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to a release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.

The ASTM has also defined the terms *historical recognized environmental conditions* and *controlled recognized environmental conditions* as two additional types of RECs. The term *historical recognized environmental condition (HREC)* is defined as a past release of any hazardous substances or petroleum products that has occurred in connection with the Property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the Property to any required controls (for example, property use restrictions, activity and use limitations, institutional controls or engineering controls).

The term *controlled recognized environmental condition (CREC)* is defined as a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

Conditions determined to be “*de minimis conditions*” are not considered to be RECs, HRECs or CRECs. *De minimis condition* is defined by the ASTM, “...as a condition that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

The chief components of this assessment are generally described as follows:

- A non-invasive visual reconnaissance of the Property and adjoining properties in accordance with ASTM guidelines for evidence of RECs.

- Interviews of past and present owners and occupants and state and local government officials, seeking information related to the potential presence of RECs at the Property.
- A review of standard physical record sources for available topographic, geologic and groundwater data.
- A review of standard historic record sources, such as fire insurance maps, city directories, aerial photographs, prior reports and interviews, etc., to determine prior uses of the Property from the present, back to the Property's first developed use, or back to 1940, whichever is earlier.
- A review of standard environmental record sources including federal and state environmental databases, and additional environmental record sources, to identify potential regulatory concerns with the Property, adjoining properties and properties located within the surrounding area.

An evaluation of environmental or other regulatory compliance matters is excluded from the scope of this assessment.

These methodologies are described as representing good commercial and customary practice for conducting an Environmental Site Assessment of a property for the purpose of identifying recognized environmental conditions.

2.1.1 Business Environmental Risks/Non-ASTM Scope Considerations

In accordance with our contract agreement, Hillmann may have addressed the following potential environmental subject matters that are outside of the requirements of the ASTM E1527-13 standard:

Asbestos-Containing Materials (ACM): A cursory non-intrusive visual screening for the presence of suspect ACM within the accessed areas of buildings built prior to 1990 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute an asbestos survey/inspection of the premises. An asbestos survey/inspection should be sought by the report User(s) if more certainty is desired regarding ACM and potential asbestos hazards at the Property. Furthermore, a review of regulatory compliance matters pertaining to asbestos is excluded from the scope of work.

Lead-Based Paint (LBP): A cursory non-intrusive visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980 on the Property. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for LBP or potential lead hazards. A comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding LBP at the Property. Furthermore, a review of regulatory compliance matters pertaining to lead-based paint is excluded from the scope of work.

USEPA Designated Radon Potential: Review of general non-site specific data published by the USEPA regarding the Radon Zone classification for the area of the Property.

Mold/Microbial Damage: A cursory non-intrusive visual screening within the accessed areas of buildings on the Property for evidence of systemic microbial problems, including visible mold growth, water damaged building materials or musty odors. It is emphasized that this cursory non-intrusive visual screening does not constitute a comprehensive survey for moisture/mold/microbial damage. A more comprehensive inspection should be sought by the report User(s) if more certainty is desired regarding the potential for moisture/mold/microbial damages at the Property.

NWI Wetlands: Review of US Fish and Wildlife Service National Wetland Inventory digitized data of mapped wetlands as presented in the attached EDR Radius Map plus Geocheck Report.

It is emphasized that, regardless of the wetlands data obtained via the EDR Geocheck-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

Lead in Drinking Water: Review of the potential for elevated levels of lead in the drinking water by determining the source of the drinking water supply and a review of available testing or compliance data reports.

2.2 Property Location/Legal Description

Property location and legal description details are described as follows:

Primary Street Address:	CA Highway- 36				
City:	Hydesville	County:	Humboldt	State:	California
Tax ID/Parcel Number:	204-081-002, -004, -007, and 204-171-047				
Approx. Land Area:	Total ~78.89 acres				
Apprx. Latitude/Longitude:	North 40.5427460 degrees/West 124.1168740 degrees				
Additional Details (if appl.):	Property consists of four adjoining parcels with the perimeters being fenced off on all sides.				
Property Owner:	Nyberg Philip J and Melinda J TR				
Zoning Designation:	Rural/ Agricultural land				

2.3 Data Gaps

A *data gap* is defined by the ASTM as a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information. A data gap is only significant if other information and/or professional experience raises reasonable concerns involving the data gap and the ability to determine the presence or absence of recognized environmental conditions. The following table summarizes data gaps encountered during the assessment as well as a discussion of their significance.

Data Gap:	Significant (Yes/No)?	Discussion
Historical records data failure	No	The date and/or type of the first developed use of the Property was not documented. Records gaps exceeding five years were encountered; however, no significant site use changes are suspected during these intervals.
Response to agency records requests not received as of date of report.	No	Any additional information indicative of a REC will be forwarded upon receipt.

2.4 User Reliance

This report is for the exclusive use of the User(s) named on the front cover. No other party(ies) shall have any right to rely on the content of this report without first obtaining the consent of the original report User; and without obtaining written consent from Hillmann in the form of a letter of reliance or report recertification.

2.5 Significant Assumptions

The following significant assumptions are made:

- The site operations at the time of the site visit are assumed to reflect typical site conditions relative to potential environmental conditions and that no concealment of environmental conditions or releases by site owners or occupants has occurred. Likewise, it is assumed that no areas of the Property with potential environmental concerns or RECs were concealed or otherwise not reported, intentionally or unknowingly, by the Property owners/occupants and/or site escort at the time of the site visit.
- For the purpose of estimating the approximate direction of groundwater flow in the absence of site specific groundwater data, unless indicated otherwise, an assumption has been made that the gradient of groundwater flow follows the surface topography of the Property and immediate surrounding area.

2.6 General Limitations and Exceptions

2.6.1 Limitations

The report turnaround time specified by the contract agreement for this assessment may present a limitation to the availability of pertinent regulatory agency records. Such limitations, if encountered, are further specified in Section 4.4.

Significant limitations related to the condition or accessibility of the Property at the time of the site reconnaissance, if encountered, are reported in Section 5.1.

2.6.2 Other Exceptions or Deletions

No other exceptions or deletions from the ASTM Standard E 1527-13 are reported.

2.6.3 Special Terms and Conditions

This Phase I Environmental Site Assessment has been prepared using reasonable efforts in each phase of its work to identify recognized environmental conditions associated with hazardous substances, wastes and petroleum products at the Property. Findings within this report are based on information collected from observations made on the day of the site reconnaissance and from reasonably ascertainable information obtained from governing public agencies and private sources.

This report is not definitive and should not be assumed to be a complete or specific definition of the conditions above or below grade. Information in this report is not intended to be used as a construction document and should not be used for demolition, renovation, site development, redevelopment, or other construction purposes. No representation or warranty is made that the past or current operations at the Property are, or have been, in compliance with all applicable federal, state and local laws, regulations and codes.

Findings, conclusions and recommendations presented in this report are based on visual observations of the Property, interviews conducted, the records reviewed, information provided by the Client, and/or a review of readily available and supplied drawings and documents. Information obtained during the assessment, whether written, graphic or verbal, provided by the Property contact(s) or as shown on any documents reviewed or received from the Property contact, owner or agent, or government agency source; is assumed to be accurate except as specifically stated otherwise in this report. Independent verification of the accuracy or completeness of all information reviewed or received during the course of this assessment is not made and excluded from the scope of work for this assessment. No warranty or guarantee is made of the accuracy or completeness of information that was obtained from ostensibly knowledgeable individuals, regulatory agency representatives or other secondary sources.

Regardless of the findings stated in this report, Hillmann is not responsible for consequences or conditions arising from facts that were concealed, withheld or not fully disclosed at the time the assessment was conducted.

This report does not warrant against future operations or conditions, nor does it warrant against operations or conditions present of a type or at a location not investigated.

The regulatory database report provided is based on an evaluation of the data collected and compiled by a contracted data research company. The regulatory research is designed to meet the requirements of ASTM Standard E 1527-13. Hillmann can neither warrant nor guarantee the accuracy or completeness of the information obtained from the regulatory database report provider during the course of this assessment.

Subsurface conditions may differ from the conditions implied by the surface observations and can only be reliably evaluated through intrusive techniques.

Reasonable efforts have been made during this assessment to identify aboveground and underground storage tanks and ancillary equipment. Reasonable efforts are limited to information

gained from visual observation of largely unobstructed areas, recorded database information held in public record and available information gathered from interviews. Such methods may not identify surficial and subsurface features that may have been hidden from view due to parked automobiles and other vehicles, snow cover, vegetative growth, pavement, construction or debris pile storage or incorrect information from sources.

No guarantee, explicit or implied, is made that the records pertaining to historical ownership or occupancy which were reviewed represent a comprehensive or precise delineation of past Property ownership or tenancy for legal purposes.

The ASTM E1527-13 standard states that recommendations are not required to be included in a Phase I ESA report; however, further that recommendations are an additional service that may be useful in the User's analysis of landowner liability protections or business environmental risks; and that the User should consider whether recommendations for additional inquiries or other services are desired.

The recommended response actions to the identified RECs presented in Section 1.3, if any, are not intended to represent the only course(s) of action to take; nor does it imply any opinion as to the timing of the action. Furthermore, it is emphasized that additional response actions may become warranted depending on the outcome of the initial action(s) taken. Hillmann advises that consultation with legal counsel familiar with environmental and real estate law may be beneficial to the decision making process for the type and timing of a response action to identified RECs, if any.

Due to the limited nature of our review of potential Business Environmental Risks, the User of the report should consider whether to take additional action(s) to further define, properly manage and/or mitigate potential BERs.

In the event of any conflict between the terms and conditions of this report and the terms and conditions of the consulting services agreement for this project, the consulting services agreement shall control.

3.0 USER PROVIDED INFORMATION

The term “User” is defined by ASTM as the party seeking to use Practice E1527 to complete an environmental site assessment of the Property; specifically, the entities named on the front cover to which the report has been addressed.

3.1 Prior Environmental Reports/Documentation

No prior environmental reports/documentation were provided.

3.2 User Questionnaire

Section 6 of the ASTM E1527-13 standard describes certain tasks required to be performed by the report User in order to qualify for landowner liability protections to CERCLA liability. To assist the report User to meet these requirements, the ASTM E1527-13 standard recommends a questionnaire of inquiries (User Questionnaire) specified in 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31 be provided to the original report User. A User Questionnaire has been provided to the report User; however, a completed questionnaire was not returned to Hillmann.

Question:	Yes/No:	Detail:
Environmental liens that are filed or recorded against the property: Did a search of recorded land title records identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?	NR	
Activity and use limitations that are in place on the property or that have been filed or recorded against the property: Did a search of recorded land title records (or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?	NR	
Specialized knowledge or experience of the person seeking to qualify for the LLP: Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?	NR	
Relationship of the purchase price to the fair market value of the property if it were not contaminated: Does the purchase price being paid for this property reasonably reflect the fair market value of the property? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?	NR	

<p>Commonly Known or Reasonably Ascertainable Information: Are you aware of commonly known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,</p>		
-Do you know the past uses of the property?	NR	
-Do you know of specific chemicals that are present or were once present at the property?	NR	
-Do you know of spills or other chemical releases that have taken place at the property?	NR	
-Do you know of any environmental cleanups that have taken place at the property?	NR	
<p>The degree of obviousness of the presence or likely presence of contamination at the property, and the ability to detect the contamination by appropriate investigation: Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence or likely presence of releases at the property?</p>	NR	
<p>Litigation/Administrative Proceedings/Government Notices As the User of this ESA, do you have knowledge of (1) any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the property; (2) any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on or from the property; and (3) any notices from any governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.</p>	NR	

NR-no response

3.3 Reason for Performing Phase I ESA

The User did not indicate the purpose of the assessment. In accordance with ASTM E1527-13, it is assumed that the Phase I ESA was being performed in order to qualify for landowner liability protection to CERCLA liability.

4.0 RECORDS REVIEW

4.1 Physical Setting Sources

The following physical setting sources were reviewed:

Source	Discussion
USGS 7.5 minute Topographic Map Data: (EDR Geocheck-Physical Setting Source Addendum)	The Property lies at an elevation of approximately 88 feet above mean sea level. An interpretation of topographic contour lines as well as a review of the EDR Geocheck-General Topographic Gradient suggested terrain sloping downward towards the south-southwest. The closest water body is Wolverton Gulch to the east and Van Duzen River, located approximately 1100 feet to the WSW.
USDA SCS Soil Data: (EDR Geocheck-Physical Setting Source Addendum)	The soil type at the Property is classified as "Ferndale". This soil type is described as silt loam surface texture with soils moderately fine or fine textures with a slow infiltration rate.
Geologic Data: (EDR Geocheck-Physical Setting Source Addendum)	The geologic formation in the vicinity of the Property is described as a stratified sequence of the Cenozoic Era, Quaternary System, and Quaternary Series.
Prior Env. Reports: (Section 3.1)	No prior environmental reports were obtained.
Additional Sources/Data:	No additional physical setting sources or data was obtained.
Groundwater Flow Discussion:	Based on a review of the above information as well as observation of the site, the direction of shallow groundwater flow at the site is inferred to be towards the south-southwest.
NWI Wetlands Data: (EDR Geocheck-Physical Setting Source Addendum)	A streamside Management Area - Wolverton Gulch is depicted along the eastern edge of the Property.

4.2 Historical Use – Property and Adjoining Properties

Research has been conducted in an attempt to develop a history of the previous uses of the property and surrounding area, in order to help identify the likelihood of past uses having led to RECs in connection with the property. Standard historical sources have been sought in an attempt to document the past uses of the Property as far back as it can be shown that the Property contained structures; or from the time the Property was first used for residential, agricultural, commercial, industrial or governmental purposes.

4.2.1 Fire Insurance Maps

A Certified Sanborn Map Report was obtained from EDR for a review of published historic fire insurance maps for the Property and surrounding area. The following is a summary of site uses and notable details depicted by the available maps:

Year(s)	Prop/Adj	Depicted Use(s)	Notable Details
	Property:	(no coverage)	
	Adjoining:		

A copy of the Certified Sanborn Map Report is attached in Appendix D.

4.2.2 City Directories

An EDR City Directory Abstract report was reviewed for data of former occupants of the Property's street address. The following is a generalized summary of the findings of city directory research for past occupants of the Property.

Property	
Use(s) / Occupant(s):	Years
None identified	

The EDR City Directory Abstract report was also reviewed for listings of historic occupants of the adjoining properties. The following is a general summary of listings of historic adjoining property occupants:

Adjoining Properties	
Use and/or Occupant(s)	Years
Mix of residential and commercial occupants.	1992 - 1998
Trucking & Logging	2010 - 2017

A copy of the EDR City Directory report is attached in Appendix D.

4.2.3 Historical Topographic Maps

Historical topographic maps of the Property and vicinity obtained from an EDR Historical Topographic Map report (as attached in Appendix D) have been reviewed. The following interpretation of land usage was made by review of the maps:

Year(s)	Summary	
1944	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	No improvements are depicted
1959, 1972	Property:	Unmapped
	Adjoining:	Unmapped
1979	Property:	No improvements are depicted. Rail road track runs through the Property.
	Adjoining:	Burners and commercial structures and Rohnerville Airport are depicted to the northwest and west-northwest
2012	Property:	No improvements are depicted.
	Adjoining:	Rohnerville Airport is depicted to the north- northwest

4.2.4 Historical Aerial Photographs

Historical aerial photographs of the Property and vicinity obtained from an EDR Aerial Photo Decade Package report, as attached in Appendix D, were reviewed. The following interpretation of land usage was made by review of the aerial photographs:

Year(s)	Summary of Interpretation	
1941	Property:	Agricultural use and small residential structures barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east
	Adjoining:	Agricultural use
1954, 1968, 1972	Property:	Agricultural use and small residential structures a barn like structure are depicted at the northern portion. Railroad track to the north and streambed to the east
	Adjoining:	Agricultural use, commercial structures, and vacant land
1983, 1989, 1998, 2005, 2009, 2012, 2016	Property:	Agricultural use and small residential structures a barn like structure are depicted at the northern portion. Railroad track to the north and a streambed is depicted to the east
	Adjoining:	Residential and commercial trucking is evident to the northwest.

4.2.5 EDR High-Risk Historical Records

The EDR Radius Map™ report, which is discussed in greater detail in Section 4.3, provided a search of proprietary databases of potential historical high-risk uses at or in the vicinity of the Property. These databases include EDR Historic Cleaners – a database of property addresses with records of historical occupancy by suspected cleaners businesses; EDR Historic Auto – a database of property addresses with records of historical occupancy by potential automotive gas/filling stations and repair facilities; and EDR MGP- a database of sites historically occupied by manufactured gas plants and related facilities.

EDR Database	On-site Listings:	Adjoining/Off-Site Listings
Historic Cleaners: (on-site/adjoining only)	None	None
Historic Auto: (on-site/adjoining only)	None	None
MGP: (1-mile distance)	None	None

4.2.6 Petroleum/Natural Gas Well Review

The historical record sources and the California Division of Oil, Gas, and Geothermal Resources (DOGGR) online mapping application were reviewed for records of historic petroleum and/or natural gas wells at the Property. No record of any historical petroleum/natural gas wells at or adjoining the Property was identified.

4.2.7 Additional Historical Data

Where applicable, the following additional pertinent historical data was obtained:

Interviews/Anecdotal:	No additional pertinent historical data was obtained.
Local Gov't Records:	No additional pertinent historical data was obtained.
Prior Env. Reports: (Section 3.1)	Not applicable; no prior reports were provided.

Site Observations:	The site is currently used as cattle pasture. Hillmann observed a water pump. The surrounding vicinity characteristics undeveloped land/ agricultural land and commercial uses.
Other Sources:	No additional pertinent historical data was obtained.

4.2.8 Summary of Identified Historic Uses

The following table presents a summary of the types and approximate date ranges of identified prior uses of the Property:

Property	
Date Range	Use
1941 to 2012	Agricultural use
2012 to 2016	Vacant land

The following table presents a summary of the types of identified prior uses of the adjoining properties:

Adjoining Properties	
Date Range	Use
1941	Agricultural use
1954 to Present	Undeveloped land, agricultural use and trucking yard
1998 to Present	An airport, commercial, light industrial and undeveloped

4.2.9 Historical Records Data Failure

The ASTM E1527-13 standard defines data failure as a failure to achieve the ASTM specified historical research objectives after reviewing the standard historical sources that are reasonably ascertainable and likely to be useful. The objective is to identify all obvious uses of the property from the present, back to the property's first developed use, or back to 1940, whichever is earlier. Furthermore, records of historic use/conditions should be sought in intervals no less than approximately five years, unless the property conditions appear unchanged over a longer interval.

Objective	Met?	Detail	Significant?
First developed use/date determined?	No	The earliest documented use of the Property was agricultural uses in 1941	No
Record sources at 5-year intervals back to 1940 or first developed use?	Yes	Historical record gaps exceeding five years were encountered. However, significant site-use changes or undiscovered site uses appear unlikely to have occurred during the record gaps.	No
All obvious prior uses identified?	Yes	See Section 4.2.8.	No

Please refer to Section 2.3 for additional discussion of data gaps and their significance to the findings of the assessment.

4.2.10 Historic Uses REC Discussion

The review of historical records indicated evidence of the following potential RECs in connection with the Property:

The Property was historically developed for agricultural use as early as 1941. This use suggests the historical application of pesticides during this time, which could have accumulated in the shallow soils at that time. The Property has remained as undeveloped land since its usage as agricultural land. Therefore, the former use of the Property as agricultural land is considered to be a REC in connection with the Property.

The west- northwest adjoining site at 1576 CA-36, was formerly occupied by Eel River Lumber Products Mill C that consisted of 550-gallon underground storage tank that was removed in 1987. The former saw mill operation is considered to be vapor risk and REC to the Property.

4.3 Standard Environmental Record Sources

A regulatory database report, titled EDR Radius Map™ Report, prepared by Environmental Data Resources of Shelton, CT was obtained and reviewed. The report provided a search of standard environmental record sources for listings of the Property, adjoining properties and sites within the surrounding area; and has been reviewed for the purpose of identifying listings suggesting a potential impact to the Property due to presence or migration of hazardous substances and/or petroleum products. Additional descriptions of the meaning and significance of the regulatory databases can be found in the regulatory database report in Appendix E. The EDR Radius Map™ Report provided a search of the following database categories in accordance with the requirements of the ASTM Standard E1527-13:

Regulatory Database	Search Distance
Fed. National Priorities List (NPL/a.k.a. "Superfund" sites) & Proposed NPL	1-mile
Fed. Delisted NPL	½-mile
Fed. Superfund Enterprise Management System (SEMS; formerly CERCLIS)	½-mile
Fed. SEMS-ARCHIVE (formerly known as CERCLIS NFRAP)	½-mile
Fed. RCRA Corrective Action Sites (CORRACTS)	1-mile
Fed. RCRA Transport/Storage/Disposal (TSD) sites	½-mile
Fed. RCRA Generators (LQG, SGQ & CESQG)	Site & Adjoining
Fed. Institutional Control/Engineering Control (IC/EC) Registries	Site only
Fed. Emergency Response Notification System (ERNS)	Site only
State/Tribal Hazardous Waste Sites (SHWS)	1-mile
State/Tribal Landfill and/or Solid Waste Disposal (LF/SWF)	½-mile
State/Tribal Leaking Storage Tanks	½-mile
State/Tribal Registered Storage Tanks	Site & Adjoining
State/Tribal IC/EC Registries	Site
State/Tribal Voluntary Cleanup Sites	½-mile
State/Tribal Brownfields	½-mile
Additional Federal, State, Tribal and Local Environmental Databases	Variable

Reported distances for adjoining listings discussed in Section 4.3.4, if applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property.

The reported gradients indicated where applicable in Sections 4.3.4 and 4.3.5 have been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

4.3.1 Supplemental Database Listings

The regulatory database report was also reviewed for listings on supplemental databases, in addition to the Standard Environmental Record Sources. Any property or adjoining property listings on such databases of significant concern, if identified, is discussed in Sections 4.3.3 and 4.3.4. Otherwise, none of the other supplemental database listings identified by the regulatory database report are considered to be a REC in connection with the Property.

4.3.2 Limited Tier I Vapor Encroachment Screening

Limited analysis of the details of on-site, adjoining and vicinity database sites was conducted to identify potential sources of sub-surface vapor encroachment. This review was based on elements of the ASTM “Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions” (ASTM E 2600-15); and also on elements of “Methodology for Identifying the Area of Concern Around a Property Potentially Impacted by Vapor Migration from Nearby Contaminated Sources” (Buonicore, 2011-S-103-AWMA). Vicinity database sites pertaining to non-petroleum product releases within 1,760 feet of the Property in the up-gradient direction, 365 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction; and vicinity database sites pertaining to petroleum product releases within 528 feet of the Property in the up-gradient direction, 165 feet of the Property in the cross gradient direction and 100 feet of the Property in the down gradient direction were reviewed to identify active contamination sites with the potential to affect subsurface vapor conditions at the subject property. The potential for vapor encroachment was considered in assessing whether or not a REC exists in connection with the Property when reviewing applicable sites within those distances.

Regulatory database sites with active petroleum or non-petroleum releases that are considered to constitute a vapor encroachment condition (VEC) to the Property, if any, are identified and discussed in Sections 4.3.3, 4.3.4 and 4.3.5.

4.3.3 Property Listings

The following listings of the Property were identified:

Name/Address:	None
Database(s):	
Data Discussion:	
REC Discussion:	
VEC Discussion:	

4.3.4 Adjoining Property Listings

The following adjoining property listings were identified. Reported distances, where applicable, are approximate and indicative of the presence of a public roadway or right-of-way between the adjoining site and Property. The reported gradient has been estimated based on a number of factors including but not necessarily limited to field observation, review of topographic maps, database listing details and/or site specific geo-technical data.

Name/Address:	Eel River Lumber Pro. Mill C /1576 Highway 36				
Database(s):	CUPA, WDS				
Distance in feet:	Adjoining	Direction:	NW	Gradient:	Up/Cross
Data Discussion:	<p>The adjoining property at 1576 CA-36 (Eel River Lumber Products Mill C) The site was formerly occupied by Eel River Lumber Products saw mill early 1970s. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of 10,000-gallon diesel above ground storage tank, 550-gallon gasoline above ground storage tank 200-gallon kerosene above ground storage tank, 500-gal waste oil drum, 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four boings to test TPH-g. TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.</p> <p>The site was listed on the CUPA and WDS databases. This site adjoins the Property to the north and northwest, and appears to be cross gradient based on the inferred direction of groundwater flow to southwest. The CUPA listing identifies Facility ID # FA0003173 with a current status listed as "01 – Active", a hazardous waste generator. The WDS listing indicates the site is under waste discharge requirements. No other pertinent information was available.</p>				
REC Discussion:	Based on the details provided above, a REC is suspected in connection with the Property. Additional evaluation would be required to determine whether a REC exists.				
VEC Discussion:	Based on the available data, a VEC exists.

4.3.5 ASTM Search Distance Findings

The following is a discussion of non-adjointing sites identified as located within the ASTM specified search distance surrounding the Property. In order to keep this discussion informative and concise, discussion(s) is/are provided of the listed site(s) for each database category that appears most likely to impact the Property based on distance, area topography and/or regulatory status. Listings of sites within the applicable search distances not specifically discussed below were reviewed and concluded not to be RECs in connection with the Property or VECs based on various factors including distance, area topography, known or inferred groundwater flow direction and/or regulatory status. Listings for the following databases, if identified, have been discussed above in Sections 4.3.3 and 4.3.4: Registered Storage Tanks, Federal RCRA Generators, Federal and State EC/IC, ERNS. A copy of the full regulatory database report, including available details of all listed sites, is included in Appendix E.

UNMAPPED/ORPHAN LIST SITES	
Notable Listings:	Hillmann has also reviewed a list of unmapped sites (a.k.a. "Orphan List" sites) indicated by the database report. Unmapped sites that were identified as falling within an applicable specific search distance or warranting discussion have either been discussed in the preceding tables or are detailed below: None

4.4 Additional Environmental Record Sources

Requests have been submitted to local, municipal and state agencies for pertinent records pertaining to the Property, particularly with regard to potential environmental concerns such as petroleum storage tanks, storage and usage of hazardous substances and petroleum products, and/or known or suspected environmental contamination. Where applicable, internet research of government environmental regulatory databases was also conducted, as well as a general cursory internet search of the Property address, for information indicative of a REC. The following table summarizes the findings of the research:

Source	Type of Request	Outcome
EPA MyProperty	Online search	A response was received stating that no records were found.
Humboldt County Department of Environmental Health Division	FOI request	Records for the west adjoining property at 1576 Highway 36 (Steve Wills Trucking and Logging) were received. A letter dated January 6, 2004 indicated DEH observed three 55-gallon drums of diesel stored in front porch of the house. The drums were connected via a plastic line distributing the diesel to a fire monitor heater. Approximately 30 gallons of diesel contaminated soil was observed by the DEH on the southwest side of the Property. Notice of violation was issued for the contaminated soil and housing violations. A 550-gallon underground storage tank installed in 1979 was removed from the site in 1987. Hillmann reviewed inspection records dated April 24, 2006 that indicated the site consisted of 10,00-gallon diesel above ground storage tank, 550-gallon gasoline above ground storage tank 200-gallon kerosene above ground storage tank, 500-gal waste oil drum, 55-gallon drum of absorbent and multiple 55-gallon drums of oil and solvents were observed. Hillmann reviewed records of Phase II subsurface investigation work plan dated April 25, 2006. The workplan indicated installation of four boings to test TPH-g, TPH-d, metals and VOCs. The soil and groundwater sampling results were not provided by the Humboldt County at the time of the report. Based on lack of sampling results the former mill operation is considered to be potential vapor risk and considered to be REC to the Property.
Humboldt County Planning and Building Department	FOIA request	A letter from Humboldt County dated March 5, 2007 for parcel 204-171-047 (1576 Hwy 36) indicated violation, of Humboldt County Codes. And the violations were closed on April 6, 2007.
Department of Toxic Substances Control (DTSC)	FOI request	No response was received prior to report issuance.

Source	Type of Request	Outcome
Regional Water Quality Control Board (RWQCB)	FOI request	A response was received stating that no records were found.
County Air Pollution Control District (APCD)	FOI request	No response was received prior to report issuance.
CA DTSC EnviroStor database http://www.envirostor.dtsc.ca.gov/public/	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
CA GeoTracker database http://geotracker.waterboards.ca.gov/	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
USEPA Envirofacts search http://www.epa.gov/enviro/index.html	Online search	Hillmann searched online for records pertaining to the Property. No records pertaining to the property were found.
www.realquest.com https://webgis.co Humboldt.ca.us/HCEGIS2.0/	Online search	Basic Property information such as parcel number, date of construction, and building square footages were collected. Pertinent information, where obtained, is referenced in the appropriate sections of this report. The Property is zoned Agricultural exclusive.

5.0 SITE RECONNAISSANCE

5.1 Methodology and Limiting Conditions

The site reconnaissance consisted of visual and/or physical observations of the Property and improvements, adjoining properties as viewed from the Property boundaries and the surrounding area based on visual observations from adjoining public thoroughfares. Building exteriors were observed at ground level, unless otherwise indicated. Where applicable, representative areas of building interiors were accessed and observed to the extent they were made safely accessible with the cooperation of the site escort.

Site Inspection Personnel:	Mr. Ryan Terwilliger
Property Escort/Company:	None
Inspection Date:	April 14, 2020
Weather Conditions:	Clear, 70° F

5.1.1 Significant Inaccessible Areas

No significant areas of the Property inaccessible at the time of the inspection were noted.

5.1.2 Significant Limiting Site Conditions

No significant limiting site conditions were noted at the time of the site reconnaissance.

5.2 General Site Setting

5.2.1 Site and Vicinity Characteristics

Abutting Roadways:	Sate Highway 36 to the north; River Bar Road to the east
Current Property Use:	The site is currently used as cattle pasture. Hillmann observed a water well and agricultural pump.
Evidence of Past Property Uses:	None observed.
Evidence of Past Adjoining Property Uses:	None observed.
Surrounding Area Uses:	Commercial, residential and undeveloped land

5.2.2 Current Adjoining Property Uses

Dir	Street Address	Description
N	2031 Street HWY 36	Residential
E	River Bar Road	Undeveloped and Wolverton Gulch
W	1576 Street HWY 36	Commercial truck storage yard
S	River Bar Road	Undeveloped land and residential

5.2.3 Topographic Characteristics

Terrain:	Flat to gently sloping, 10-15 foot cliff from the south to the north on the east side of the Property
Direction of Downward Slope:	Towards the east-northeast
On-site Water Bodies:	None observed
Other Significant Features:	None observed

5.2.4 General Description of Structures

Buildings/# of Floors	A barn to the northeast parcel 204-171-047, No structures are present on remaining of the parcels
Approx. Building Area:	Approximately 2,800 SF
Approx. Year Built:	1940s
Ancillary Structures:	None observed
Sources of Heating & Cooling:	No heating or cooling systems were present at the Property.
Potable Water/Sewage Disposal:	No potable water or sewer services were present at the Property.

5.3 Interior & Exterior Observations

5.3.1 Storage/Usage of Hazardous Substances and Petroleum Products

The following hazardous substances and petroleum products were observed to be stored and used by property occupants:

Occupant	Substance	Qty/Container Type	Storage Conditions
NA	No significant storage or use noted		

5.3.2 Drums

No hazardous substance or petroleum product drums were noted on the Property.

5.3.3 Unidentified Substance Containers

No unidentified substance containers suspected of containing hazardous substance or petroleum product were noted on the Property.

5.3.4 Other Hazardous Substances/Petroleum Products

No other containers of hazardous substances or petroleum products were noted on the Property.

5.3.5 Bulk Petroleum/Hazardous Material Storage Tanks

The following storage tanks for bulk petroleum or hazardous material storage were identified or reported to be present; or are suspected to be present based on visual observations:

AST/ UST	Product	Capacity	Construction	Year Installed	Status	Location/Notes
(none)						

5.3.6 PCBs in Oil Filled Electrical/Hydraulic Equipment

A pole mounted transformer was observed at the southeast side Property. There were no leaks observed around the transformer.

5.3.7 Odors

No strong, pungent or noxious odors were noted on the Property.

5.3.8 Pools of Liquid

No standing water or pools of liquid likely to contain hazardous substances or petroleum products were noted at the Property.

5.3.9 Interior Stains or Corrosion

No interior stains or corrosion due to hazardous substance/petroleum products spills/releases were noted at the Property.

5.3.10 Interior Drains/Sumps

No floor drains or sump pits were noted at the Property other than for storm water or sewage management.

5.3.11 Exterior Pits/Ponds/Lagoons

No exterior pits, ponds or lagoons was identified on the Property in connection with waste treatment or disposal.

5.3.12 Stained Soil, Pavement/Stressed Vegetation

No stained soil, pavement or stressed vegetation was observed at the Property.

5.3.13 On-Site Solid Waste Disposal/Fill Material

No evidence of any on-site solid waste dumping was noted at the Property. No evidence of recently deposited fill materials was observed at the Property.

5.3.14 Waste Water

Sanitary sewage generated at the Property is discharged via an on-site septic system. See Section 5.3.15 for additional details regarding the septic system.

Storm water runoff at the Property is discharged via roof drains into the municipal sewer system.

No additional waste water discharges were identified at the Property.

5.3.15 Septic Systems

No septic systems were identified at the Property. Based on the history of site development, the prior use of a septic system for sanitary sewer disposal cannot be ruled out. The on-site septic systems are not anticipated to be a REC in connection with the Property. However, should the Property be planned for redevelopment in the future, the septic systems should be properly removed under applicable rules and regulations.

5.3.16 Wells

Hillmann observed a water well on the Property.

5.3.17 Railroad Spurs

The following railroad spurs were noted on the Property:

The Northwestern Pacific rail line formerly ran through the northern portion of the Property; however there was no evidence of the track left during the site reconnaissance. The area where the track ran was partially obscured by heavy vegetation so parts of the track may still exist.

6.0 INTERVIEWS

6.1 Interviews with Past and Present Owners and Occupants

Subject	Name/Affiliation	Summary
Property Owner / Representative	Not applicable	The Property owner / representative was not available for interview at the time of the assessment.
Property Occupants	Not applicable	Property was unoccupied.
Past Owners, Occupants, Operators	Not applicable	Past owners/occupants of the Property were not available for interview at the time of the assessment.
Owners/Occupants of Adjoining or Nearby Properties	Not applicable	The Property was not an abandoned property with evidence of unauthorized uses or uncontrolled access; therefore, interviews with adjoining or nearby property owners or occupants were not conducted.

6.2 Interviews with State and/or Local Government Officials

Written and on-line requests for environmental records of the Property from State and Local governmental agencies are detailed in Section 4.4.

7.0 BUSINESS ENVIRONMENTAL RISKS

In accordance with the contract agreement for this assessment, Hillmann has performed cursory reviews of several potential Business Environmental Risks (also known as “Non-Scope Considerations”). The ASTM E1527-13 standard defines the term business environmental risk (BER) as, “*a risk which can have a material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate, not necessarily limited to those environmental issues required to be investigated in this practice.*”

7.1 Asbestos-Containing Material (ACM)

The contracted scope of work included a cursory visual screening of the accessed portions of buildings at the Property built prior to 1990 for suspect asbestos containing materials (ACM). The information provided in this section, where applicable, is limited to identification of potential suspect materials in the readily accessible and observed areas of the building, and their general condition. This is not intended to be a comprehensive survey for the presence of ACM, and no testing has been conducted.

No buildings were present at the Property.

7.2 Lead-Based Paint

The contracted scope of work included a cursory visual screening of the condition of painted surfaces in the accessed areas of residential buildings/units built prior to 1980. This is not intended to constitute a comprehensive survey for LBP or potential lead hazards, and no testing has been conducted.

No residential buildings were present at the Property.

7.3 Radon

Data compiled by the USEPA, as summarized by the regulatory database report, indicated that the Property is located in an area classified as Zone 3 or 'low risk' area for radon. Radon testing was not included in the scope of this assessment.

7.4 Mold/Microbial Damage

As per the contracted scope of work, Hillmann conducted a cursory visual screening of the accessed areas of the building for evidence of significant damage to building materials and finishes as result of moisture intrusion and/or mold/microbial growth. Hillmann did not observe evidence of significant problems with moisture intrusion or mold/microbial growth at the Property.

7.5 NWI Mapped Wetlands

As indicated in the Physical Setting Source table of Section 4.1 a streamside Management Area - Wolverton Gulch, is depicted along the eastern edge of the Property.

The scope of work for this assessment excludes a visual determination of regulated wetlands at the Property. It is emphasized that, regardless of the wetlands data obtained via the EDR Geospatial-Physical Setting Source Addendum, a delineation of regulated wetlands by a qualified professional would be warranted to determine the presence or absence of regulated wetlands at the Property.

7.6 Lead in Drinking Water

The scope of work for this assessment included a review of the potential for elevated levels of lead in drinking water by determining the source of the drinking water supply and a review of available compliance or testing data.

Potable water service at the Property is provided by a utility connection with [Hydesville water] A recently published water quality report from the utility indicated compliance with USEPA water quality standards for lead in drinking water. A copy of the report has been attached in Appendix F.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 2F24-4B5B-8315
PO # NA
Project C3-7896

UNMAPPED PROPERTY

This report certifies that the complete holdings of the Sanborn Library, LLC collection have been searched based on client supplied target property information, and fire insurance maps covering the target property were not found.

Sanborn® Library search results

Certification #: 2F24-4B5B-8315

The Sanborn Library includes more than 1.2 million fire insurance maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow and others which track historical property usage in approximately 12,000 American cities and towns. Collections searched:

- Library of Congress
- University Publications of America
- EDR Private Collection

The Sanborn Library LLC Since 1866™

Limited Permission To Make Copies

Hillmann Environmental Co. (the client) is permitted to make up to FIVE photocopies of this Sanborn Map transmittal and each fire insurance map accompanying this report solely for the limited use of its customer. No one other than the client is authorized to make copies. Upon request made directly to an EDR Account Executive, the client may be permitted to make a limited number of additional photocopies. This permission is conditioned upon compliance by the client, its customer and their agents with EDR's copyright policy; a copy of which is available upon request.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

CA-36
FORTUNA, CA 95540

COORDINATES

Latitude (North): 40.5427460 - 40° 32' 33.88"
Longitude (West): 124.1168740 - 124° 7' 0.74"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 405419.6
UTM Y (Meters): 4488387.5
Elevation: 88 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL..... National Priority List

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>REYNOLDS RV REPAIR</i>	<i>988 HIGHWAY 36</i>	<i>WNW 1/4 - 1/2 (0.487 mi.)</i>	<i>3</i>	<i>13</i>
Database: CPS-SLIC, Date of Government Version: 12/09/2019 Facility Status: Open - Inactive Global Id: T10000001463				

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/16/2019 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
KEN BAREILLES TRUCKI EPA ID:: CAL000440754	1178 HWY 36	NW 1/8 - 1/4 (0.209 mi.)	2	12

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>EEL RIVER LUMBER PRO</i> Database: CUPA HUMBOLDT, Date of Government Version: 11/13/2019 Permit Status: 01 - Active Permit Status: 02 - Inactive Permit Status: (none) Local Site Id: FA0003173	<i>1576 HIGHWAY 36</i>	<i>NW 0 - 1/8 (0.087 mi.)</i>	<i>1</i>	<i>9</i>

should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/30/2020	Source: EPA
Date Data Arrived at EDR: 02/05/2020	Telephone: N/A

	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 01/30/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/30/2020

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 01/30/2020	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895
Date Made Active in Reports: 12/20/2019	Last EDR Contact: 03/25/2020

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/16/2019	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/16/2019	Telephone: (415) 495-8895

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfields Sites Listing

A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/18/2019	Source: State Water Resources Control Board
Date Data Arrived at EDR: 12/19/2019	Telephone: 916-323-7905
Date Made Active in Reports: 02/19/2020	Last EDR Contact: 03/24/2020
Number of Days to Update: 62	Next Scheduled EDR Contact: 07/06/2020
	Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/02/2019	Source: Environmental Protection Agency

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 06/11/2019
Date Data Arrived at EDR: 06/13/2019

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Date of Government Version: 12/03/2019	Source: DTSC and SWRCB

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

Date of Government Version: 12/31/2017	Source: California Environmental Protection Agency
Date Data Arrived at EDR: 05/29/2019	Telephone: 916-255-1136

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

West Map:	5629090 FORTUNA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic</u>
HYDESVILLE	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION</u> <u>FROM TP</u>	<u>GENERAL DIRECTION</u> <u>GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: FERNDALE

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	21 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
2	21 inches	61 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
3	61 inches	80 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Surficial Soil Types: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam
stratified
silty clay loam
sand
silt loam
coarse sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

Dear Mr. Young:

I am in receipt of your two correspondences dated March 5, 2007 regarding APN 204-171-47 incorrectly identified as 2020 State Highway, Hydesville. If it is really mine, the address is 1576 Hwy 36, Fortuna.

Please send the described "demolition" permit application so that it might be submitted prior to your April 2, 2007 deadline.

Additionally, under both the Freedom of Information Act and my right to know my accuser, I am formally requesting the identity of the "Complainant" to whom you are forwarding copies of my correspondence from you.

Sincerely,

Phil Nyberg

Eureka, CA 95501

Dear Mr. Young:

I am in receipt of the attached complaint of alleged Addition/Remodel involving Parcel #204-171-047.

The activity involved removal of a structure that your Environmental Health Department had previously determined to be uninhabitable. The removal was essentially complete at the time of receipt of your communication.

Your communication states that the demolition of a structure requires a "building permit". Surely I can't be the only person who would deem such terminology absurd.

I assure you that I had no idea that removing an uninhabitable old house from my own property required your blessing. The job is complete - the "hazardous" situation has been eliminated - there is nothing to inspect. Pursuing an after the fact permit would be simply extorting money with no beneficial purpose. Accordingly I would ask that the matter be dropped.

Recently my car was stolen in Fortuna, the couple captured in it three days later in Eureka - the car deemed totaled. The Humboldt County District Attorney couldn't seem to find the time to prosecute the perpetrators. I guess it would be interesting to see if it is more important to prosecute folks who are simply removing a hazard from their property.

Again, I respectfully request that you consider this matter closed.

Sincerely,

Phil Nyberg

Re: Complaint regarding alleged Addition / Remodel
Violation of Humboldt County Code Sections 311-10; 312-3; 312-51.5 and 314-7.1
Assessment Parcel Number 204-171-047-000 Location: 2020 St Hwy 36, Hydesville
Property Zoning AE-20 (Agriculture Exclusive) 1576

Dear Property Owner:

By certified letter of February 9, 2007 you were advised of an apparent violation of the Humboldt County Code on your property, and were asked to contact our Department.

The Addition / Remodel will require building permits. Contact the Building Division to start the Permit process. If you have additional questions you may contact the Building Division at (707) 445-7245 or 1-800-900-4034.

As you have avoided and failed to respond in any manner perhaps more drastic measures are called for to enable us to remedy any violations.

It is your disregard of these notices that require these more drastic actions to abate a public nuisance. Under guidelines set forth in Humboldt County Code Section 2131, the Code Enforcement Unit, in addition to the issuance of a formal Notice of Nuisance, may issue an Order Imposing Administrative Penalty and record a Lis Pendens against your property to insure payment of any monetary awards which may be awarded after a proper hearing. It should be noted that under the Administrative Penalty Ordinance, each day of violation subjects the property owner to a separate penalty of between \$250 and \$10,000.

Please be advised that this will be the last notice to you before this matter is referred to the District Attorney Investigator for further proceedings. However, we would like to resolve this violation and you may contact us in writing or by phone at (707) 268-3702 **no later than April 2, 2007**, and avoid further enforcement action.

Thank you for your immediate attention to this matter.

Sincerely,
Community Development Services

cc. **Complainant**

Fortuna, CA 95540-1840

Subject: Rental Dwelling 1576 Hwy 36

Dear Dr. Nyberg,

This is a follow-up to our conversation of April 8 and your letter of April 9, 2004. As I indicated during our conversation, the Division of Environmental Health (DEH) identified housing violations at the above rental dwelling during our inspection of November 12, 2003 (see enclosed inspection report). Violations noted include a broken window, faulty wiring on back of the house, a missing board on front porch, mold, and rodent access points into the dwelling. In addition diesel contamination outside the dwelling is a health concern due to the potential for indoor contamination.

As you indicated, you have possible renters who wish to perform additional work on the dwelling including repair of the above items. You also indicated that this may take up to six months. We request that once this work is complete you contact us to perform a follow-up inspection to clear the violations identified during our November 12, 2003 inspection. This should be done prior to occupancy. In addition, any remodeling work should be performed under a permit obtained from the Humboldt County Building Division. They can be contacted at 445-7245.

The extent of diesel contamination and the possible impact to groundwater should be investigated, but will not be overseen by our office. You do have the option of requesting oversight of the investigation and cleanup by our office. If you wish to request our review and sign off, then an agreement would need to be signed acknowledging the scope of work and the need to pay DEH's review time at an hourly rate (currently \$96).

If you have any additional questions, please contact me.

Sincerely,

Brian Cox, REHS
Director, Division of Environmental Health

Dear Mr. Cox:

Thank you for this mornings conversation regarding the issue of our 1576 Hwy 36 house.

After our conversation I realized that this was the first time I had been informed that there were other issues of record involving the occupancy of the house.

In the event that we choose to repair the building, I would appreciate you providing me a listing of the items of concern so that we may be sure all are accounted for in our improvements.

Thank you,

Phil Nyberg

Subject: Phil Nyberg

Phil Nyberg and I finally connected this morning concerning his rental at 1576 Hwy 36 in Alton. The former tenant has moved out and the property is vacant. I indicated to him that the contaminated soil is his responsibility, is primarily a liability issue for him as the property owner, and that our authority is limited in requiring clean-up. I also let him know that we have visited the site and that there were substandard housing issues that still needed to be resolved including a broken window, a missing board on the front porch, substandard wiring on the back porch, mold, missing heater, and other items. He also indicated that the front porch is contaminated with diesel, but said the dwelling is an old farm house which may need to be demolished or completely renovated.

He said that he has prospective tenants who would like to renovate the dwelling and live there rent free for five years, but was waiting for clearance from us on the contamination issue. The tenants would not move in for six months while they performed some of the renovation work. I said that he was clear to make this arrangement, but asked that he or the new tenants contact us prior to occupancy so that we can clear the substandard housing violations on record. He agreed to this.

We should send a letter to clarify the need to contact us prior to occupancy and that he should obtain the appropriate permits from Building Division.

Please let me know if you need any additional information.

From: Cox, Brian
Sent: Thursday, April 01, 2004 2:57 PM
To: Crandall, Phillip; Arnold, Jeff
Subject: RE: Nyberg Issue

Two of our staff visited the site. The first visit was based on a housing complaint. The housing inspector referred the diesel contamination to the haz mat inspector. After receiving the referral, our haz mat inspector, Jeff Birdsall visited the site and found a 3 x 4 foot diesel stain and received information that at least 30 gallons of diesel had been spilled on the site. He inspected the site in November 2003, verbally notified Mr. Nyberg in November of the situation, and wrote a notice of violation (NOV) in early January 2004 indicating in the letter that we had visited the site. We delayed the issuance of the NOV because Mr. Nyberg said in November that he could not access the property for 60 days. Jeff Birdsall had hoped that Mr. Nyberg would voluntarily clean up the property without sending a notice. Nyberg has been cooperative on another of his sites that was contaminated.

I have seen that Planning and Building will often send notices without visiting sites or confirming the facts, but the Division of Environmental Health always visit sites and confirms information before sending notices of violation.

I'm ready to call Nyberg to tell him that ultimately it is his responsibility to clean up the contamination as a property owner, that we do not need to oversee the cleanup. We are not mandated to require clean-up of contaminated sites, except in cases in which there is a specific immediate threat to human health and safety. For this site, the harm to future tenants and to groundwater is not really clear. The only way to know is if Mr. Nyberg commissioned an investigation of the extent of contamination. There are no specific public health protection standards for small spills of petroleum products. In many cases we would refer contamination concerns to the state, however this one is too small for the state to respond. The laws relating to groundwater contamination mostly concern the responsible party's future liability, which in many cases is ultimately decided by the courts.

We can discuss this on Monday and go over the file. I've discussed with staff that they need to be more proactive in keeping me informed of these issues before they escalate, but we can't always predict which ones will become volatile. And yes, we are all innocent until proven guilty.

Subject: RE: Nyberg Issue

Roger said that Nyburg received a letter from the County (EH) that he had contaminated land. He said that the County took the word of a former tenant of the property that there was contamination. Nyburg said that the County never even came out to visit before sending him the letter, asking that Nyburg test the soil for contamination, send the results to the County, and finally clean up the property. I hope we didn't do that..... aren't we innocent until proven guilty?

Dear Roger:

I'm passing this stuff along to you in the hope that there is some way some common sense might be instilled in this, the waste of your County agencies.

If they could just accept that nothing is or needs to be perfect and that questionable, non-recurrent, probably non-existent problems might be overlooked, they just might not drive every productive human being out of this county.

Thanks for anything you can do.

HUMBOLDT CO. DIVISION
OF ENVIRONMENTAL HEALTH

Jeff Birdsall
Humboldt Co. Dept. of Health
100 H St., Suite 100
Eureka, CA 95501

Dear Mr. Birdsall:

I have just returned to work following hip replacement surgery and am responding to your letter of February 27, 2004 which was delivered in my absence.

My purpose in responding is to re-iterate that I do not accept the premise that there, in fact, is diesel contaminated soil located on my property at 1576 Hwy. 36 in Fortuna California.

As you were previously notified, when our tenant was evicted we removed the diesel drum in question along with the makeshift lines going to his "grow operation" from the front porch of the house. Inspection of the area adjacent to the porch reveals normal vegetation which would not be the case with contaminated soil.

The idea that you are pursuing an improbable case of "contamination" based on the report of a disgruntled, pot growing former tenant frankly outrages me. In the unlikely event that Mr. Mehrten's criminal activity did result in any spillage that reached the soil through the porch, it would truly be minimal and you are effectively asking me to tear the house down to find out.

There are, I'm sure, environmental issues before your department that have merit and potential deleterious consequences to our County. This is certainly not one of them.

At a time when County Government funding is at a premium, it would seem that the policy of harassing citizens over issues as minor and questionable as this one would be re-evaluated and resources concentrated on situations of meaningful impact. I would certainly hope the County's budget-setting process will express the need for some sort of common sense in department operations.

Once again, the source of the potential problem has been removed. I have seen no evidence that there has been spillage involving the soil.

Sincerely,

Phil Nyberg

**THE FOLLOWING VIOLATION CATEGORY SECTIONS ARE REQUIREMENTS
OF THE CALIFORNIA HEALTH & SAFETY CODE**

INSECTS - Eliminate insects (cockroaches, flies, fleas, etc.) and all evidence of insects by safe, legal, and effective methods. Eliminate vermin harborage conditions by sealing cracks and crevices in walls, cabinets, etc.

RODENTS - Eliminate rodents through safe, legal, and effective methods. Rodent-proof exterior and unit entry doors to eliminate gaps greater than ¼". Seal all openings at walls, floors, ceilings, inside cabinets, and around gas and plumbing lines. Eliminate evidence of rodents.

WATER SUPPLY - Provide adequate hot (110°F) and cold running water under pressure to all plumbing fixtures at all times.

PLUMBING - Maintain all plumbing lines and plumbing fixtures free from defects. Properly repair or replace all loose, leaky, clogged or otherwise faulty plumbing lines.

STAIRS - Repair/replace all loose, missing, or damaged balustrades, balusters, handrails, treads, or risers at stairways and stair landings.

WALLS - Repair/replace all water damaged, broken, cracked, buckled, missing, peeling, blistered, or deteriorated walls, wall coverings (including areas within cabinets or behind drawers), and doors.

FLOORS - Repair/replace all torn, deteriorated, worn, loose, damaged, cracked, uneven, or warped floors or floor coverings.

CEILINGS - Repair/replace all water damaged, broken, cracked, missing, peeling, blistered, sagging, or deteriorated ceilings or ceiling covering.

ELECTRICAL - Repair/replace all damaged, defective, worn, or missing electrical wiring, outlets, or switch plates.

POOL/SPA - Maintain the swimming pool and area clean and in good repair. Provide required signs and safety equipment. (CA H & S)

TOILETS - Repair/replace all damaged, missing, cracked, broken, malfunctioning, or deteriorated toilets and their components.

SINKS - Repair/replace all damaged, missing, broken, malfunctioning, cracked or deteriorated sinks (including worn enamel) or sink fixtures.

BATH/SHOWERS - Repair/replace all damaged, missing, broken, cracked, malfunctioning, or deteriorated baths/showers or their fixtures.

COMFORT HEAT - Provide comfort heat (70°F) to all dwelling units in accordance with all local building requirements. Repair/replace any damaged, broken, malfunctioning, or deteriorated comfort heating units. (CA H & S 17920.3)

APPLIANCES/FURNISHINGS - Maintain all owner-furnished appliances and furnishings in good condition or repair.

OCCUPANCY - Areas such as closets, pantries, toilet rooms, service rooms, garages, laundries, connecting corridors, unfinished attics, cellars and similar spaces are not allowed for human occupancy.

LIGHTING - Repair/replace all damaged, malfunctioning, missing or deteriorated required lighting fixtures and their components.

WINDOWS/VENTILATION - Repair/replace all damaged, broken, cracked, torn, inoperable, malfunctioning, missing, or deteriorated windows, ventilation units, window screens, or their components. Window screens shall be 16" mesh or smaller in tight fitting frames.

REFUSE AREA - Store all garbage and refuse in appropriate containers with tight-fitting lids. Garbage shall not be kept for more than 7 days. Rubbish may not be kept for more than 15 days. Maintain trash areas and containers clean and in good condition.

SANITATION - Maintain the building, dwelling units, and the premises free from debris, rubbish, garbage and other offensive matter. All usable material, including wood, shall be stored off the ground not less than 18 inches to prevent rodent harborage. Animal, fowl or bird other than cats, dogs, canaries and birds of the Psittacine family are required to be kept at least 35 feet from any food establishment or dwelling and more than 100 feet from any school or hospital.

MAINTENANCE - Maintain the building (s) and all units in good repair.

ROOF - Repair/replace damaged, missing, or deteriorated roof or roof covering.

VENT SCREENS - Provide corrosive resistant wire mesh screen with openings no larger than 1/16 of one square inch in a tight fitting frame to all foundation vent openings and all other openings in building to prevent the entry of vermin.

CALIFORNIA STATE FRANCHISE TAX BOARD WARNING

Sections 17274 and 24436.5 of the State Revenue and Taxation Code provide; in part, that a taxpayer, who derives rental income from housing determined by the local regulatory agency to be substandard by reason of violation of state or local codes dealing with health, safety, or building, cannot deduct from state personal income tax and bank and corporation income tax, deductions for interest, depreciation or taxes attributable to such substandard structure where the substandard conditions are not corrected within six (6) months after notice of violation by the regulatory agency. **THE DATE OF THIS NOTICE MARKS THE BEGINNING OF THAT SIX-MONTH PERIOD.** The Department is required by law to notify the Franchise Tax Board of failure to comply with these Code sections.

Please be advised that the above WARNING is for the purpose of compliance with the State Revenue and Taxation Code only. Compliance with Health Laws as noted on the attached Inspection Report or Notice of Violation must be made within the time specified on the Report or notice.

LEAD CORRECTION ADVISORY

WARNING: You are hereby advised that corrections ordered by this report/official notice may disturb surfaces that may contain lead-based paint. Lead-based paint can be commonly found in housing built prior to 1978.

Prior to making any corrections ordered and in conjunction with repairs or rehabilitation, you must determine if lead is present in the dwelling unit/apartment/room. All corrective actions must be conducted in a manner that will protect occupants, workers, and others from exposure to contamination.

OTHER INDOOR ENVIRONMENTAL HAZARDS

Exposure to internal environmental elements such as asbestos, molds and mildew, dust mites, droppings from cockroaches and rodents, carbon monoxide, formaldehyde, pesticides, and radon also contribute to unhealthy housing environments. All corrective actions must be conducted in a manner that will protect occupants, workers, and others from exposure to these elements.

Subject: Illegal Disposal of Hazardous Waste

Location: 1576 Highway 36, Hydesville, CA

Dear Mr. Nyberg:

This letter is in response to your letter dated February 17, 2004. The letter sent to you by Humboldt County Division of Environmental Health (DEH) on January 6, 2004 required that you have the diesel-contaminated soil on your property excavated. Additionally, you were to have disposed of the contaminated soil as hazardous waste or have it characterized by laboratory analysis for disposal and provide copies of receipts to DEH verifying legal disposal by February 27, 2004.

DEH does not concur with your statement that the contaminated soil does not constitute a public health or environmental risk. Additionally, the extent of contamination cannot be determined until the excavation has commenced and the area where the spill occurred has been made more accessible.

DEH will provide you with an extension until March 14, 2004 to submit copies of receipts to our office.

Please feel free to contact me at (707) 268-2234 if I may be of assistance in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Birdsall", with a long horizontal flourish extending to the right.

Jeff Birdsall, REHS
Humboldt County Department of Health and Human Services
Division of Environmental Health
100 H Street, Suite 100
Eureka, CA 95501

Dear Mr. Birdsall:

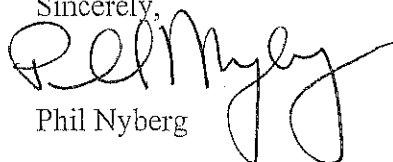

This letter is in reference to our telephone conversation in November 2003 and your subsequent letter of January 6, 2004.

As you are aware, at the time of your call we were in the process of evicting Mr. Mehrtens from 1576 Hwy 36, where he was using the illegal diesel setup you described to heat and light his extensive upstairs marijuana growing operation. His response was to move his plants, notify you he had spilled diesel and refuse to deal with the issue. The eviction has since been completed, the abandoned drums and lines removed and properly disposed of.

It appears that the magnitude of the alleged spillage was overstated by Mr. Mehrtens simply as a way to make his eviction as troublesome as possible and does not constitute a public health or environmental risk. The massive debris has been removed and plans are underway to dismantle or burn the house itself.

I trust that you will concur that this matter should be closed as having either no or insignificant public health or environmental implications.

Sincerely,

Phil Nyberg

Phil Nyberg
105 N. Main Street
Fortuna, CA 95540

Subject: Illegal Disposal of Hazardous Waste

Location: 1576 Highway 36, Hydesville, CA

Dear Mr. Nyberg:

On November 14, 2003, Humboldt County Division of Environmental Health (DEH) responded to a complaint at the above location. DEH observed three fifty-five gallon drums of diesel fuel stored on the porch of the house. There was a plastic line delivering fuel from one of the drums to what the tenant of the property said was a "fire monitor heater" in the home. DEH observed soil contaminated with diesel fuel below the porch on the southwest side. DEH was not able to observe if there was additional contamination under the porch due to inaccessibility. DEH told the tenant what corrective actions were needed and the tenant refused to agree to make them.

The illegal disposal of hazardous waste on your property presents a risk to public health and the environment, and constitutes a violation of the laws of Humboldt County and the State of California. DEH requires that all the diesel contaminated soil be excavated and disposed of as hazardous waste or be characterized by laboratory analysis for disposal. Provide receipts verifying lawful disposal to this office by February 27, 2004. I have included a partial list of local contractors and hazardous waste disposal information for your convenience. DEH recommends that the drums on the porch be stored in a more secure manner in order to prevent any potential additional releases.

Please feel free to contact me at (707) 268-2234 if you have any questions or if I may be of assistance.

Sincerely,

A handwritten signature in black ink that reads "Jeff Birdsall".

Humboldt County Division of Environmental Health
100 H Street, Suite 100
Eureka, California 95501

Subject: Phase II Subsurface Investigation Workplan at the Former Eel River Lumber Products, Mill C, Highway 36, Alton, California

Dear Mr. Crawford:

SCS Engineers is pleased to present this letter workplan for a Phase II Subsurface Investigation at the Former Eel River Lumber Products, Mill C, Highway 36, Alton, California. The proposed work includes advancing four borings at the locations illustrated on the attached site plan and submitting the samples for laboratory analyses

A. Methodology

The borings will be advanced using 7 to 8-inch hollow stem augers to an approximate depth of 20 to 25 feet bgs, depending on depth to groundwater. One soil sample will be collected from borings B-2, B-3 and B-4, from the approximate groundwater interface or at the discretion of the field geologist. The soil sample sleeves will be covered with Teflon sheeting, sealed with plastic end caps, labeled, and placed in an ice chest. The soil sample(s) will be transported to a California-certified analytical laboratory using proper chain-of-custody protocol. An SCS geologist will log the soil from the borings in general accordance with the Unified Soil Classification System.

A grab groundwater sample will be collected from the borings using a separate disposable bailer for each boring. Depending on apparent water quality and hole stability, a temporary screen may be placed in the boring prior to collection of the grab groundwater sample. The samples will be properly labeled and placed in a cooler with ice, and transferred to a California-certified analytical laboratory using proper chain-of-custody protocol.

The soil borings will be backfilled to the surface with low permeability material in accordance with HCDEH requirements after sampling is completed in order to minimize vertical fluid migration within the boreholes.

Mr. Norman Crawford

RE: Underground tank closure Sawmills A, B, and C.

Dear Mr. Campbell:

This department has received contradictory reports regarding the soil analysis and the contractor failed to call for inspection as agreed on the permits.

For the above stated reasons the previous "sniff test" is not acceptable.

Please provide the appropriate soil sample analysis according to the enclosed information within thirty (30) days.

Verification of disposition of the tank by a manifest or receipt is also required before final approval.

Sincerely,
Paul W. Anderson, M.D., M.P.H.

RE: Tank Closure - Eel River Sawmills A, B, C

Dear Jim:

Per your letter of September 13, 1988 the following additional information relative to the above listed closure is submitted:

- Item 1 - Soil sample analysis - Allan Baird performed sniff tests - See attached waiver form.
- Item 5 - We completed the closure of this facility during the month of November 1987. The final inspection can be made at your convenience.
- Item 6 - Rinsate Disposal - See attached letter.

Sincerely,

David W. Morris

Re: Underground tank closures Mills A, B, C

Dear Mr. Campbell:

This department will be unable to give final approval of your underground storage tank closure until the following information is received:

1. Soil sample analysis results.
2. Passing precision tank tightness test within one year of physical closure date.
3. Copy of manifest showing delivery of hazardous materials to an approved disposal site.
4. Soil sample boring log.
5. Call for final inspection.
6. Other:
 1. Rinsate disposal
 2. Permit has expired

Please provide the above indicated items to this department within fifteen (15) days.

TANK CLOSURE

ATTENTION: Jim Clark

Dear Jim,

We are requesting a waiver for an abandoned and filled fuel storage tank belonging to E. R. S. M. in FORTUNA / RIO DELL. We augered test holes and took samples of soils from approximately 2' feet deep and 5' feet deep. We detected no odor of gasoline or other petroleum substances by smell in either of our samples taken. Therefore, we are requesting a waiver based on the lack of the vapors from petroleum substances. We have the samples stored here at our office.

If you need additional information, feel free to call us at 725-5182. Thank you.

Sincerely,

Alta M. Baird

RECEIVED
JUL 16 1987
HUMBOLDT CO. HEALTH DEPT.

Mr. Dave Frye
Eel River Sawmills
1053 Northwestern Avenue
Fortuna, CA 95540

Dear Mr. Frye:

This letter is to confirm my inspection of Eel River Sawmills, Mill C in Alton. The purpose of the inspection was to verify the compliance of the facility with Waste Discharge Requirements Order No. 85-113. My observations during the inspection verify that the mill is being operated in compliance with Order No. 85-113.

During the inspection we discussed the abandoned underground tank at the mill. As we discussed, it would be recommendable to coordinate with the Humboldt County Health Department to properly abandon the tank.

Sincerely,

ORIGINAL SIGNED BY

Cathleen A. Goodwin
Water Resource Control Engineer

Gentlemen:

The enclosed permit for your gasoline storage tank(s) should be posted at the location specified on the permit. Should there be a change in the status of the permit, such as a change in ownership or the discontinued use of a tank, please notify our office so the permit can be reissued reflecting the changes.

Before the installation of additional gasoline storage tanks of 250 gallons capacity or greater, information on installation requirements should be obtained from our office.

Thank you for your help in this matter.

Gentlemen:

The Humboldt County Air Pollution Control District requires permits for gasoline storage tanks with capacities greater than 250 gallons. Since you are now the owners of the sawmill at Alton, the permit, H-V005, issued to Halvorsen Lumber Products is no longer valid and needs to be reissued under your ownership. Please complete the enclosed application for transfer of ownership and return with the \$10.00 transfer fee. Also complete applications for gasoline storage tanks at your sawmills near Rio Dell and Redcrest; we don't have permits issued on these (no fee required). The attached diagram illustrates a submerged fill pipe which is required in gasoline storage tanks installed after January 1, 1971.

To: Shilpa Sunil
Subject: 1576 Hwy 36

Hi Shilpa, I just got into my database. Looks like we have a business, Steve Wills Trucking and Logging at that address (CERS ID 10020253). However, it appears that business operations for them occur on APN 204-171-003, not on any of the parcels you cited (204-081-002, -004, -007). Anyway, not sure if that helps or confuses, feel free to call to discuss, and again, when I get into the office this Thurs Apr 9, I will see if I can glean any more info from any paper files.

Thanks,

Norm (707) 599-4788

Hello Shilpa-

The parcels in question are zoned Agriculture Exclusive and appear to be engaged in agricultural use. It is not clear whether it is hay production, cattle grazing or a combination of both. I hope that answers your question. If you need any additional information, feel free to reach out.

Thanks.

APPENDIX G

PROJECT PERSONNEL QUALIFICATIONS

J. Ryan Terwilliger

Operations Director, West Coast

EDUCATION:

B.S. Environmental Science, University of Southern California, Los Angeles, CA -2006

CERTIFICATION:

Cal-OSHA Certified Asbestos Consultant
CDPH Accredited Lead
Inspector/Assessor/ Project Monitor

CA Certified Site Surveillance Technician
OSHA 40 - Hr HAZWOPER

YEARS OF EXPERIENCE:

With Hillmann: 6 years

Total: 12 years

PROFESSIONAL EXPERIENCE:

Mr. Terwilliger is responsible for business operations, fiscal management and field staff management for Hillmann's California Office. He also performs asbestos surveys and investigations to identify asbestos and lead materials associated with occupational hazards. He supervises work practices and controls in accordance with job specifications, current EPA, OSHA and State Regulations for Asbestos remediation projects in commercial, industrial and multi-family residential buildings. Mr. Terwilliger performs IAQ, mold and moisture investigations in commercial, industrial and residential facilities nationwide. He also performs awareness training for asbestos, lead and microbial agents. Mr. Terwilliger provides litigation support consultation.

Representative Experience Includes:

Tishman Speyer Properties, Various locations: Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include environmental health and safety, industrial hygiene, phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs and indoor air quality programs on various commercial, industrial and multi-family residential properties. Mr. Terwilliger is an Environmental Scientist on this contract, conducting on-site environmental services including phase I site assessments and NPDES water quality testing.

Westfield – Environmental Program, Various locations:

Since 2000, Hillmann has been providing an environmental program encompassing environmental health and safety, Phase I environmental site assessments, asbestos and lead surveys, air monitoring, bid administration and O&M programs, industrial hygiene and indoor air quality programs, and hazardous materials assessments on their mall properties throughout the county. Mr. Terwilliger is an Environmental Scientist on this contract performing industrial hygiene services that include indoor air quality monitoring, Phase I environmental site assessments, asbestos and lead surveys.

Brookfield Office Properties, Various sites, CA: Hillmann has been providing hazardous materials surveys, development abatement specifications, and managing the oversight activities during the abatement at various Brookfield owned sites throughout California. Mr. Terwilliger functions as a Project Manager for this contract.

California Department of Transportation, Central Valley and Northern CA: Hillmann has been performing asbestos and Lead-based Paint Surveys for the California Department of Transportation. Performed comprehensive asbestos containing materials and lead-based paint surveys of residential and commercial buildings that were slated for demolition and generated report of findings in order to aid the Department of Transportation (DOT) in facilitating the road improvement programs and building renovations throughout the

Central Valley area. Also during the abatement of asbestos from DOT owned buildings, provided contractor oversight and air monitoring services for regulatory compliance.

Verizon, Various Sites, CA. Hillmann conducted hazardous materials surveys, development abatement specifications, and project monitoring during abatement at various Verizon owned sites throughout California. Mr. Terwilliger functioned as the Project Manager.

Public Storage, Los Angeles, CA: Hillman performed comprehensive asbestos, lead-based paint and universal waste materials survey of commercial and industrial buildings throughout Southern California. Hazardous materials surveys were conducted prior to renovation for the storage units. Mr. Terwilliger developed abatement specifications and managed the abatement activities during the renovations of the buildings. He functioned as the Project Manager on this contract.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 1342-421B-8956

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

STATE HIGHWAY 36
FORTUNA, CA 95540

COORDINATES

Latitude (North): 40.5455100 - 40° 32' 43.83"
Longitude (West): 124.1156560 - 124° 6' 56.36"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 405526.6
UTM Y (Meters): 4488693.0
Elevation: 111 ft. above sea level

MAPPED SITES SUMMARY

Target Property Address:
STATE HIGHWAY 36
FORTUNA, CA 95540

Click on Map ID to see full detail.

MAP ID	SITE NAME	ADDRESS	DATABASE ACRONYMS	RELATIVE ELEVATION	DIST (ft. & mi.) DIRECTION
1	EEL RIVER LUMBER PRO	1576 HIGHWAY 36	CUPA Listings, WDS	Higher	460, 0.087, WNW
2	KEN BAREILLES TRUCKI	1178 HWY 36	RCRA NonGen / NLR	Higher	1101, 0.209, WNW
3	REYNOLDS RV REPAIR	988 HIGHWAY 36	CPS-SLIC, CUPA Listings, CERS	Lower	2570, 0.487, WNW

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State and tribal leaking storage tank lists

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>REYNOLDS RV REPAIR</i>	<i>988 HIGHWAY 36</i>	<i>WNW 1/4 - 1/2 (0.487 mi.)</i>	<i>3</i>	<i>14</i>
Database: CPS-SLIC, Date of Government Version: 09/08/2020 Facility Status: Open - Inactive Global Id: T10000001463				

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 12/14/2020 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
KEN BAREILLES TRUCKI EPA ID:: CAL000440754	1178 HWY 36	WNW 1/8 - 1/4 (0.209 mi.)	2	11

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

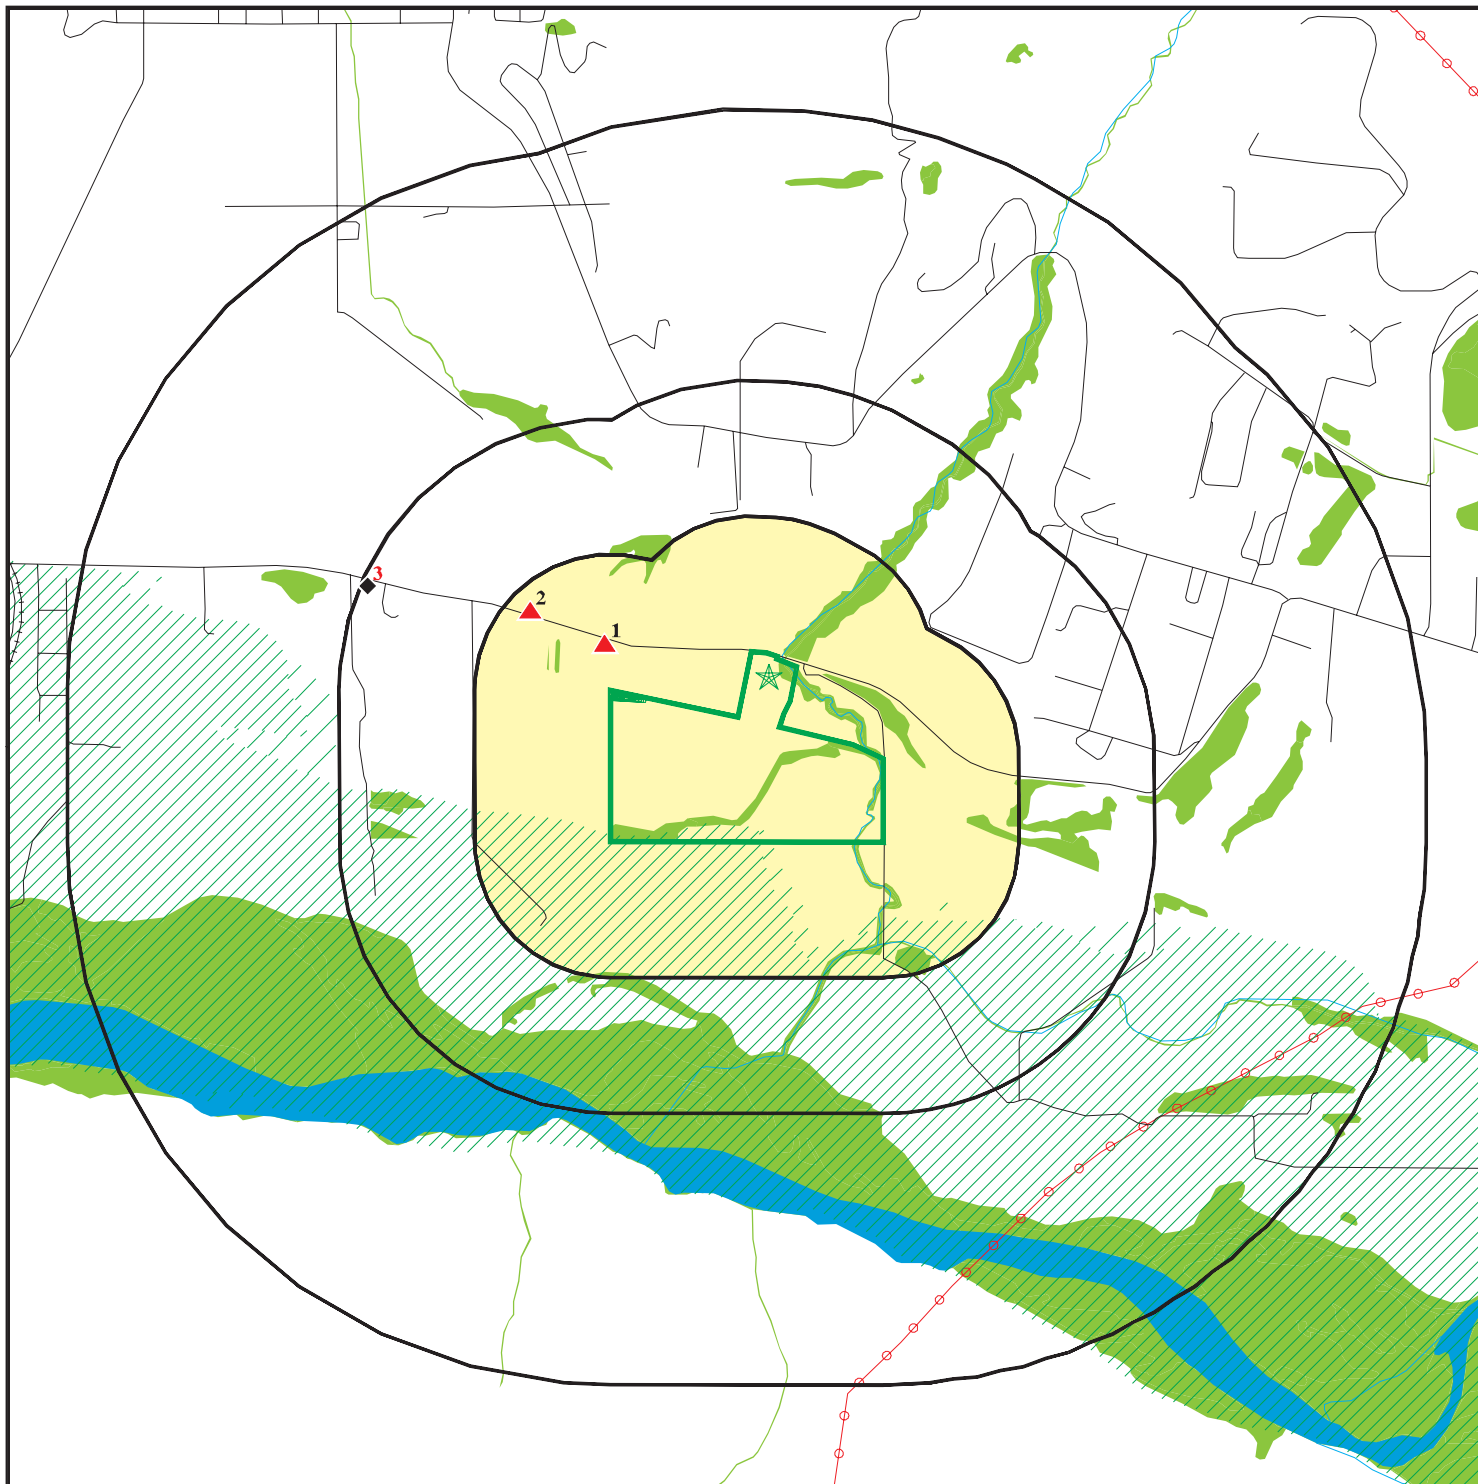

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>EEL RIVER LUMBER PRO</i> Database: CUPA HUMBOLDT, Date of Government Version: 08/13/2020 Permit Status: 01 - Active Permit Status: 02 - Inactive Local Site Id: FA0003173	<i>1576 HIGHWAY 36</i>	<i>WNW 0 - 1/8 (0.087 mi.)</i>	<i>1</i>	<i>9</i>

 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

 Primary Waste: STORMS
 Waste Type2: Not reported
 Waste2: Stormwater Runoff
 Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

 Secondary Waste: Not reported
 Secondary Waste Type: Not reported
 Design Flow: 0
 Baseline Flow: 0
 Reclamation: No reclamation requirements associated with this facility.
 POTW: The facility is not a POTW.
 Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

 Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: N/A
Date Made Active in Reports: 11/25/2020	Last EDR Contact: 01/14/2021
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/12/2021
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 10/28/2020

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 10/28/2020	Source: EPA
Date Data Arrived at EDR: 11/05/2020	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021
	Data Release Frequency: Quarterly

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency
Date Data Arrived at EDR: 12/17/2020	Telephone: (415) 495-8895
Date Made Active in Reports: 12/22/2020	Last EDR Contact: 12/17/2020
Number of Days to Update: 5	Next Scheduled EDR Contact: 04/05/2021

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 12/14/2020	Source: Environmental Protection Agency

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SPILLS 90: SPILLS90 data from FirstSearch

Spills 90 includes those spill and release records available exclusively from FirstSearch databases. Typically, they may include chemical, oil and/or hazardous substance spills recorded after 1990. Duplicate records that are already included in EDR incident and release records are not included in Spills 90.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

CUPA YUBA: CUPA Facility List

CUPA facility listing for Yuba County.

Date of Government Version: 08/06/2020
Date Data Arrived at EDR: 08/07/2020
Date Made Active in Reports: 10/26/2020
Number of Days to Update: 80

Source: Yuba County Environmental Health Department
Telephone: 530-749-7523
Last EDR Contact: 11/03/2020
Next Scheduled EDR Contact: 02/08/2021
Data Release Frequency: Varies

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 08/10/2020
Date Data Arrived at EDR: 10/20/2020
Date Made Active in Reports: 11/02/2020
Number of Days to Update: 13

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

West Map:	5629090 FORTUNA, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
0600601140B	FEMA Q3 Flood data

0600601120B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HYDESVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: FERNDALE

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	21 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
2	21 inches	61 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
3	61 inches	80 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Surficial Soil Types: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam
stratified
silty clay loam
sand
silt loam
coarse sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

QUALIFIERS

B = Detected in the associated Method Blank at a concentration above the routine RL.
B1 = BOD dilution water is over specifications . The reported result may be biased high.
D = Surrogate recoveries are not calculated due to sample dilution.
E = Estimated value; Value exceeds calibration level of instrument.
H = Analyte was prepared and/or analyzed outside of the analytical method holding time
I = Matrix Interference.
J = Analyte concentration detected between RL and MDL.
Q = One or more quality control criteria did not meet specifications. See Comments for further explanation.
S = Customer provided specification limit exceeded.

ABBREVIATIONS

DF = Dilution Factor
RL = Reporting Limit, Adjusted by DF
MDL = Method Detection Limit, Adjusted by DF
Qual = Qualifier
Tech = Technician

Phil Nyberg, D.V.M.
105 Main Street
Fortuna, CA 95540-1840

Subject: Rental Dwelling 1576 Hwy 36

Dear Dr. Nyberg,

This is a follow-up to our conversation of April 8 and your letter of April 9, 2004. As I indicated during our conversation, the Division of Environmental Health (DEH) identified housing violations at the above rental dwelling during our inspection of November 12, 2003 (see enclosed inspection report). Violations noted include a broken window, faulty wiring on back of the house, a missing board on front porch, mold, and rodent access points into the dwelling. In addition diesel contamination outside the dwelling is a health concern due to the potential for indoor contamination.

As you indicated, you have possible renters who wish to perform additional work on the dwelling including repair of the above items. You also indicated that this may take up to six months. We request that once this work is complete you contact us to perform a follow-up inspection to clear the violations identified during our November 12, 2003 inspection. This should be done prior to occupancy. In addition, any remodeling work should be performed under a permit obtained from the Humboldt County Building Division. They can be contacted at 445-7245.

The extent of diesel contamination and the possible impact to groundwater should be investigated, but will not be overseen by our office. You do have the option of requesting oversight of the investigation and cleanup by our office. If you wish to request our review and sign off, then an agreement would need to be signed acknowledging the scope of work and the need to pay DEH's review time at an hourly rate (currently \$96).

If you have any additional questions, please contact me.

Sincerely,

Brian Cox, REHS
Director, Division of Environmental Health

Dear Mr. Cox:

Thank you for this mornings conversation regarding the issue of our 1576 Hwy 36 house.

After our conversation I realized that this was the first time I had been informed that there were other issues of record involving the occupancy of the house.

In the event that we choose to repair the building, I would appreciate you providing me a listing of the items of concern so that we may be sure all are accounted for in our improvements.

Thank you,

Phil Nyberg

Subject: Phil Nyberg

Phil Nyberg and I finally connected this morning concerning his rental at 1576 Hwy 36 in Alton. The former tenant has moved out and the property is vacant. I indicated to him that the contaminated soil is his responsibility, is primarily a liability issue for him as the property owner, and that our authority is limited in requiring clean-up. I also let him know that we have visited the site and that there were substandard housing issues that still needed to be resolved including a broken window, a missing board on the front porch, substandard wiring on the back porch, mold, missing heater, and other items. He also indicated that the front porch is contaminated with diesel, but said the dwelling is an old farm house which may need to be demolished or completely renovated.

He said that he has prospective tenants who would like to renovate the dwelling and live there rent free for five years, but was waiting for clearance from us on the contamination issue. The tenants would not move in for six months while they performed some of the renovation work. I said that he was clear to make this arrangement, but asked that he or the new tenants contact us prior to occupancy so that we can clear the substandard housing violations on record. He agreed to this.

We should send a letter to clarify the need to contact us prior to occupancy and that he should obtain the appropriate permits from Building Division.

Please let me know if you need any additional information.

Subject: RE: Nyberg Issue

Two of our staff visited the site. The first visit was based on a housing complaint. The housing inspector referred the diesel contamination to the haz mat inspector. After receiving the referral, our haz mat inspector, Jeff Birdsall visited the site and found a 3 x 4 foot diesel stain and received information that at least 30 gallons of diesel had been spilled on the site. He inspected the site in November 2003, verbally notified Mr. Nyberg in November of the situation, and wrote a notice of violation (NOV) in early January 2004 indicating in the letter that we had visited the site. We delayed the issuance of the NOV because Mr. Nyberg said in November that he could not access the property for 60 days. Jeff Birdsall had hoped that Mr. Nyberg would voluntarily clean up the property without sending a notice. Nyberg has been cooperative on another of his sites that was contaminated.

I have seen that Planning and Building will often send notices without visiting sites or confirming the facts, but the Division of Environmental Health always visit sites and confirms information before sending notices of violation.

I'm ready to call Nyberg to tell him that ultimately it is his responsibility to clean up the contamination as a property owner, that we do not need to oversee the cleanup. We are not mandated to require clean-up of contaminated sites, except in cases in which there is a specific immediate threat to human health and safety. For this site, the harm to future tenants and to groundwater is not really clear. The only way to know is if Mr. Nyberg commissioned an investigation of the extent of contamination. There are no specific public health protection standards for small spills of petroleum products. In many cases we would refer contamination concerns to the state, however this one is too small for the state to respond. The laws relating to groundwater contamination mostly concern the responsible party's future liability, which in many cases is ultimately decided by the courts.

We can discuss this on Monday and go over the file. I've discussed with staff that they need to be more proactive in keeping me informed of these issues before they escalate, but we can't always predict which ones will become volatile. And yes, we are all innocent until proven guilty.

Roger said that Nyburg received a letter from the County (EH) that he had contaminated land. He said that the County took the word of a former tenant of the property that there was contamination. Nyburg said that the County never even came out to visit before sending him the letter, asking that Nyburg test the soil for contamination, send the results to the County, and finally clean up the property. I hope we didn't do that..... aren't we innocent until proven guilty?

Dear Roger:

I'm passing this stuff along to you in the hope that there is some way some common sense might be instilled in this, the waste of your County agencies.

If they could just accept that nothing is or needs to be perfect and that questionable, non-recurrent, probably non-existent problems might be overlooked, they just might not drive every productive human being out of this county.

Thanks for anything you can do.

MAR 26 2004

HUMBOLDT CO. DIVISION
OF ENVIRONMENTAL HEALTH

Jeff Birdsall
Humboldt Co. Dept. of Health
100 H St., Suite 100
Eureka, CA 95501

Dear Mr. Birdsall:

I have just returned to work following hip replacement surgery and am responding to your letter of February 27, 2004 which was delivered in my absence.

My purpose in responding is to re-iterate that I do not accept the premise that there, in fact, is diesel contaminated soil located on my property at 1576 Hwy. 36 in Fortuna California.

As you were previously notified, when our tenant was evicted we removed the diesel drum in question along with the makeshift lines going to his "grow operation" from the front porch of the house. Inspection of the area adjacent to the porch reveals normal vegetation which would not be the case with contaminated soil.

The idea that you are pursuing an improbable case of "contamination" based on the report of a disgruntled, pot growing former tenant frankly outrages me. In the unlikely event that Mr. Mehrten's criminal activity did result in any spillage that reached the soil through the porch, it would truly be minimal and you are effectively asking me to tear the house down to find out.

There are, I'm sure, environmental issues before your department that have merit and potential deleterious consequences to our County. This is certainly not one of them.

At a time when County Government funding is at a premium, it would seem that the policy of harassing citizens over issues as minor and questionable as this one would be re-evaluated and resources concentrated on situations of meaningful impact. I would certainly hope the County's budget-setting process will express the need for some sort of common sense in department operations.

Once again, the source of the potential problem has been removed. I have seen no evidence that there has been spillage involving the soil.

Sincerely,

Phil Nyberg

PAGE **1** OF **1**

**THE FOLLOWING VIOLATION CATEGORY SECTIONS ARE REQUIREMENTS
OF THE CALIFORNIA HEALTH & SAFETY CODE**

INSECTS - Eliminate insects (cockroaches, flies, fleas, etc.) and all evidence of insects by safe, legal, and effective methods. Eliminate vermin harborage conditions by sealing cracks and crevices in walls, cabinets, etc.

RODENTS - Eliminate rodents through safe, legal, and effective methods. Rodent-proof exterior and unit entry doors to eliminate gaps greater than ¼". Seal all openings at walls, floors, ceilings, inside cabinets, and around gas and plumbing lines. Eliminate evidence of rodents.

WATER SUPPLY - Provide adequate hot (110°F) and cold running water under pressure to all plumbing fixtures at all times.

PLUMBING - Maintain all plumbing lines and plumbing fixtures free from defects. Properly repair or replace all loose, leaky, clogged or otherwise faulty plumbing lines.

STAIRS - Repair/replace all loose, missing, or damaged balustrades, balusters, handrails, treads, or risers at stairways and stair landings.

WALLS - Repair/replace all water damaged, broken, cracked, buckled, missing, peeling, blistered, or deteriorated walls, wall coverings (including areas within cabinets or behind drawers), and doors.

FLOORS - Repair/replace all torn, deteriorated, worn, loose, damaged, cracked, uneven, or warped floors or floor coverings.

CEILINGS - Repair/replace all water damaged, broken, cracked, missing, peeling, blistered, sagging, or deteriorated ceilings or ceiling covering.

ELECTRICAL - Repair/replace all damaged, defective, worn, or missing electrical wiring, outlets, or switch plates.

POOL/SPA - Maintain the swimming pool and area clean and in good repair. Provide required signs and safety equipment. (CA H & S)

TOILETS - Repair/replace all damaged, missing, cracked, broken, malfunctioning, or deteriorated toilets and their components.

SINKS - Repair/replace all damaged, missing, broken, malfunctioning, cracked or deteriorated sinks (including worn enamel) or sink fixtures.

BATH/SHOWERS - Repair/replace all damaged, missing, broken, cracked, malfunctioning, or deteriorated baths/showers or their fixtures.

COMFORT HEAT - Provide comfort heat (70°F) to all dwelling units in accordance with all local building requirements. Repair/replace any damaged, broken, malfunctioning, or deteriorated comfort heating units. (CA H & S 17920.3)

APPLIANCES/FURNISHINGS - Maintain all owner-furnished appliances and furnishings in good condition or repair.

OCCUPANCY - Areas such as closets, pantries, toilet rooms, service rooms, garages, laundries, connecting corridors, unfinished attics, cellars and similar spaces are not allowed for human occupancy.

LIGHTING - Repair/replace all damaged, malfunctioning, missing or deteriorated required lighting fixtures and their components.

WINDOWS/VENTILATION - Repair/replace all damaged, broken, cracked, torn, inoperable, malfunctioning, missing, or deteriorated windows, ventilation units, window screens, or their components. Window screens shall be 16" mesh or smaller in tight fitting frames.

REFUSE AREA - Store all garbage and refuse in appropriate containers with tight-fitting lids. Garbage shall not be kept for more than 7 days. Rubbish may not be kept for more than 15 days. Maintain trash areas and containers clean and in good condition.

SANITATION - Maintain the building, dwelling units, and the premises free from debris, rubbish, garbage and other offensive matter. All usable material, including wood, shall be stored off the ground not less than 18 inches to prevent rodent harborage. Animal, fowl or bird other than cats, dogs, canaries and birds of the Psittacine family are required to be kept at least 35 feet from any food establishment or dwelling and more than 100 feet from any school or hospital.

MAINTENANCE - Maintain the building (s) and all units in good repair.

ROOF - Repair/replace damaged, missing, or deteriorated roof or roof covering.

VENT SCREENS - Provide corrosive resistant wire mesh screen with openings no larger than 1/16 of one square inch in a tight fitting frame to all foundation vent openings and all other openings in building to prevent the entry of vermin.

CALIFORNIA STATE FRANCHISE TAX BOARD WARNING

Sections 17274 and 24436.5 of the State Revenue and Taxation Code provide; in part, that a taxpayer, who derives rental income from housing determined by the local regulatory agency to be substandard by reason of violation of state or local codes dealing with health, safety, or building, cannot deduct from state personal income tax and bank and corporation income tax, deductions for interest, depreciation or taxes attributable to such substandard structure where the substandard conditions are not corrected within six (6) months after notice of violation by the regulatory agency. THE DATE OF THIS NOTICE MARKS THE BEGINNING OF THAT SIX-MONTH PERIOD. The Department is required by law to notify the Franchise Tax Board of failure to comply with these Code sections.

Please be advised that the above WARNING is for the purpose of compliance with the State Revenue and Taxation Code only. Compliance with Health Laws as noted on the attached Inspection Report or Notice of Violation must be made within the time specified on the Report or notice.

LEAD CORRECTION ADVISORY

WARNING: You are hereby advised that corrections ordered by this report/official notice may disturb surfaces that may contain lead-based paint. Lead-based paint can be commonly found in housing built prior to 1978.

Prior to making any corrections ordered and in conjunction with repairs or rehabilitation, you must determine if lead is present in the dwelling unit/apartment/room. All corrective actions must be conducted in a manner that will protect occupants, workers, and others from exposure to contamination.

OTHER INDOOR ENVIRONMENTAL HAZARDS

Exposure to internal environmental elements such as asbestos, molds and mildew, dust mites, droppings from cockroaches and rodents, carbon monoxide, formaldehyde, pesticides, and radon also contribute to unhealthy housing environments. All corrective actions must be conducted in a manner that will protect occupants, workers, and others from exposure to these elements.

Subject: Illegal Disposal of Hazardous Waste

Location: 1576 Highway 36, Hydesville, CA

Dear Mr. Nyberg:

This letter is in response to your letter dated February 17, 2004. The letter sent to you by Humboldt County Division of Environmental Health (DEH) on January 6, 2004 required that you have the diesel-contaminated soil on your property excavated. Additionally, you were to have disposed of the contaminated soil as hazardous waste or have it characterized by laboratory analysis for disposal and provide copies of receipts to DEH verifying legal disposal by February 27, 2004.

DEH does not concur with your statement that the contaminated soil does not constitute a public health or environmental risk. Additionally, the extent of contamination cannot be determined until the excavation has commenced and the area where the spill occurred has been made more accessible.

DEH will provide you with an extension until March 14, 2004 to submit copies of receipts to our office.

Please feel free to contact me at (707) 268-2234 if I may be of assistance in this matter.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeff Birdsall", with a long horizontal line extending to the right.

Jeff Birdsall, REHS
Humboldt County Department of Health and Human Services
Division of Environmental Health
100 H Street, Suite 100
Eureka, CA 95501

Dear Mr. Birdsall:

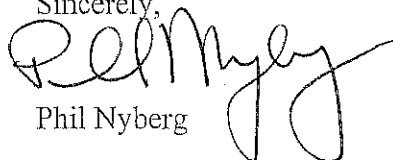

This letter is in reference to our telephone conversation in November 2003 and your subsequent letter of January 6, 2004.

As you are aware, at the time of your call we were in the process of evicting Mr. Mehrtens from 1576 Hwy 36, where he was using the illegal diesel setup you described to heat and light his extensive upstairs marijuana growing operation. His response was to move his plants, notify you he had spilled diesel and refuse to deal with the issue. The eviction has since been completed, the abandoned drums and lines removed and properly disposed of.

It appears that the magnitude of the alleged spillage was overstated by Mr. Mehrtens simply as a way to make his eviction as troublesome as possible and does not constitute a public health or environmental risk. The massive debris has been removed and plans are underway to dismantle or burn the house itself.

I trust that you will concur that this matter should be closed as having either no or insignificant public health or environmental implications.

Sincerely,

Phil Nyberg

Phil Nyberg
105 N. Main Street
Fortuna, CA 95540

Subject: Illegal Disposal of Hazardous Waste

Location: 1576 Highway 36, Hydesville, CA

Dear Mr. Nyberg:

On November 14, 2003, Humboldt County Division of Environmental Health (DEH) responded to a complaint at the above location. DEH observed three fifty-five gallon drums of diesel fuel stored on the porch of the house. There was a plastic line delivering fuel from one of the drums to what the tenant of the property said was a "fire monitor heater" in the home. DEH observed soil contaminated with diesel fuel below the porch on the southwest side. DEH was not able to observe if there was additional contamination under the porch due to inaccessibility. DEH told the tenant what corrective actions were needed and the tenant refused to agree to make them.

The illegal disposal of hazardous waste on your property presents a risk to public health and the environment, and constitutes a violation of the laws of Humboldt County and the State of California. DEH requires that all the diesel contaminated soil be excavated and disposed of as hazardous waste or be characterized by laboratory analysis for disposal. Provide receipts verifying lawful disposal to this office by February 27, 2004. I have included a partial list of local contractors and hazardous waste disposal information for your convenience. DEH recommends that the drums on the porch be stored in a more secure manner in order to prevent any potential additional releases.

Please feel free to contact me at (707) 268-2234 if you have any questions or if I may be of assistance.

Sincerely,

A handwritten signature in black ink that reads "Jeff Birdsall".

Mr. Norman Crawford
Humboldt County Division of Environmental Health
100 H Street, Suite 100
Eureka, California 95501

Subject: Phase II Subsurface Investigation Workplan at the Former Eel River Lumber Products, Mill C, Highway 36, Alton, California

Dear Mr. Crawford:

SCS Engineers is pleased to present this letter workplan for a Phase II Subsurface Investigation at the Former Eel River Lumber Products, Mill C, Highway 36, Alton, California. The proposed work includes advancing four borings at the locations illustrated on the attached site plan and submitting the samples for laboratory analyses

A. Methodology

The borings will be advanced using 7 to 8-inch hollow stem augers to an approximate depth of 20 to 25 feet bgs, depending on depth to groundwater. One soil sample will be collected from borings B-2, B-3 and B-4, from the approximate groundwater interface or at the discretion of the field geologist. The soil sample sleeves will be covered with Teflon sheeting, sealed with plastic end caps, labeled, and placed in an ice chest. The soil sample(s) will be transported to a California-certified analytical laboratory using proper chain-of-custody protocol. An SCS geologist will log the soil from the borings in general accordance with the Unified Soil Classification System.

A grab groundwater sample will be collected from the borings using a separate disposable bailer for each boring. Depending on apparent water quality and hole stability, a temporary screen may be placed in the boring prior to collection of the grab groundwater sample. The samples will be properly labeled and placed in a cooler with ice, and transferred to a California-certified analytical laboratory using proper chain-of-custody protocol.

The soil borings will be backfilled to the surface with low permeability material in accordance with HCDEH requirements after sampling is completed in order to minimize vertical fluid migration within the boreholes.

Mr. Norman Crawford

RE: Underground tank closure Sawmills A, B, and C.

Dear Mr. Campbell:

This department has received contradictory reports regarding the soil analysis and the contractor failed to call for inspection as agreed on the permits.

For the above stated reasons the previous "sniff test" is not acceptable.

Please provide the appropriate soil sample analysis according to the enclosed information within thirty (30) days.

Verification of disposition of the tank by a manifest or receipt is also required before final approval.

Sincerely,
Paul W. Anderson, M.D., M.P.H.

Re: Underground tank closures Mills A, B, C

Dear Mr. Campbell:

This department will be unable to give final approval of your underground storage tank closure until the following information is received:

1. Soil sample analysis results.
2. Passing precision tank tightness test within one year of physical closure date.
3. Copy of manifest showing delivery of hazardous materials to an approved disposal site.
4. Soil sample boring log.
5. Call for final inspection.
6. Other:
 1. Rinsate disposal
 2. Permit has expired

Please provide the above indicated items to this department within fifteen (15) days.

TANK CLOSURE

ATTENTION: Jim Clark

Dear Jim,

We are requesting a waiver for an abandoned and filled fuel storage tank belonging to E. R. S. M. in FORTUNA / RIO DELL. We augered test holes and took samples of soils from approximately 2' feet deep and 5' feet deep. We detected no odor of gasoline or other petroleum substances by smell in either of our samples taken. Therefore, we are requesting a waiver based on the lack of the vapors from petroleum substances. We have the samples stored here at our office.

If you need additional information, feel free to call us at 725-5182. Thank you.

Sincerely,

Alta M. Baird

Fortuna, CA 95540

Dear Mr. Frye:

This letter is to confirm my inspection of Eel River Sawmills, Mill C in Alton. The purpose of the inspection was to verify the compliance of the facility with Waste Discharge Requirements Order No. 85-113. My observations during the inspection verify that the mill is being operated in compliance with Order No. 85-113.

During the inspection we discussed the abandoned underground tank at the mill. As we discussed, it would be recommendable to coordinate with the Humboldt County Health Department to properly abandon the tank.

Sincerely,

ORIGINAL SIGNED BY

Cathleen A. Goodwin
Water Resource Control Engineer

Gentlemen:

The enclosed permit for your gasoline storage tank(s) should be posted at the location specified on the permit. Should there be a change in the status of the permit, such as a change in ownership or the discontinued use of a tank, please notify our office so the permit can be reissued reflecting the changes.

Before the installation of additional gasoline storage tanks of 250 gallons capacity or greater, information on installation requirements should be obtained from our office.

Thank you for your help in this matter.

Gentlemen:

The Humboldt County Air Pollution Control District requires permits for gasoline storage tanks with capacities greater than 250 gallons. Since you are now the owners of the sawmill at Alton, the permit, H-V005, issued to Halvorsen Lumber Products is no longer valid and needs to be reissued under your ownership. Please complete the enclosed application for transfer of ownership and return with the \$10.00 transfer fee. Also complete applications for gasoline storage tanks at your sawmills near Rio Dell and Redcrest; we don't have permits issued on these (no fee required). The attached diagram illustrates a submerged fill pipe which is required in gasoline storage tanks installed after January 1, 1971.

Sincerely,

C. P. Sassenrath

Dear Mr. Young:

I am in receipt of your two correspondences dated March 5, 2007 regarding APN 204-171-47 incorrectly identified as 2020 State Highway, Hydesville. If it is really mine, the address is 1576 Hwy 36, Fortuna.

Please send the described "demolition" permit application so that it might be submitted prior to your April 2, 2007 deadline.

Additionally, under both the Freedom of Information Act and my right to know my accuser, I am formally requesting the identity of the "Complainant" to whom you are forwarding copies of my correspondence from you.

Sincerely,

Phil Nyberg

Dear Mr. Young:

I am in receipt of the attached complaint of alleged Addition/Remodel involving Parcel #204-171-047.

The activity involved removal of a structure that your Environmental Health Department had previously determined to be uninhabitable. The removal was essentially complete at the time of receipt of your communication.

Your communication states that the demolition of a structure requires a "building permit". Surely I can't be the only person who would deem such terminology absurd.

I assure you that I had no idea that removing an uninhabitable old house from my own property required your blessing. The job is complete - the "hazardous" situation has been eliminated - there is nothing to inspect. Pursuing an after the fact permit would be simply extorting money with no beneficial purpose. Accordingly I would ask that the matter be dropped.

Recently my car was stolen in Fortuna, the couple captured in it three days later in Eureka - the car deemed totaled. The Humboldt County District Attorney couldn't seem to find the time to prosecute the perpetrators. I guess it would be interesting to see if it is more important to prosecute folks who are simply removing a hazard from their property.

Again, I respectfully request that you consider this matter closed.

Sincerely,

Phil Nyberg

Re: Complaint regarding alleged Addition / Remodel
Violation of Humboldt County Code Sections 311-10; 312-3; 312-51.5 and 314-7.1
Assessment Parcel Number 204-171-047-000 Location: 2020 St Hwy 36, Hydesville
Property Zoning AE-20 (Agriculture Exclusive) 1576

Dear Property Owner:

By certified letter of February 9, 2007 you were advised of an apparent violation of the Humboldt County Code on your property, and were asked to contact our Department.

The Addition / Remodel will require building permits. Contact the Building Division to start the Permit process. If you have additional questions you may contact the Building Division at (707) 445-7245 or 1-800-900-4034.

As you have avoided and failed to respond in any manner perhaps more drastic measures are called for to enable us to remedy any violations.

It is your disregard of these notices that require these more drastic actions to abate a public nuisance. Under guidelines set forth in Humboldt County Code Section 2131, the Code Enforcement Unit, in addition to the issuance of a formal Notice of Nuisance, may issue an Order Imposing Administrative Penalty and record a Lis Pendens against your property to insure payment of any monetary awards which may be awarded after a proper hearing. It should be noted that under the Administrative Penalty Ordinance, each day of violation subjects the property owner to a separate penalty of between \$250 and \$10,000.

Please be advised that this will be the last notice to you before this matter is referred to the District Attorney Investigator for further proceedings. However, we would like to resolve this violation and you may contact us in writing or by phone at (707) 268-3702 **no later than April 2, 2007**, and avoid further enforcement action.

Thank you for your immediate attention to this matter.

Sincerely,
Community Development Services

License Class C10 Contractor X Dennis Crozier Date 7-14-97

OWNER-BUILDER DECLARATION

I hereby affirm under penalty of perjury that I am exempt from the Contractors License Law for the following reason (Sec. 7031.5, Business and Professions Code: Any city or county which requires a permit to construct, alter, improve, demolish, or repair any structure, prior to its issuance, also requires the applicant for such permit to file a signed statement that he or she is licensed pursuant to the provisions of the Contractors License Law (Chapter 9 (commencing with Section 7000) of Division 3 of the Business and Professions Code) or that he or she is exempt therefrom and the basis for the alleged exemption. Any violation of Section 7031.5 by any applicant for a permit subjects the applicant to a civil penalty of not more than five hundred dollars (\$500).):

I, as owner of the property, or my employees with wages as their sole compensation, will do the work, and the structure is not intended or offered for sale (Sec. 7044, Business and Professions Code: The Contractors License Law does not apply to an owner of property who builds or improves thereon, and who contracts for such projects with a contractor(s) licensed pursuant to the Contractors License Law.);

I am exempt under Sec. _____, B.&P.C. for the reason:

WORKERS' COMPENSATION DECLARATION

I hereby affirm under penalty of perjury one of the following declarations:

I have and will maintain a certificate of consent to self-insure for workers' compensation, as provided for by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued.

I have and will maintain workers' compensation insurance, as required by Section 3700 of the Labor Code, for the performance of the work for which this permit is issued. My workers' compensation insurance carrier and policy number are: STATE FUND Policy Number 1413277-97

I certify that in the performance of the work for which this permit is issued, I shall not employ any person in any manner so as to become subject to the workers'-compensation provisions of Section 3700 of the Labor Code, I shall forthwith comply with those provisions.

Date: 7-14-97 Applicant: X Dennis Crozier

WARNING: FAILURE TO SECURE WORKERS' COMPENSATION COVERAGE IS UNLAWFUL AND SHALL SUBJECT AN EMPLOYER TO CRIMINAL PENALTIES AND CIVIL FINES UP TO ONE HUNDRED THOUSAND DOLLARS (\$100,000), IN ADDITION TO THE COST OF COMPENSATION, DAMAGES AS PROVIDED FOR IN SECTION 3706 OF THE LABOR CODE, INTEREST, AND ATTORNEY'S FEES.

CONSTRUCTION LENDING AGENCY

I hereby affirm under penalty of perjury that there is a construction lending agency for the performance of the work for which this permit is issued (Sec. 3097, Civ. C.):

Lender's Name NONE

Lender's Address _____

Work will commence within 180 days after date of issuance of permit. Work stoppage for a period of 180 days or more requires permit renewal at one half the cost of the Building Permit Fees if requested within one year of stoppage. When we disagree on the use of alternate methods of construction, alternate materials or interpretation of the code, you may appeal. Ask for details.

I certify that I have read this application and state that the above information is correct. I agree to comply with all county ordinances and state laws relating to building construction, and hereby authorize representatives of this county to enter upon the above-mentioned property for inspection purposes.

Signature of Applicant or Agent Dennis Crozier Date 7-14-97

PROJECT INFORMATION

SUBJECT North Coast Highway Solar 1, LLC - Highway 36 Solar Facility

PROJECT TYPE Conditional Use Permit, Application Assistance, , , , ,

PROJECT DESCRIPTION CUP for the construction and operation of a 2MWac solar photovoltaic power generation facility (solar facility) on approximately 13 acres. The site is zoned Agriculture Exclusive (AE) and the project would convert 13 acres from agriculture use to non-agriculture use. The facility would include single-axis trackers, arrays of solar panels, string inverters, transformers, and associated electrical equipment. The facility would be automated to allow operation with no staffing present. Production and system health data, as well as on-site weather data, would be monitored and gathered electronically. Additionally, maintenance staff would visit the site on an as-needed basis. The purpose of the project is to construct a facility that would produce emissions-free renewable energy for the state's power grid.

PROJECT LOCATION

This project is located in Humboldt County, in the Hydesville area, on the west side of Riverbar Road, approximately 1,700 feet south from the intersection of Riverbar Road and State Highway 36, on the property known to be in the southern half of the northwest quarter of Section 19 of Township 02 North, Range 01 East, Humboldt Base & Meridian.

PRESENT PLAN DESIGNATIONS Agricultural Exclusive (AE), Density: Range is 20 to 60 acres per unit; Residential Estates (RE1-5), Density: (Cluster) Range is 1 to 5 acres per unit; Airport Safety Review (AP), Density: Must comply with most recent Airport Land Use Compatibility Plan (ALUCP); Carlotta-Hydesville Community Plan (CHCP), 2017 General Plan, Slope Stability: Low Instability (1)

PRESENT ZONING

Agricultural Exclusive (AE), Minimum building site area is 1 acres (B-5(1))

re: APPS# PLN-2020-16341, 204-081-002-000, North Coast Highway Solar 1, LLC c/o Borrego Solar Systems, Inc.; Joshua Dorris

Dear Mr. Dorris:

Records at this office were reviewed to determine if this project could adversely affect cultural resources. **Please note that use of the term cultural resources includes both archaeological sites and historical buildings and/or structures. The review for possible historic-era building/structures, however, was limited to references currently in our office and should not be considered comprehensive.**

Project Description: CUP for the construction and operation of a 2 MW ac solar photovoltaic power generation facility (solar facility) on approximately 13 acres. The site is zoned Agriculture Exclusive (AE) and the project would convert 13 acres from agriculture use to non-agriculture use. The facility would include single-axis trackers, arrays of solar panels, string inverters, transformers, and associated electrical equipment. The facility would be automated to allow operation with no staffing present. Production and system health data, as well as on-site weather data, would be monitored and gathered electronically. Additionally, maintenance staff would visit the site on an as-needed basis. The purpose of the project is to construct a facility that would produce emissions-free renewable energy for the state's power grid.

Previous Studies:

XX This office has no record of any previous cultural resource studies for the proposed project area (see *recommendation below*).

Archaeological and Native American Resources Recommendations:

XX The proposed project area has the possibility of containing unrecorded archaeological site(s). A study by a qualified professional archaeologist is recommended prior to commencement of project activities.

XX We recommend that the lead agency contact the local Native American tribe(s) regarding traditional, cultural, and religious heritage values. For a complete listing of tribes in the vicinity of the project, please contact the Native American Heritage Commission at (916) 373-3710.

Built Environment Recommendations:

XX Since the Office of Historic Preservation has determined that any building or structure 45 years or older may be of historical value, if the project area contains such properties, it is recommended that prior to commencement of project activities, a qualified professional familiar with the architecture and history of Humboldt County conduct a formal CEQA evaluation.

Due to processing delays and other factors, not all of the historical resource reports and resource records that have been submitted to the Office of Historic Preservation are available via this records search. Additional information may be available through the federal, state, and local agencies that produced or paid for historical resource management work in the search area. Additionally, Native American tribes have historical resource information not in the California Historical Resources Information System (CHRIS) Inventory, and you should contact the California Native American Heritage Commission for information on local/regional tribal contacts.

The California Office of Historic Preservation (OHP) contracts with the California Historical Resources Information System's (CHRIS) regional Information Centers (ICs) to maintain information in the CHRIS inventory and make it available to local, state, and federal agencies, cultural resource professionals, Native American tribes, researchers, and the public. Recommendations made by IC coordinators or their staff regarding the interpretation and application of this information are advisory only. Such recommendations do not necessarily represent the evaluation or opinion of the State Historic Preservation Officer in carrying out the OHP's regulatory authority under federal and state law.

For your reference, a list of qualified professionals in California that meet the Secretary of the Interior's Standards can be found at <http://www.chrisinfo.org>. If archaeological resources are encountered during the project, work in the immediate vicinity of the finds should be halted until a qualified archaeologist has evaluated the situation. If you have any questions please give us a call at (707) 588-8455.

Sincerely,

Bryan Much
Coordinator

RE: Application (APPS#): PLN-2020-16341 Key APN: 204-081-002

Dear Applicant,

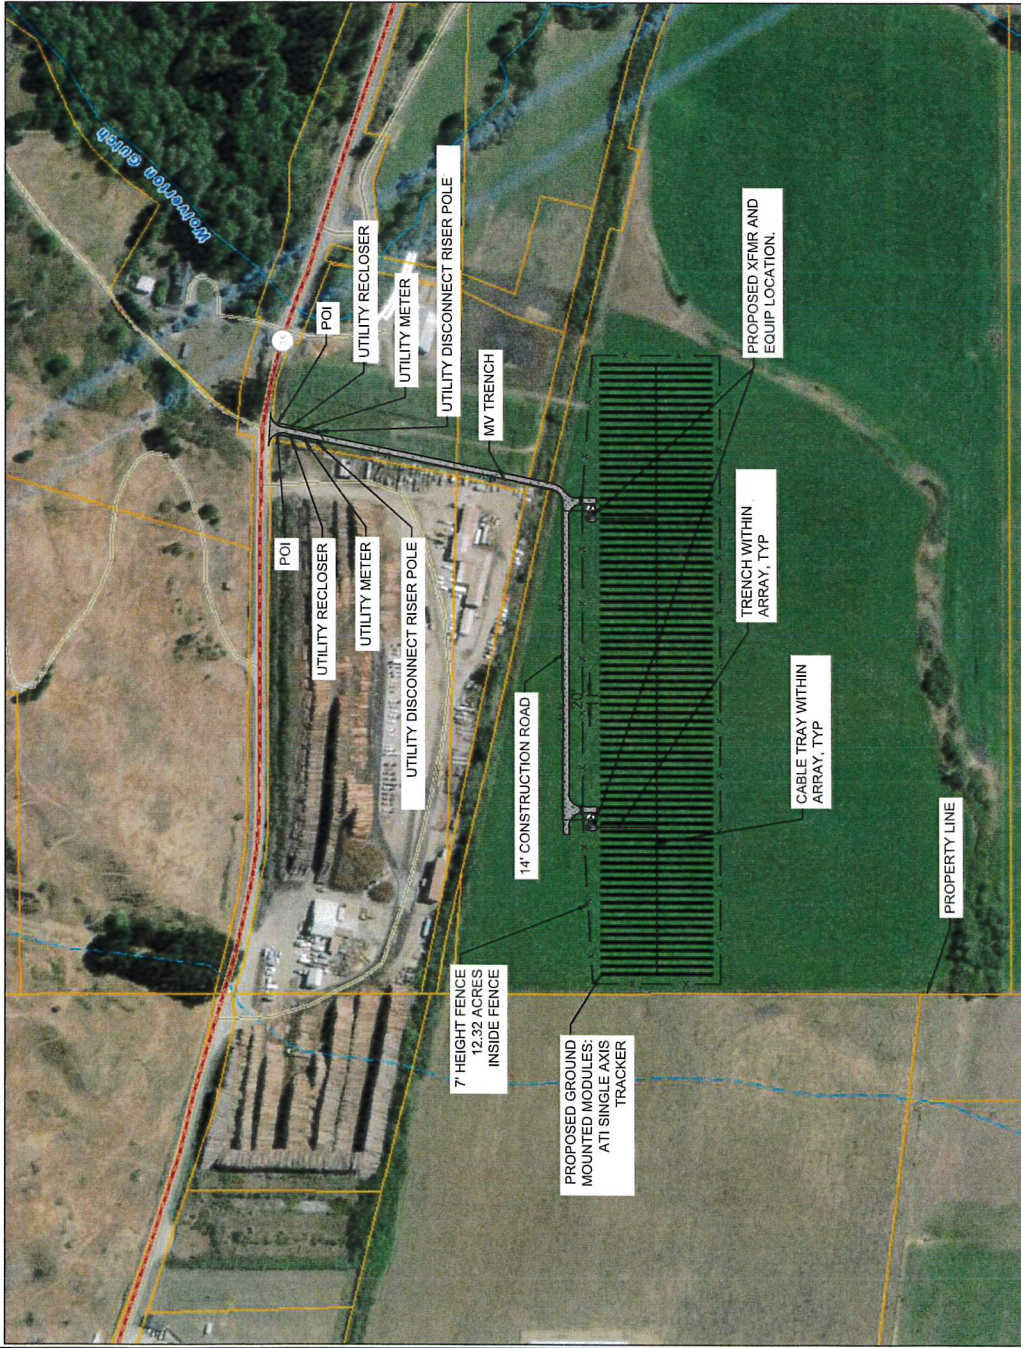

Thank you for the application submittal mentioned above. We have reviewed your initial application submittal and it has been accepted for processing as of the date of this letter. We have referred the project to the affected reviewing agencies based on the project description shown on the enclosed Project Transmittal.

Please review the project description. If you believe it to be incorrect or wish to make any changes please contact us as soon as possible, as this is the description from which we will be working.

The four milestones for all projects are *Application, Processing, Decision and Implementation*. This update letter confirms that you are now in the *Processing* step. In the course of processing your application it may be necessary for you to submit one or more of the items listed on the Application Submittal Requirements Checklist that were not required as part of your initial application. We will request this information before scheduling final action on the application if needed to respond to questions from referral agencies or to conduct an environmental review of the project. Also, you may be asked to clarify, correct or otherwise supplement the information already provided.

Case No. PLN-2020-16341

PLAN OF OPERATION

Overview

The project is the construction and operation of a 2MWac solar photovoltaic power generation facility (solar facility) on approximately 13 acres. The facility would include single-axis trackers, arrays of solar panels, string inverters, transformers, and associated electrical equipment. The solar field would be surrounded by a chain link fence.

Purpose

The purpose of the project is to construct a facility that would produce emissions-free renewable energy for the state's power grid, in support of statewide and local green energy policies.

Site Access and Grid Interconnection

Access to the site would be via a compacted native earth or aggregate base access road from Highway 36. Adjacent to the access road would be a power line connecting the project to the power grid. Interconnection would occur at an existing power pole on the 12 kV power line on Highway 36.

Construction

Construction would be completed in approximately 4 months. Generally, the steps involved in construction are mowing of vegetation within the solar field, compacting native earth access roads (or installing aggregate base access roads), installing fencing, installing piles for array supports, placing underground conduit, and installation of solar panels and electrical equipment.

Operations

The facility would be automated to allow operation with no staffing present. Production and system health data, as well as on-site weather data, would be monitored and gathered electronically. Maintenance staff would visit the site on an as-needed basis, expected to be about once a week. As the site would be unmanned, no water or wastewater service is required or proposed. The operation will run for 20 years, which is the duration of the Power Purchase Agreement (PPA) with Pacific Gas & Electric.

Emissions and Byproducts

The facility will generate no noise and no air pollutant or greenhouse gas emissions, and would not produce any byproducts.

Site Imperviousness

The solar field will create a very limited amount of new impervious surfaces. Impervious areas will include the piles supporting the panel arrays (440 sq. ft.) and concrete pads below electrical equipment (1,060 sq ft.). Total imperviousness is 1,500 sq. ft. Areas under the solar panels would remain vegetated and pervious.

Joshua Z. Dorris
Senior Planner
Humboldt County Planning and Building Department
3015 H. Street
Eureka, CA 95501

Dear Joshua,

**RE: Humboldt County Planning Case Number PLN-2020-16320
RPCA Hatchery Road Solar A, B, C, & D - Solar Use Permit Application Fee's**

On April 29, 2020 Renewable Properties submitted our Use Permit Application for the Hatchery Road Solar A, B, C, & D project (Hatchery Road Solar [PLN-2020-16320]) to Joshua Dorris via email. In our cover letter RP stated that application fees would be sent under a separate cover via US Mail. This letter and enclosures provides the following Filing Fees:

2.0 Filing Fees

- 2.1 \$6,259.50 payable to Humboldt County for CUP
- 2.2 \$30 payable to Bear River Band of Indians (THPO)
- 2.3 \$30 payable to Blue Lake Rancheria (THPO)
- 2.4 \$30 payable to Wiyot Tribe (THPO)

Please do not hesitate to reach out with any questions and/or comments. We look forward to working with you on this project.

Sincerely,

RENEWABLE PROPERTIES

Aaron Halimi
President

PLANNING APPLICATION FORM
Humboldt County Planning Department
 Current Planning Division 3015 H Street Eureka, CA 95501-4484
 Phone (707) 445-7541 Fax (707) 268-3792

INSTRUCTIONS:

1. Applicant/Agent complete Sections I, II and III below.
2. It is recommended that the Applicant/Agent schedule an Application Assistance meeting with the Assigned Planner. Meeting with the Assigned Planner will answer questions regarding application submittal requirements and help avoid processing delays. A small fee is required for this meeting.
3. Applicant/Agent needs to submit all items marked on the reverse side of this form.

SECTION I

<p>APPLICANT (Project will be processed under Business name, if applicable.) Business Name: <u>North Coast Highway Solar 1, LLC c/o Borrego Solar Systems, Inc.</u></p>	<p>AGENT (Communications from Department will be directed to agent) Sales Contact Name: <u>EPD Solutions, Inc.</u></p>

LOCATION OF PROJECT

Site Address: <u>N/A</u>	Assessor's Parcel No(s): <u>204-081-002</u>
Community Area: <u>Hydesville</u>	Parcel Size (acres or sq. ft.): <u>63 acres</u>

Is the proposed building or structure designed to be used for designing, producing, launching, maintaining, or storing nuclear weapons or the components of nuclear weapons?
 YES NO

SECTION II

PROJECT DESCRIPTION
 Describe the proposed project (attach additional sheets as necessary):

The project is the construction and operation of a 2MWac solar photovoltaic power generation facility (solar facility) on approximately 13 acres. The facility would include single-axis trackers, arrays of solar panels, string inverters, transformers, and associated electrical equipment. The facility would be automated to allow operation with no staffing present. Production and system health data, as well as on-site weather data, would be monitored and gathered electronically. Additionally, maintenance staff would visit the site on an as-needed basis. The purpose of the project is to construct a facility that would produce emissions-free renewable energy for the state's power grid. See attachment.

SECTION III

OWNER'S AUTHORIZATION & ACKNOWLEDGEMENT

I hereby authorize the County of Humboldt to process this application for a development permit and further authorize the County of Humboldt and employees of the California Department of Fish and Wildlife to enter upon the property described above as reasonably necessary to evaluate the project. I also acknowledge that processing of applications that are **not** complete or do not contain truthful and accurate information will be delayed and may result in denial or revocation of approvals.

SCHEDULE "A"

That real property situated in the County of Humboldt, State of California, described as follows:

The Northwest Quarter of Section 19 in Township 2 North, Range 1 East, Humboldt Meridian, described as follows:

EXCEPTING THEREFROM the 1st and 3rd Parcels of land described in that certain Deed from Joel Bernell, et ux to Eel River and Eureka Railroad Company, dated May 2, 1885, and recorded in Book 16 of Deeds, Page 519, Humboldt County Records, which parcels are described in said Deed as follows:

BEGINNING at a point where Station 1215-40 of the located line of E.R. & E. R.R. bears South 12 degrees 12 minutes West, 33 feet;
thence North 12 degrees 12 minutes East, 133.2 feet;
thence South 77 degrees 48 minutes East, 300 feet;
thence South 12 degrees 12 minutes West, 133.2 feet;
thence North 77 degree 48 minutes West, 300 feet to the place of beginning.

ALSO BEGINNING at a point where Station 1215-40 of the located line of the E.R. & E.R.R. bears South 12 degrees 12 minutes West, 166.2 feet;
thence North 18 degrees 04 minutes East, 492.8 feet;
thence along the South side of the Hydesville Road, South 65 degrees 45 minutes East, 50 feet;
thence South 18 degrees 04 minutes West, 486.8 feet;
thence North 77 degrees 48 minutes West along the North line of depot grounds, 50 feet to the place of beginning.

ALSO EXCEPTING that portion of the Northwest Quarter of Section 19, Township 2 North, Range 1 East, Humboldt Meridian, described as follows:

BEGINNING at a point in the center of the State Highway and on the Humboldt Meridian line, said point being located 713.33 feet South of the Northwest corner of Section 19, Township 2 North, Range 1 East, Humboldt Meridian;
running thence from said point of beginning along the centerline of the State Highway, South 71 degrees 08 minutes East, 110.12 feet;
thence South 74 degrees 10 minutes East, 131.73 feet;
thence South 77 degrees 14 ½ minutes East, 101.67 feet;
thence South 84 degrees 39 minutes East, 36.56 feet;

continued

Land Use Program

Purpose

The Land Use Program's charge is to ensure that existing and proposed land developments align with public health, safety and the environment and Humboldt County Code in our county. Every place of human occupancy must have an approved means of sewage disposal. If a community sewage collection and treatment system is not available, an approved on-site sewage disposal system permitted through this program is the alternative.

Onsite Wastewater Treatment Systems (OWTS)

Onsite wastewater treatment systems (OWTS), or septic systems, are permitted and regulated in accordance with the Humboldt County Local Agency Management Program (LAMP). The LAMP, approved by the Humboldt County Board of Supervisors and the North Coast Regional Water Quality Control Board, was implemented beginning in 2018. In addition to providing a framework for local ordinance and OWTS regulations, the LAMP includes special provisions for Humboldt County's Advanced Protection Management Plan to minimize the impacts of OWTS to sensitive recreational beaches between Clam and Trinidad State Beaches. The LAMP, local ordinance and regulations are linked below. Follow the [Documents and Forms](#) link for permit applications and related documentation.

[Humboldt County OWTS Regulations and Technical Manual](#)

[Humboldt County Code Title VI, Division 1 Sewage and Onsite Wastewater Treatment](#)

[Humboldt County Local Agency Management Program \(LAMP\)](#)

Waterless Toilet Systems (WTS) and Graywater

Waterless toilet systems (composting toilets and incinerating toilets) and graywater systems are permitted in Humboldt County as an accessory to an approved OWTS or community sewer system. The Land Use program updated local code and regulations to accommodate these types of systems in 2018/2019. Waterless toilet and graywater systems can significantly decrease water use when properly designed and managed. Code and regulations for graywater and waterless toilet systems are available below. Permit applications are available under [Documents and Forms](#).

Construction, destruction and modification of groundwater wells are permitted through the Division of Environmental Health (DEH) Land Use Program. DEH requires that wells are properly sited and constructed to protect groundwater from potential contamination and that the work is performed by a qualified, licensed professional. Applications for water well permits can be found under [Documents and Forms](#). Local ordinance governing well construction in Humboldt County is linked below:

To: Shilpa Sunil
Subject: 1576 Hwy 36

Hi Shilpa, I just got into my database. Looks like we have a business, Steve Wills Trucking and Logging at that address (CERS ID 10020253). However, it appears that business operations for them occur on APN 204-171-003, not on any of the parcels you cited (204-081-002, -004, -007). Anyway, not sure if that helps or confuses, feel free to call to discuss, and again, when I get into the office this Thurs Apr 9, I will see if I can glean any more info from any paper files.

Thanks,

Norm (707) 599-4788

Hello Shilpa-

The parcels in question are zoned Agriculture Exclusive and appear to be engaged in agricultural use. It is not clear whether it is hay production, cattle grazing or a combination of both. I hope that answers your question. If you need any additional information, feel free to reach out.

Thanks.

PROJECT PERSONNEL QUALIFICATIONS

Shilpa Sunil

Environmental
Project Manager

EDUCATION:

M.S. Environmental
Engineering
University of
California, Irvine

B.S. Environmental
Engineering
University of Mysore
(SJCE), Mysore, India

CERTIFICATIONS:

OSHA/ 10-hr
Certification
CEQA Certification

YEARS OF EXPERIENCE:

With Hillmann: 1
years
Total: 9 years

PROFESSIONAL EXPERIENCE:

Ms. Sunil is an Environmental Professional with 9 years of experience in Environmental Engineering. Ms. Sunil is experienced in supporting several areas of Hillmann's practice including coordination of projects, project scope creation, investigatory projects, and corrective plan implementation.

As an Environmental Project Manager, Ms. Sunil has experience writing reports for site remediation for commercial property owners and preparing respective groundwater monitoring reports. She also writes Phase I and Phase II Environmental Site Assessments and Investigation reports as well as Supplemental Site Investigation Reports. She has experience working in a variety of buildings including multifamily residential properties, commercial office buildings, retail shopping centers, gasoline service stations, hotels, dry cleaning plants, auto repair shops, industrial buildings, aerospace manufacturers, plating facilities, and various manufacturing operations.

Representative experience includes:

Environmental Engineer, John L. Hunter and Associates, Inc:

From 2015 to 2017, Ms. Sunil worked as an Environmental Engineer for John L. Hunter and Associates. Her responsibilities included reviewing Water Quality Management Plans, grading & drainage plans and conducting site verification inspections. She reviewed Standard Urban Storm Water Mitigation Plans; utilized SWRCB SMARTS database, assisted in Industrial Waste Plan review. She performed detailed review of grading plans, design specifications, hydro modifications analysis, and Storm Water Best Management Practice (BMP) calculations. She assisted with annual report preparation as part of NPDES permit requirements. Additionally, Ms. Sunil was responsible for reviewing work of private Professional Engineers for compliance with City standards and she assisted in determining engineering requirements for new developments.

Engineering Tech II, Orange County Public Works- OC Engineering:

From July 2013 to December 2014, Ms. Sunil worked as an Engineer for Orange County Public Works. In this position, she reviewed permits requests, provided support of capital improvement and maintenance projects, and integrated environmental values into capital improvement projects by verifying the implementation of the federal National Environmental Policy Act (NEPA) and the California Environmental Quality Act (CEQA).

Staff Aid II, Orange County Public Works- OC Road, Capital Projects:

From July 2012- July 2013, Ms. Sunil served as a Staff Aid for Orange County. In this position, she was responsible for the preparation of Water Quality Management Plans and Micro Station Drafting. She provided detailed review of grading plans, design specifications, hydro modification analysis, and Storm Water Best Management Practice Calculations. She assisted with annual report preparation as part of NPDES permit requirements.

Staff Aid II, Orange County Road, Traffic Engineering: From March 2010 to July 2012, Ms. Sunil was a Staff Aid for the Orange County Road and Traffic Engineering team. She performed traffic investigation, assisted the traffic committee and aided in work order preparation. She analyzed traffic flows, parking issues, and intersection capacities. Ms. Sunil provided written and verbal responses to residents of unincorporated Orange County.

Assistant Engineer, RBF Consulting, Irvine, CA: From August 2007 to January 2010, Ms. Sunil was an Assistant Engineer at RBF Consulting where she conducted comprehensive evaluations of watersheds including National Pollution Discharge Elimination Systems (NPDES) compliance, incorporated BMPs, assisted public and private sector clients with NPDES compliance services, and prepared and reviewed Storm Water Pollution Prevention Plans and Water Quality Management Plans.

J. Ryan Terwilliger

Operational Manager, West Coast

EDUCATION:

B.S. Environmental Science, University of Southern California, Los Angeles, CA

CERTIFICATION:

Cal-OSHA Certified Asbestos Consultant
CDPH Accredited Lead
Inspector/Assessor/ Project Monitor

CA Certified Site Surveillance Technician

OSHA 40 - Hr HAZWOPER

YEARS OF EXPERIENCE:

With Hillmann: 4 years

Total: 8 years

PROFESSIONAL EXPERIENCE:

Mr. Terwilliger is responsible for business operations, fiscal management and field staff management for Hillmann's California Office. He also performs asbestos surveys and investigations to identify asbestos and lead materials associated with occupational hazards. He supervises work practices and controls in accordance with job specifications, current EPA, OSHA and State Regulations for Asbestos remediation projects in commercial, industrial and multi-family residential buildings. Mr. Terwilliger performs IAQ, mold and moisture investigations in commercial, industrial and residential facilities nationwide. He also performs awareness training for asbestos, lead and microbial agents. Mr. Terwilliger provides litigation support consultation.

Representative Experience Includes:

Tishman Speyer Properties, Various locations: Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include environmental health and safety, industrial hygiene, phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs and indoor air quality programs on various commercial, industrial and multi-family residential properties. Mr. Terwilliger is an Environmental Scientist on this contract, conducting on-site environmental services including phase I site assessments and NPDES water quality testing.

Westfield – Environmental Program, Various locations:

Since 2000, Hillmann has been providing an environmental program encompassing environmental health and safety, Phase I environmental site assessments, asbestos and lead surveys, air monitoring, bid administration and O&M programs, industrial hygiene and indoor air quality programs, and hazardous materials assessments on their mall properties throughout the county. Mr. Terwilliger is an Environmental Scientist on this contract performing industrial hygiene services that include indoor air quality monitoring, Phase I environmental site assessments, asbestos and lead surveys.

Brookfield Office Properties, Various sites, CA: Hillmann has been providing hazardous materials surveys, development abatement specifications, and managing the oversight activities during the abatement at various Brookfield owned sites throughout California. Mr. Terwilliger functions as a Project Manager for this contract.

California Department of Transportation, Central Valley and Northern CA: Hillmann has been performing asbestos and Lead-based Paint Surveys for the California Department of Transportation. Performed comprehensive asbestos containing materials and lead-based paint surveys of residential and commercial buildings that were slated for demolition and generated report of findings in order to aid the Department of Transportation (DOT) in facilitating the road improvement programs and building renovations throughout the

Central Valley area. Also during the abatement of asbestos from DOT owned buildings, provided contractor oversight and air monitoring services for regulatory compliance.

Verizon, Various Sites, CA. Hillmann conducted hazardous materials surveys, development abatement specifications, and project monitoring during abatement at various Verizon owned sites throughout California. Mr. Terwilliger functioned as the Project Manager.

Public Storage, Los Angeles, CA: Hillman performed comprehensive asbestos, lead-based paint and universal waste materials survey of commercial and industrial buildings throughout Southern California. Hazardous materials surveys were conducted prior to renovation for the storage units. Mr. Terwilliger developed abatement specifications and managed the abatement activities during the renovations of the buildings. He functioned as the Project Manager on this contract.

David H. Rutherford

Quality Management Director

EDUCATION:

B.S. Environmental Sciences, Cook College,
New Brunswick, NJ

CERTIFICATIONS:

40-hr HAZWOPER 29 CFR 1910.120

Certified Hazardous Materials Manager 1992-
2003

10-hr OSHA Construction Safety & Health

Construction Procedures, Materials and Costs
– a ten-week course at Rutgers Center for
Continuing Professional Development

YEARS OF EXPERIENCE:

With Hillmann: 31 years

Total: 31 years

PROFESSIONAL EXPERIENCE:

Mr. Rutherford has currently functions as Hillman's Quality Management Director and has served as the Director of Due Diligence as well. He has more than 30 years of experience in the environmental consulting industry, and over 26 years in managing and performing environmental property assessments including USEPA and NJDEP Preliminary Assessments.

As the Quality Management Director, Mr. Rutherford is responsible for overseeing the quality of all environmental and due diligence services across the company, including development of standard protocols, report content/templates, and account management strategies. He has managed large national accounts for real estate due diligence services including a desktop review service that handled nearly 500 properties per year. Mr. Rutherford is also the program manager for Hillmann's NJDOH approved "Indoor Environmental Health Assessment of Child Care and Educational Facilities."

Additionally, Mr. Rutherford performs and/or manages Phase II Environmental Site Assessments (ESAs), Underground Storage Tank (UST) investigations/closures, Property Condition Assessments (PCA), Construction Monitoring inspections, Asbestos surveys, Asbestos Abatement Project Monitoring services, Indoor Air Quality (IAQ) surveys, NPDES Discharge Monitoring, Community Right-to-Know surveys, and Environmental Risk Analysis for compliance with the Sarbanes-Oxley act.

Representative experience includes:

Tishman Speyer Properties, various locations nationwide:

Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include phase I ESAs, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs. Mr. Rutherford is a Project Manager on this contract. This contract is ongoing.

Citigroup, various locations nationwide: Since 1995, Hillmann has provided the complete environmental program including phase I ESAs, asbestos and lead surveys, air monitoring, bid administration, O&M programs, industrial hygiene, indoor air quality programs, geology services, radon testing, and hazardous materials assessments. Mr. Rutherford is an Account Manager on this contract. This project is ongoing.

TD Bank, N.A., various locations: Hillmann has performed phase I ESAs at several properties on behalf of TD Bank, N.A. Mr. Rutherford manages the group that conducts the assessments for this contract, which is ongoing.

HSBC Bank, various locations nationwide/NYC Metro: Hillmann is providing the complete environmental program including phase I ESAs, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs. Mr. Rutherford is a Project Manager on this contract, which is ongoing.

Peapack Gladstone Bank, various locations in NY, NJ, and PA:

Hillmann has performed phase I ESAs at numerous properties on behalf of Peapack Gladstone Bank since 2013. Mr. Rutherford manages the staff that conducts the assessments for this contract, which is ongoing.

The Davis Companies, Norwalk, CT: On behalf of The Davis Companies, Hillmann provided an Advisory Report of analysis and opinion regarding the potential electromagnetic fields (EMF) health risks that may be associated with a newly constructed sub-station on an adjacent property.

Multi-Family Portfolio, New York, NY: Hillmann conducted environmental due diligence services and construction plan and cost review for a rehabilitation project of 45 low income multi-family apartment buildings in upper Manhattan. Mr. Rutherford coordinated and oversaw the completion of 45 phase I ESA reports and 5 phase II site investigations.

MBD Community Housing Corporation, Bronx, NY: Mr. Rutherford's staff has conducted environmental due diligence services for various multi-family apartment buildings located throughout New York City; including a portfolio of 11 buildings in Bronx, NY. Various projects have been completed between 2009 and 2016.

International Portfolio of Industrial Properties: Completed in 2012, Mr. Rutherford was the Project Manager for a multi-level environmental due diligence assessment for a portfolio of 113 light industrial properties located throughout the United States and Mexico.

Confidential client, various locations nationwide: Between 2008 and 2013, as a Project Manager, Mr. Rutherford was responsible for conducting multiple Risk Assessments. The purpose for conducting the assessments was to project a cost estimate for potential environmental liabilities associated with over 3,700 former drug store facilities in compliance with the Sarbanes-Oxley act.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Hillmann Environmental Co. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Certified Sanborn Results:

Certification # 7C7F-4301-9B05

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527-21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

CA-HIGHWAY 36
FORTUNA, CA 95540

COORDINATES

Latitude (North): 40.5427460 - 40° 32' 33.88"
Longitude (West): 124.1168740 - 124° 7' 0.74"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 405419.6
UTM Y (Meters): 4488387.5
Elevation: 88 ft. above sea level

EXECUTIVE SUMMARY

TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL..... National Priority List
Proposed NPL..... Proposed National Priority List Sites
NPL LIENS..... Federal Superfund Liens

Lists of Federal Delisted NPL sites

Delisted NPL..... National Priority List Deletions

Lists of Federal sites subject to CERCLA removals and CERCLA orders

FEDERAL FACILITY..... Federal Facility Site Information listing
SEMS..... Superfund Enterprise Management System

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE..... Superfund Enterprise Management System Archive

Lists of Federal RCRA facilities undergoing Corrective Action

CORRACTS..... Corrective Action Report

Lists of Federal RCRA TSD facilities

RCRA-TSDF..... RCRA - Treatment, Storage and Disposal

Lists of Federal RCRA generators

RCRA-LQG..... RCRA - Large Quantity Generators
RCRA-SQG..... RCRA - Small Quantity Generators
RCRA-VSQG..... RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

Federal institutional controls / engineering controls registries

LUCIS..... Land Use Control Information System

EXECUTIVE SUMMARY

US ENG CONTROLS..... Engineering Controls Sites List
US INST CONTROLS..... Institutional Controls Sites List

Federal ERNS list

ERNS..... Emergency Response Notification System

Lists of state- and tribal (Superfund) equivalent sites

RESPONSE..... State Response Sites

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR..... EnviroStor Database

Lists of state and tribal landfills and solid waste disposal facilities

SWF/LF..... Solid Waste Information System

Lists of state and tribal leaking storage tanks

LUST..... Geotracker's Leaking Underground Fuel Tank Report
INDIAN LUST..... Leaking Underground Storage Tanks on Indian Land

Lists of state and tribal registered storage tanks

FEMA UST..... Underground Storage Tank Listing
UST..... Active UST Facilities
AST..... Aboveground Petroleum Storage Tank Facilities
INDIAN UST..... Underground Storage Tanks on Indian Land

Lists of state and tribal voluntary cleanup sites

VCP..... Voluntary Cleanup Program Properties
INDIAN VCP..... Voluntary Cleanup Priority Listing

Lists of state and tribal brownfield sites

BROWNFIELDS..... Considered Brownfields Sites Listing

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS..... A Listing of Brownfields Sites

Local Lists of Landfill / Solid Waste Disposal Sites

WMUDS/SWAT..... Waste Management Unit Database
SWRCY..... Recycler Database
HAULERS..... Registered Waste Tire Haulers Listing
INDIAN ODI..... Report on the Status of Open Dumps on Indian Lands
DEBRIS REGION 9..... Torres Martinez Reservation Illegal Dump Site Locations
ODI..... Open Dump Inventory

EXECUTIVE SUMMARY

IHS OPEN DUMPS..... Open Dumps on Indian Land

Local Lists of Hazardous waste / Contaminated Sites

US HIST CDL..... Delisted National Clandestine Laboratory Register
HIST Cal-Sites..... Historical Calsites Database
SCH..... School Property Evaluation Program
CDL..... Clandestine Drug Labs
CERS HAZ WASTE..... CERS HAZ WASTE
Toxic Pits..... Toxic Pits Cleanup Act Sites

Exclusive Recovered Govt. Archives

RGA LF..... Recovered Government Archive Solid Waste Facilities List
RGA LUST..... Recovered Government Archive Leaking Underground Storage Tank

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state and tribal leaking storage tanks

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there is 1 CPS-SLIC site within approximately 0.5 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>REYNOLDS RV REPAIR</i>	<i>988 HIGHWAY 36</i>	<i>WNW 1/4 - 1/2 (0.487 mi.)</i>	<i>3</i>	<i>14</i>
Database: CPS-SLIC, Date of Government Version: 12/06/2021 Facility Status: Open - Inactive Global Id: T10000001463				

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA)

EXECUTIVE SUMMARY

of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 02/28/2022 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
KEN BAREILLES TRUCKI EPA ID:: CAL000440754	1178 HWY 36	NW 1/8 - 1/4 (0.209 mi.)	2	11

CUPA Listings: A listing of sites included in the county's Certified Unified Program Agency database. California's Secretary for Environmental Protection established the unified hazardous materials and hazardous waste regulatory program as required by chapter 6.11 of the California Health and Safety Code. The Unified Program consolidates the administration, permits, inspections, and enforcement activities.

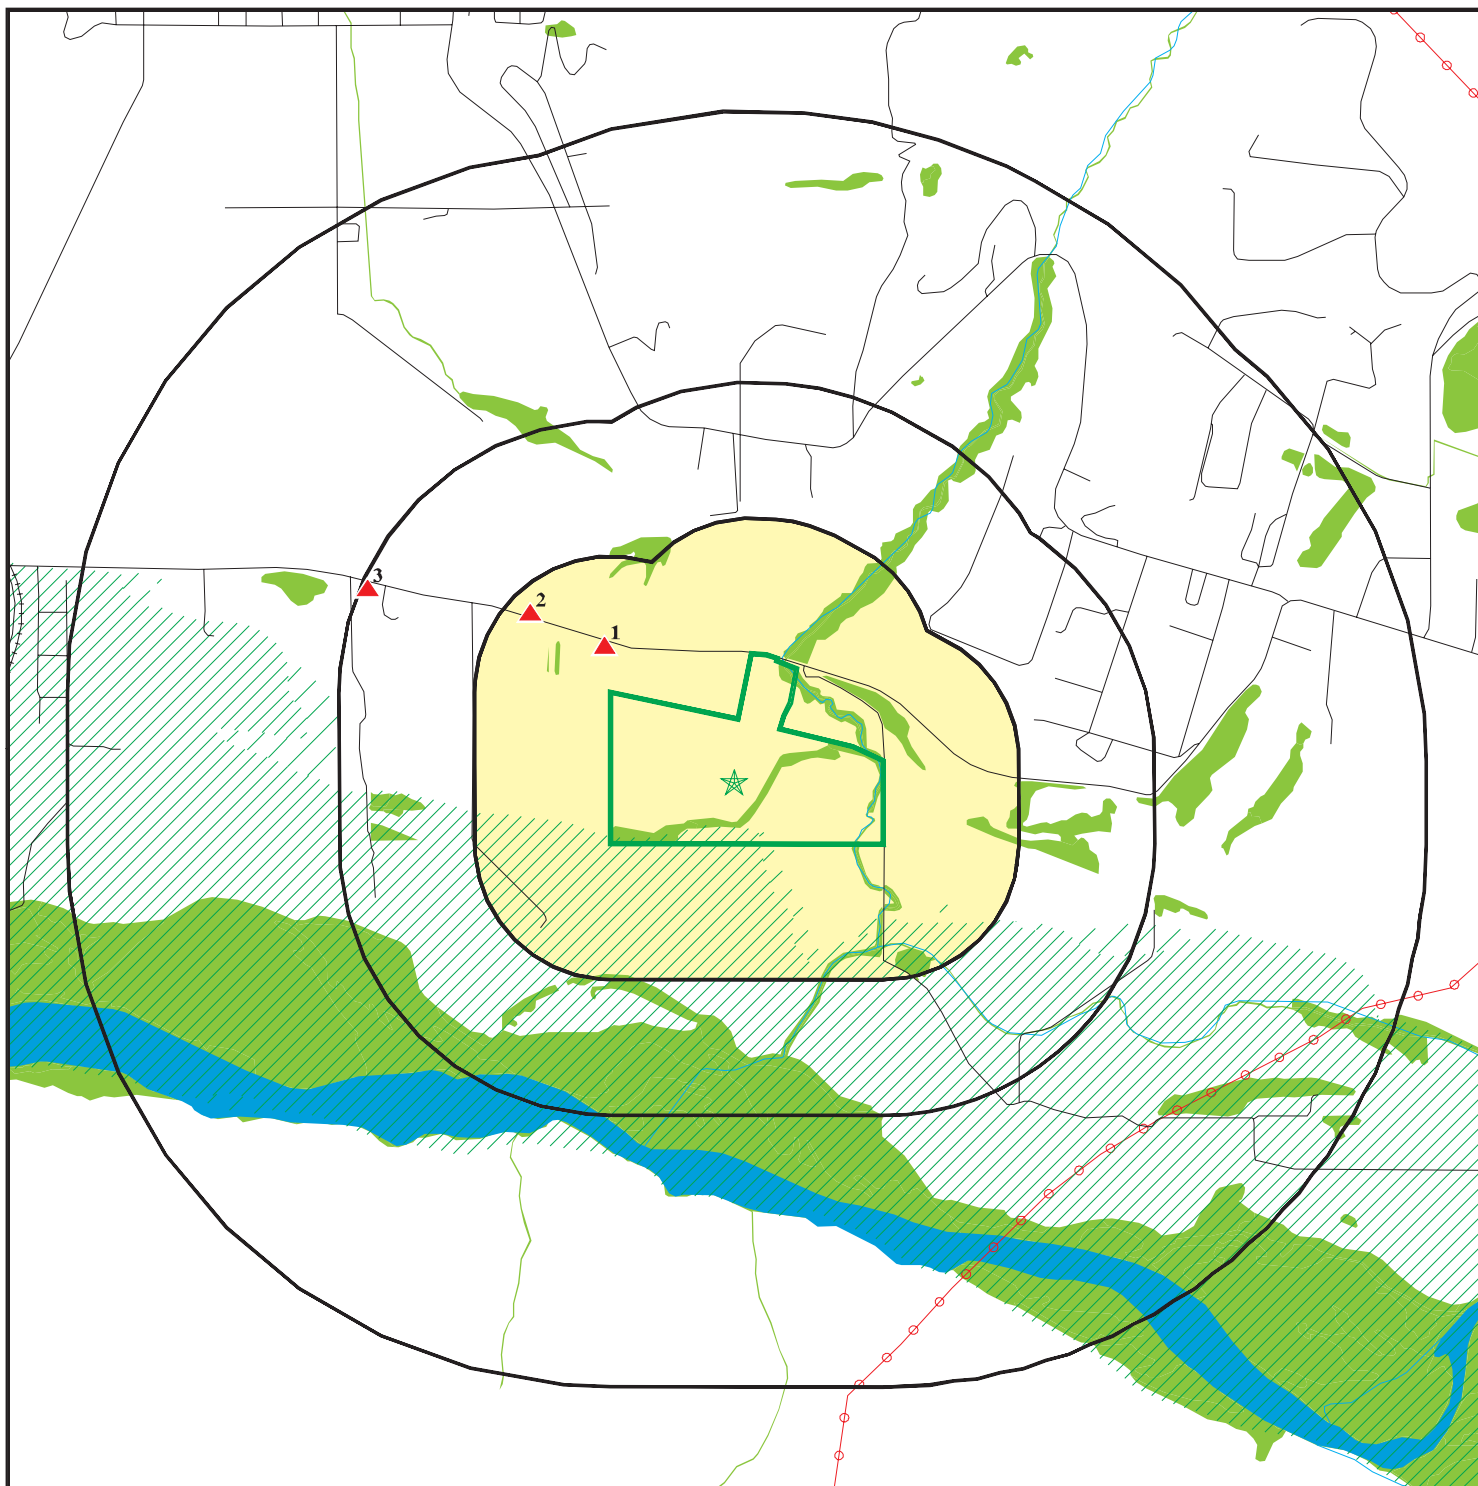

A review of the CUPA Listings list, as provided by EDR, has revealed that there is 1 CUPA Listings site within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
EEL RIVER LUMBER PRO Database: CUPA HUMBOLDT, Date of Government Version: 08/12/2021 Permit Status: 01 - Active Permit Status: 02 - Inactive Local Site Id: FA0003173	1576 HIGHWAY 36	NW 0 - 1/8 (0.087 mi.)	1	9

EXECUTIVE SUMMARY

There were no unmapped sites in this report.

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Primary Waste: STORMS

Waste Type2: Not reported

Waste2: Stormwater Runoff

Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.

Secondary Waste: Not reported

Secondary Waste Type: Not reported

Design Flow: 0

Baseline Flow: 0

Reclamation: No reclamation requirements associated with this facility.

POTW: The facility is not a POTW.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.

Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 01/25/2022	Source: EPA
Date Data Arrived at EDR: 02/03/2022	Telephone: N/A

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 01/25/2022	Source: EPA
Date Data Arrived at EDR: 02/03/2022	Telephone: N/A
Date Made Active in Reports: 02/22/2022	Last EDR Contact: 03/02/2022
Number of Days to Update: 19	Next Scheduled EDR Contact: 04/11/2022
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Next Scheduled EDR Contact: 04/25/2022
Data Release Frequency: Quarterly

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/28/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2022	Telephone: (415) 495-8895

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/28/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2022	Telephone: (415) 495-8895
Date Made Active in Reports: 03/17/2022	Last EDR Contact: 03/02/2022

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/28/2022	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/02/2022	Telephone: (415) 495-8895

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Federal institutional controls / engineering controls registries

LUCIS: Land Use Control Information System

LUCIS contains records of land use control information pertaining to the former Navy Base Realignment and Closure properties.

Date of Government Version: 11/15/2021	Source: Department of the Navy
Date Data Arrived at EDR: 11/16/2021	Telephone: 843-820-7326
Date Made Active in Reports: 02/08/2022	Last EDR Contact: 02/07/2022
Number of Days to Update: 84	Next Scheduled EDR Contact: 05/23/2022
	Data Release Frequency: Varies

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 11/19/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/19/2021	Telephone: 703-603-0695
Date Made Active in Reports: 02/14/2022	Last EDR Contact: 02/23/2022
Number of Days to Update: 87	Next Scheduled EDR Contact: 06/06/2022
	Data Release Frequency: Varies

US INST CONTROLS: Institutional Controls Sites List

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 11/19/2021	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/19/2021	Telephone: 703-603-0695

Next Scheduled EDR Contact: 05/09/2022

Data Release Frequency: Quarterly

Lists of state- and tribal hazardous waste facilities

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2018
West Map:	12014196 FORTUNA, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>
0600601140B	FEMA Q3 Flood data

0600601120B	FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
HYDESVILLE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: FERNDALE

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	21 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 7.80 Min: 6.60
2	21 inches	61 inches	silt loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 2.00 Min: 0.60	Max: 8.40 Min: 7.40
3	61 inches	80 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 8.40 Min: 7.40

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Surficial Soil Types: silty clay loam
very gravelly - sand
loam
sand
sandy loam

Shallow Soil Types: No Other Soil Types

Deeper Soil Types: sandy clay loam
stratified
silty clay loam
sand
silt loam
coarse sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

* I would like to review the Public Records itemized in person by _____ / _____ / _____

Signature of Applicant: Alyssa Berry Date: 3 / 28 / 2021

District Public Records Disclosure Information

It is the policy of the NCUAQMD that all records not otherwise exempted from disclosure by statutory or case law, shall be open for public inspection with the least possible delay and expense to the requesting party. The NCUAQMD may require up to ten (10) days to locate and examine records potentially responsive to your request. The NCUAQMD charges document fees as per Rule 403, where the best estimates of actual costs for copying public records is \$2.00 for the first page and \$0.25 cents for each page thereafter. The requesting party will be given an estimate for record reproduction prior to copying and will be required to pay for records before receiving them. Typically, there is no charge for records that may be provided digitally, unless these records are only retained in hardcopy format.

APPENDIX G

PROJECT PERSONNEL QUALIFICATIONS

Stephen Bartlett

Environmental Technician
sbartlett@hillmannconsulting.com

EDUCATION:

B.A. Environmental Science, University of California, Irvine

CERTIFICATIONS:

OSHA 10-hr Construction Safety & Health
CA Certified Asbestos Supervisor
CA Certified Asbestos Building Inspector
Certified Asbestos Site Surveillance Tech
CA Lead Sampling Technician

YEARS OF EXPERIENCE:

With Hillmann: 4 years
Total: 4 years

PROFESSIONAL EXPERIENCE:

Mr. Bartlett is an Environmental Technician for our Southern California Office. Mr. Bartlett has supervised work practices and controls in accordance with job specifications, current EPA, OSHA, and state regulations for asbestos abatement projects in schools, as well as commercial, industrial, public, and multi-family residential buildings.

As an Environmental Technician, Mr. Bartlett performs quality assurance air sampling for asbestos, lead, and mold abatement projects. Mr. Bartlett is also responsible for performing air and surface hazard materials testing, and potable and non-potable water sampling. He regularly performs Indoor Air Quality Assessments as well for several high profile clients.

Additionally, Mr. Bartlett is skilled at performing Phase I environmental site assessments and transaction screens to meet environmental due diligence requirements under CERCLA.

Representative Experience Includes:

Tishman Speyer Properties, nationwide: Hillmann has been providing the complete environmental program for Tishman Speyer's properties since 1987. Our services include: phase I environmental site assessments, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs. Mr. Bartlett functions as an Industrial Hygienist on this contract, which is ongoing, and performs Indoor Air Quality Assessments.

Brookfield Properties, various locations: Since 1987, Hillmann has performed industrial hygiene, microbial, indoor air quality, asbestos surveys, project design investigations, project management, bulk sampling and analysis, and geotechnical services in numerous buildings in the New York and Los Angeles metropolitan areas. Mr. Bartlett is an Industrial Hygienist on this contract.

David H. Rutherford

Quality Management Director

EDUCATION:

B.S. Environmental Sciences, Cook College,
New Brunswick, NJ

CERTIFICATIONS:

40-hr HAZWOPER 29 CFR 1910.120

Certified Hazardous Materials Manager 1992-
2003

10-hr OSHA Construction Safety & Health

Construction Procedures, Materials and Costs
– a ten-week course at Rutgers Center for
Continuing Professional Development

YEARS OF EXPERIENCE:

With Hillmann: 34 years

Total: 34 years

PROFESSIONAL EXPERIENCE:

Mr. Rutherford currently serves as Hillmann's Quality Management and Technical Director of Environmental Due Diligence services. Previously, Mr. Rutherford served as the Director of Due Diligence. He has 34 years of experience in the environmental consulting industry, and over 30 years in managing and performing environmental property assessments including USEPA and NJDEP Preliminary Assessments.

As the Quality Management Director, Mr. Rutherford is responsible for overseeing the quality of all services across the company, including development of standard protocols, report content/templates, and account management strategies. He has managed large national accounts for real estate due diligence services including a desktop review service that handled nearly 500 properties per year. Mr. Rutherford previously served as program manager for Hillmann's NJDOH approved "Indoor Environmental Health Assessment of Child Care and Educational Facilities."

Additionally, Mr. Rutherford has performed and/or managed Phase II Environmental Site Assessments (ESAs), Underground Storage Tank (UST) investigations/closures, Property Condition Assessments (PCA), Construction Monitoring inspections, Asbestos surveys, Asbestos Abatement Project Monitoring services, Indoor Air Quality (IAQ) surveys, NPDES Discharge Monitoring, Community Right-to-Know surveys, and Environmental Risk Analysis for compliance with the Sarbanes-Oxley act.

Representative experience includes:

Tishman Speyer Properties, various locations nationwide:

Hillmann has provided the complete environmental program for Tishman Speyer's properties since 1987. Our services include phase I ESAs, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs. Mr. Rutherford is a Project Manager on this contract. This contract is ongoing.

Citigroup, various locations nationwide: Since 1995, Hillmann has provided the complete environmental program including phase I ESAs, asbestos and lead surveys, air monitoring, bid administration, O&M programs, industrial hygiene, indoor air quality programs, geology services, radon testing, and hazardous materials assessments. Mr. Rutherford is an Account Manager on this contract. This project is ongoing.

TD Bank, N.A., various locations: Hillmann has performed phase I ESAs at several properties on behalf of TD Bank, N.A. Mr. Rutherford manages the group that conducts the assessments for this contract, which is ongoing.

HSBC Bank, various locations nationwide/NYC Metro: Hillmann is providing the complete environmental program including phase I ESAs, asbestos surveys, air monitoring, bid administration, O&M programs, industrial hygiene, and indoor air quality programs. Mr. Rutherford is a Project Manager on this contract, which is ongoing.

Peapack Gladstone Bank, various locations in NY, NJ, and PA:

Hillmann has performed phase I ESAs at numerous properties on behalf of Peapack Gladstone Bank since 2013. Mr. Rutherford manages the staff that conducts the assessments for this contract, which is ongoing.

The Davis Companies, Norwalk, CT: On behalf of The Davis Companies, Hillmann provided an Advisory Report of analysis and opinion regarding the potential electromagnetic fields (EMF) health risks that may be associated with a newly constructed sub-station on an adjacent property.

Multi-Family Portfolio, New York, NY: Hillmann conducted environmental due diligence services and construction plan and cost review for a rehabilitation project of 45 low-income multi-family apartment buildings in upper Manhattan. Mr. Rutherford coordinated and oversaw the completion of 45 phase I ESA reports and 5 phase II site investigations.

MBD Community Housing Corporation, Bronx, NY: Mr. Rutherford's staff has conducted environmental due diligence services for various multi-family apartment buildings located throughout New York City; including a portfolio of 11 buildings in Bronx, NY. Various projects have been completed between 2009 and 2016.

International Portfolio of Industrial Properties: Completed in 2012, Mr. Rutherford was the Project Manager for a multi-level environmental due diligence assessment for a portfolio of 113 light industrial properties located throughout the United States and Mexico.

Confidential client, various locations nationwide: Between 2008 and 2013, as a Project Manager, Mr. Rutherford was responsible for conducting multiple Risk Assessments. The purpose for conducting the assessments was to project a cost estimate for potential environmental liabilities associated with over 3,700 former drug store facilities in compliance with the Sarbanes-Oxley act.
