Hello!

I just spent some time at the new Hyperion Crisis Residential Treatment Facility on N and 6th, and learned there about the fencing not being compliant with zoning code. I'm aware that there's a process for a variance that may (?) include a public hearing. I do support the installed fencing configuration due to the fact that residents will be in an environment intended to help them stabilize while experiencing mental/ behavioral health crises. I also appreciate and remember well the fencing component of the zoning code, and under most circumstances would say that I'm very supportive of the zoning code requirements. However, in this case, given the nature of the facility, I think the added fence height is beneficial for residents of the facility, staff, and neighbors.

If there's any further way I can express my support or be helpful, please let me know. Obviously this is a very important project to both the City and the County and they are almost ready to open. Thank you!

Best, Natalie Arroyo
