To the Planning Commission,

I support the project that is being proposed on Foster Avenue in Arcata for a number of reasons. Solar energy is the cleanest way to produce power and will be a benefit to our community as a whole, unlike other projects that had been proposed in that area in the past. Preserving the ongoing agricultural uses on the property is also beneficial to our community, and emphasizes respect for the local farmers, ranchers and those who desire to consume local food products.

I look forward to seeing more clean energy projects in our area.

Sincerely,

Paula Proctor

Arcata
