

To whom it may concern,

The following evaluation of the road is for Council Madrone LLC, Permit Application # 12196, APN: 221-201-022.

The access to the subject parcel is via Dutyville Road. The applicant is a member of "Dutyville Friends of the Road" association.

The following images were taken on June 3, 2022; mile markers are from vehicle odometer, starting at 0 at the junction of Dutyville Road with Ettersburg Road. The subject parcel is approximately 9.1 miles from the junction.

Images were taken at intervals to show the overall condition of the road, which is graded and well cared for the entire length. As with many private rural roads, there are "pinch" points, which occur along this road either at sharper turns or when the road runs through wooded areas and trees remain. The latter creates very short pinches.

At each point which "pinches" along the roadway (images here show nearly all of the pinch areas), there is turnout space on one or both sides of the narrow stretch; the narrow stretches have visibility on approach by either direction. The road is passable by two vehicles for the entire distance, with minimal need for pullout for these short distances.
